(7) Sector/Commodity	(8) Discipline/Field of Specialization
(9) Rationale(State the research problem and significance of the project to the current needs of the country. The proposal should justify resource expenditure. A typical justification would include a brief introduction, a general statement concerning the historical basis for R & D and, thrusts being addressed, utilization of the expected output and the impact information generated will have on science, the target users and the country.) Internationalization of education has been a global trend nowadays particularly in the higher education system. Universities all over the globe are compelled to couple with the external environment due to globalization which now functions as the key player in education system. According to Qiang (2003), internationalization of higher education is seen as one of the ways a country responds to the impact of globalization, yet at the same time respects the individuality of the nation. In order for the HEIs to be globally competitive and to answer global demands of education they need to embrace internationalization. Furthermore, Huang (2007) stresses that Internationalization of higher education is now characterized by a transition from technical assistance to the third world by developed countries to a growing global competition within some designated countries or areas to programs, degrees, diplomas, campuses, and quality assurance at a global level. Like other Asian countries, the Philippines is on its way in making the higher education system internationalized. The Commission on Higher education in 2016 issued Memorandum Order No. 55 entitled “Policy Framework and Strategies on the Internationalization of Philippine Higher Education.” This serves a basis and guide of higher education internationalization efforts and improving programs, policies and standards of internalization activities. Many of the HEIs in the Philippines have already come up with their internationalization efforts. Yet, there are still a lot to be done in order to improve further. HEIs have to identify opportunities, problems and challenges along the way as they journey towards internationalization of education. Capiz State University as one of the HEIs in the Philippines has already started its internationalization initiatives including student mobility, and research and webinar partnership and collaboration with international academic institution partners. Exchange student program is also being implemented in the University. CapSU also tries its best to have foreign students who will enroll in the different programs in different campuses opening new doors of opportunities for other nationalities in bringing diverse culture to the university. Hence the culture of internationalization is not yet robust in CapSU system, there are still a lot of improvisation to done- the structure, the finances, the curriculum, man-power, research collaboration, etc. which will pave the way for the university in identifying the challenges and opportunities in its journey toward internationalization.	
(9-A) Project Description (Discuss the project strategy and plan of action of the project. It should also describe the technical procedures and other works needed to carry out the project objectives. The relationship of the project inputs and activities should be explained clearly in this section. Projects similar/related to the proposed project should be mentioned.)	
(10) Objectives/Statement of the Problem (for Social Sciences) (Statement of the specific purpose to address the problem areas of the project.) Generally, this research will be conducted in order to find out the status, opportunities and challenges of Capiz State University in Its Journey towards internationalization of education. Specifically, it answers the following questions: 1. What is the status of internationalization of education of CapSU? 2. What are the opportunities associated with the internationalization of education of CapSU.?

3. What are the challenges along with the internationalization of education of CapSU?

(11) Scientific Basis/Theoretical Framework (Include concepts, theories and variables that indicate relevant relationships to be tested).

(12) Review of Literature/Prior Art Search (Related researchers/activities that have been conducted. State-of –the-art of current technology / information from which the project proposal will take-off).

Internationalization of higher education is seen as one of the ways a country responds to the impact of globalization, yet at the same time respects the individuality of the nation. While the various meanings attached to the term internationalization illustrate its complexity and richness as a concept, it is clear that the key element in the term is the notion of between or among nations and cultural identities. A country's unique history, indigenous culture(s), resources, priorities, etc. shape its response to and relationships with other countries. Thus national identity and culture are key to Internationalization of higher education.

Knight (1993) describes internationalization of higher education as 'the process of integrating an international/intercultural dimension into the teaching, research and service functions of the institution' (p. 21). There are several key concepts in this definition, e.g. the idea of internationalization being a dynamic process and not a set of isolated activities, integration or infusion that contributes to the sustainability of the international dimension. Finally, this definition refers to the primary and universal functions of an institution of higher education, namely, teaching, research and service to society.

