(9A) Abstract (This has a maximum of 250 words. It contains 1-2 sentences of rationale, followed by objectives, brief methodology, major findings, and implications of impact of the study.)

(9B) Keywords (Write 3-6 words you used in the study, preferably not found in the title because words in the title are already given keywords. This would also include process, or methodology employed.)

Students who participated in student organizations viewed involvement as a significant element of their socialization and academic persistence, providing participants with resources to excel in their educational environments. The more student participates in student organizations, the more likely they are to improve essential abilities useful in the local world setting. This study employs the descriptive type of research. This study was conducted at Capiz State University Pilar Satellite Campus during the school year 2021. A total of 195 respondents from 15 organizations were chosen using a complete enumeration technique. A modified questionnaire was used to gather data from the respondents. It was composed of three parts, part 1 deals with the socio-demographic profile of the respondents, part two collects information on the organization involved, and Part 3 gathers information on the contribution of the student organization to students' leadership skills and behavioral traits. Questionnaires were distributed to the respondents through Google Forms. The statistical tools used to analyze the data were frequency, percentage, and mean. One hundred respondents were officers of more than one student organization. They agreed they develop leadership traits such as confidence, honesty, optimism, persistence, and responsibility. They also decided that they acquire relational leadership traits such as Model for Others, Deal Well with Others, Deal effectively with Failure, Evaluate the Talents of Others, Resolve Conflicts, Communicate Clearly, Work Effectively with Teams, Good Listener, Developing a Vision, Executing a Vision, Innovative Ideas for Change and Motivate Others.

Keyword: Student organization, student involvement, behavior

(10) Introduction (This includes the rationale, background of the study, and objectives which are not divided by subheadings. Incorporate at least three (3) reviews)

One of the goals of higher education is to prepare students for their profession or occupation. In addition to the classroom environment, other opportunities can promote their interests and professional skills. Involvement in student organizations is considered one of those opportunities for skills development. Participation and membership in university-sponsored organizations provide students with different opportunities to get acquainted with Capsu life and enhance intellectual development.

According to Hall (2012), student organizations offer approaches to stimulate the learning experience beyond the classroom curriculum. They create networking opportunities with students with similar personal and professional interests and provide the probability of building networks in more significant communities beyond an organization. Through participation in student organizations, students can maintain relationships with their teachers and gain the ability to think critically, plan appropriately and make decisions.

Students who participated in student organizations viewed involvement as a significant element of their socialization and academic persistence, providing participants with resources to excel in their educational environments. The more student participates in student organizations, the more likely they are to improve essential abilities useful in the local world setting.

The main focus of this study was to find out the contribution of students organization to student development. Specifically, this sought to answer the following questions: 1. Determine the number of students involved in one or more student organizations, 2. Determine the contribution of students' involvement in the organization to leadership traits and relational leadership behavioral skills of the students, 3. Determine the significant difference between students' participation in one or more organizations to leadership traits, and 4. Determine the important difference between students' participation in one or more organizations to relational leadership traits or behavioral skills.

(11) Materials and Methods or Methodology (This includes the materials, methods, duration & location of the study. Materials and Methods are headings used in Natural Science researches and methodology is Social Sciences. Presentation of materials may not necessarily be in separate heading but may be incorporated in the specific methods used. Justify paragraphs with main headings in caps.)

This study employs the descriptive type of research. This study was conducted at Capiz State University Pilar Satellite Campus during the school year 2021. A total of 195 respondents from 15 organizations were chosen using a complete enumeration technique. A