The process of internationalization has vitalized the economic survival of the countries and has led to increase the opportunities for students to enhance their potential at the international standards (Wadhwa & Jha, 2014) and served as a tool to provide youth with cosmopolitan capital and relevant capabilities for the future (Yemini, 2012). The world-wide expansion of access to higher education has also created an increasing national and global demand for consumer information on academic quality (Dill & Soo, 2005) where quality has become a key theme starting in the early 1980s (Jung, Wong & Belawati, 2013). The possibility of maintaining quality is no longer being seen as an option (Jung et al., 2013) in a dynamic environment.

The most common measure of internationalization continues to be numbers of international students. (Howe, 2009). Although some commentators argue that the international student flow has been slowing down in recent years, student mobility still accounts for a significant source of international exchange throughout the world (Naidoo, 2006). A survey conducted by the International Association of Universities listed Student and Faculty Mobility as one of the most important component of Internationalization (Flores, 2012). It is then expected from UP and other Philippine HEIs to have greater mobility of faculty and students, to have international quality programs and more collaborative research and curricular activities, and to meet higher employer standards (Azanza, 2014).

However, given that student mobility has been made easier in recent years by developments in communications, faster information flows, and proactive student recruitment policies in many host countries (Tremblay, 2005) but still most Philippine HEIs would not be able to recruit good number of international students in spite of their rigid marketing strategies and initiatives. In order to be attractive, the kind and quality of programs offered in the Philippines need to be responsive and relevant to the current and emerging national, regional and international development goals, which is one of the vital elements of competitiveness (Cruz, 2014).

The Philippines, on the other hand, demands for international linkages where students' and faculty mobility is observed. One problem arising in this scenario is the fact that prestigious universities abroad link up only with qualified faculty and staff.

This institutional reform apparently directed HEIs worldwide to adopt "internationalization of education," as a key strategy in response to globalization. Internationalization of education, for Van Dame, is commonly associated with HEIs' activities which are supported by multilateral agreements, to expand

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- PROP-01

			Page	Page 4 of 11

their horizon over national borders Some common forms and current developments in internationalization of higher education (HE) include students and teaching staff mobility, internationalization of curricula, branch campuses, institutional cooperation agreements and networks, transnational university networks and virtual delivery of higher education as well as mutual recognition agreements (MRAs).

Moreover, the quality of human resources in any given society is largely dependent on the curriculum content of its educational system. The concern, however, is that due to the ever-changing needs and aspirations of societies occasioned by globalization, the curriculum content must constantly be reviewed and evaluated to meet with these challenges (Egwuasi et al., 2014). Internationalization and linkages increases the quantity of graduate's efficiency in the way institutions are managed and producing graduates and professional's global outlook ready to be hired by internationalized economies).

The Philippines has become a popular destination for learners of English as a second language and is sometimes characterized as the home of the world's "budget" English teacher (British Council 13). English is the language of instruction in Philippine HEIs. Consequently, the adoption of English as the official language of the ASEAN Economic Community is expected to position Philippine higher education favorably within the region.

The Philippines' ability to attract talent and its research capability, indicated by the number of researchers per million populations, are both the lowest in the group. Spending on research and development (R&D) is also low compared to the ASEAN peer group. Notwithstanding its relatively small research output, the Philippines' citation impact was the highest in the group, and 11 per cent above the global average. In terms of citation impact and volume of research output, the Philippines performs competitively in the subjects of environmental sciences and agricultural and biological sciences (British Council 26).

(13) Methodology (Details such as; a) variables to be measured and evaluated; b) treatments to be used and their layout; c) experimental procedures and design; d) statistical analysis; e) evaluation method and observations to be made, strategies for implementation.)

Research Design

This study utilized the mixed-method in research. In this research method, the descriptive-survey was used for the quantitative design and interview for the qualitative design to include information which may not be included in the questionnaire and validate the information gathered using the questionnaires.

Locale of the Study

This study will be conducted at the Central office, 3 campuses and 6 satellite colleges namely: CapSU Main, Pontevedra, Burias and Burias Campus, and Dayao, Pilar, Sigma, Dumarao and Poblacion Satellite Colleges.

Respondents of the Study

The respondents of the study will be composed of stakeholders of CapSU composed of the key officials (president, vice presidents, administrators, directors, deans), faculty and students.

Sample Size and Sampling Technique

Stratified Sampling will be employed hence the respondents come from the group of stakeholders: Key officials, faculty and students. The CapSU Key officials (president, vice presidents, administrators, directors, deans) will be selected using purposive sampling technique. On the other hand, faculty and students will be chosen utilizing the proportionate sampling based from the total number of faculty of students from each campus/college.

Research Instruments

The instrument that will be used in gathering is a questionnaire. It is composed of three parts. Part one will gathers profile of the respondents. Part two is a questionnaire adopted from adopted from

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- PROP-01

			Page	Page 5 of 11

Balagtas & Pangago (2012) which will measure the perception of the respondents on the status of internationalization comprised of 53 indicators distributed into 9 dimensions of internationalization of education which are: Curriculum and Instruction, Academic Standards and Qualifications, Mobility and Exchanges for Students and Teachers, International and Intercultural Understanding, Cooperation and Development Assistance, International Student Recruitment, Facilities and Support System, International Student Recruitment and Diversity Income Generation. Part three is a 16 – indicator researcher made questionnaire which will measure the perception on the opportunities of internationalization. Part three is also a researcher -made questionnaire composed of 14 indicators to measure perception on challenges of internalization. The questionnaire was answered in a 5-point Likert scale using the following responses: 5 – Strongly agree, 4 – Agree, 3 – Uncertain, 2 – Disagree and 1 – Strongly disagree. The survey instrument will be subjected to face and content validation of the panel members, before it will be pilot tested. The result of the pilot testing will then be subjected to reliability testing using the Cronbach Alpha.

Data Gathering Procedure

An approval from the university president will be sought first thru a letter before the questionnaires will be floated to the respondents of the central office, the three campuses and the six satellite colleges, and before the interviews be scheduled to the selected key officials, faculty and students. Administration of questionnaires will be done face-to-face and online. Conduct of interviews will also be de done face-to-face, phone calls or online.

Statistical Tools

The data to be gathered will be processed using the Statistical Package for Social Sciences (SPSS) software. Statistical tools such frequency count, mean and percentage will be used in the data analysis.

(15) Expected Output (Indicate the specific products, processes or services which the project is expected to produce; quantify when possible)

(15) Technology Transfer Activity Design (Indicate the specific products, activity design, processes or services to be transferred as extension activities)

(16) Targets Beneficiaries (Who the clientele are and what are the expected outcome/effects of the use of the projects output)

(17) Personnel Requirement

Name	Role (Program, Project, Study Leader)	Field of Specialization

Percent time devoted to the Program/ Project/ Study

Program/Project Leader (in hours):

Program/Project Members (in hours):

Father's Name: Sabadea D. Ducil (Deceased)

Wife's Name: Mary Grace B. Mayang

Child's Name: Gracian Latiffe m. Tomco

III. EDUCATIONAL BACKGROUND

Level	School	Degree	Inclusive Dates
Graduate	Filamer Christian University	Doctor of Education (Educational Leadership)	November 16, 2018
Graduate	Filamer Christian University	Master of Arts in Teaching (English)	November 14, 2014
Undergraduate	St. Pius X Seminary	Bachelor of Arts (Philosophy)	March 19, 1997

IV. POSITION/DESIGNATIONS

Academic Rank: Assistant Professor III

Designations:

2022- Present: Acting Registrar; Member, CapSu Pilar Management Team

2020-2022: BEED Program Chair

2011-2018: OSA Chair, SSC Adviser

“Capiz State University towards Internationalization of Education: Status, Opportunities and Challenges “

Questionnaire

Part I. Personal profile of the respondents

Direction: Please check and supply the information asked in the information sheet.

1. Name: (Optional) _____
2. Sex: () Male () Female
3. Age: _____
4. Civil Status: () Single () Married () Widowed
5. Position: () Key Official () Faculty () Student

Part II. Status of Internationalization of Education adapted from Balagtas & Pangago (2012)

Direction: Please read each statement and check the choice that describes the status of internationalizations of your institution using the following categories:

- 5 - Strongly agree 2 – Disagree
 4 – Agree 1 – Strongly disagree
 3 – Uncertain

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- PROP-01
	Document Title:	RESEARCH PROPOSAL	Revision No.	00
			Effective Date	November 25, 2019
			Page	Page 8 of 11

	5	4	3	2	1
A. Curriculum and Instruction					
1. The institution has an inclusive curriculum					
2. It has courses of foreign languages to understand the people of other countries.					
3. It offers courses that may serve as a venue for understanding and appreciation of other countries' culture.					
4. It has customized programs responsible to the demand of different sectors, agencies or organizations here and abroad.					
5. It has the program delivered on the modalities that could allow students from other countries to take courses at their own time and place.					
6. It has information and communication technologies that could facilitate effective and efficient learning.					
7. It has its own laboratories to test theories or theorize from experiences.					
8. It provides the student special learning experiences where they could appreciate the culture of their tribal groups/classes or races.					
9. It has created a joint curriculum or courses program with foreign institutions/universities.					
10. It regularly updates the syllabus of course offerings to integrate the new trends and addresses pressing global issues that have implications to education.					
B. Research Collaboration					
1. The Institution leads research activities done in collaboration with educational institutions or industries in other countries.					
2. It has faculty, students, or administrative staff who participate in international studies as respondents					
3. It conducts studies on international comparative education to understand differences between and among nations.					
4. It organizes international conferences where research studies are presented or disseminated.					
5. It contributes to the knowing body of knowledge recognized abroad					
C. Academic Standards and Qualifications					
1. The institution has reached level three accreditation by nationally known accrediting body.					
2. It benchmarks its curricular or extra activities with national and international standards					
3. It has become a benchmark of other institutions					
4. It has faculty and administrators who have high profile (i.e. recognize for their expertise here and abroad.					
5. It has faculty, administrators and staff with special trainings and exposures abroad (e.g. conferences, training programs, seminars).					
6. It is recognized in international society (e.g. cited in international publications, as a good institution for learning.					
7. It has faculty and administrators who received/granted scholarships, fellowships or grants abroad.					
D. Mobility and Exchanges for Students and Teachers					

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- PROP-01
	Document Title:	RESEARCH PROPOSAL	Revision No.	00
			Effective Date	November 25, 2019
			Page	Page 9 of 11

1. The institution has students studying in other institutions abroad for some other courses delivered online or face-to-face.					
2. It has foreign students studying in other institutions taught online or face-to-face.					
3. It has faculty members who taught abroad for faculty exchange program for faculty exchange program					
4. It has faculty from foreign institutions who are teaching some courses for the students of the institution.					
5. It has visiting professors from other countries that do academic work in the institution.					
E. International and Intercultural Understanding					
1. The institution has memorandum of agreements or memorandum of understandings with institutions for other countries for any international or intercultural understanding/networking.					
2. It has twinning programs with foreign institutions.					
3. It participates in international assemblies or activities to promote one's culture.					
4. Its faculty, students or administrative staff are active members of international organizations.					
5. It organizes both curricular and/or extracurricular multicultural activities.					
6. It has a center for multi-cultural/foreign students' organization that serves as venue for understanding the culture of different nations.					
7. It has accredited foreign students' organization					
F. Cooperation and Development Assistance					
1. The institution is engaged in international academic network/alliance, consortia, or links with other universities and colleges in other countries.					
2. It is engaged in formulating policies to achieve academic, scientific, economic, technical or cultural ties with other colleges universities abroad or NGOs on education (e.g. ASEAN, APEC, NSO).					
3. It receives funding for promotion of cultural understanding/international learning/ecumenical or interreligious activities.					
4. It has international development projects, commissioned by international agencies (World Bank, UNESCO, ADB, Aus-Aid, US-Aid, AFAP, Etc.)					
5. Its open its program for foreign students for less developed countries that have satisfied the entry requirement.					
6. It offers scholarship/grants for foreign students who come from less developed countries.					
G. International Student Recruitment					
1. The institution has educational programs, course offerings, syllabi and policies for admission and retention of students available online.					
2. It has responsive computerized or online system in recruiting, screening, enrolling international students.					
3. It has responsive system to address inquiries of prospective foreign students					
H. Facilities and Support System					

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- PROP-01
	Document Title:	RESEARCH PROPOSAL	Revision No.	00
			Effective Date	November 25, 2019
			Page	Page 10 of 11

1. The institution has classrooms equipped with state- of -the art-technologies.					
2. It has its own library with convergence of complete and updated materials/facilities both print and non-print.					
3. It has significant number of licensed fulltime librarians in all its sections.					
4. It has a dormitory with complete amenities for local and foreign students.					
5. It has provision for guidance and counseling for foreign students.					
6. It provides medical and dental support for its local and foreign faculty members, staff and students.					
7. It has amenities/support system for each foreign students, faculty and visitors					
I. Diversity Income Generation					
1. The institution generates alternative sources of income like offering educational programs or creating publications patronized by international institutions and industries					
2. It has income generating projects (IGP) in partnership with foreign agencies					
3. It has a specific budget coming from its partner educational institutions form other countries.					

Part III. Opportunities of Internationalization of Education

Direction: Please read each statement and check the column that corresponds choice of the opportunities of internalization of your institution using the following categories:

- 5 – Strongly agree 2 – Disagree
4 – Agree 1 – Strongly disagree
3 – Uncertain

Statement	5	4	3	2	1
1. Internationalization of Education brings about the institution international cooperation and capability building					
2. It fosters establishment of international academic networks					
3. It brings about diverged revenue generation.					
4. It promotes a globally competitive human resource.					
5. It institutionalizes best internationalization practices					
6. It brings about global teaching and learning quality.					
7. It materializes state-of-the-arts school facilities and amenities.					
8. It causes enhancement of internationalization of the curriculum					
9. It gives opportunities for more scholarships, trainings, international awards and research productivity for faculty and students					

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- PROP-01
	Document Title:	RESEARCH PROPOSAL	Revision No.	00
			Effective Date	November 25, 2019
			Page	Page 11 of 11

10. It brings opportunity for faculty to teach overseas.					
11. It brings opportunity for students to study abroad.					
12. It provides opportunity for direct collaboration.					
13. It brings about increased international networking by faculty and researchers					
14. It creates strengthened institutional research and knowledge production capacity.					
15. It produces most competent and innovative and effective graduates.					
16. It paves the way for the improvement of graduate employability.					

Part III. Challenges of Internationalization of Education

Direction: Please read each statement and check the column that corresponds your choice of the challenges of internalization of your institution using the following categories:

5 – Strongly agree 2 – Disagree
4 – Agree 1 – Strongly disagree
3 – Uncertain

Statement	5	4	3	2	1
1. There is lack of resourced organizational structure/office responsible for internationalization.					
2. Lack of funds and resources for internalization initiatives, programs and activities.					
3. There is unequal sharing of benefits of internalization amongst partners.					
4. There is tight competition with other higher education institution.					
5. Delayed in exchanging of materials happens because of the different rules and regulations implemented in each country.					
6. Reputational challenges derived from the institution's activity in transnational education (TNE) exists.					
7. There is difficulty in looking for more international partners.					
8. There is a difficulty in homogenization of curriculum.					
9. There is too rigorous/inflexible curriculum to participate in internationally focused programs including student mobility.					
10. Faculty and staff and administrators have limited international trainings and exposures abroad.					
11. Faculty staff and students are not knowable with foreign language and culture.					
12. Difficulty to access/recognize quality of courses/programs offered by foreign institutions.					
13. International opportunities are accessible only to students with financial resources.					
14. The institution lacks state of the arts facilities for local and foreign students.
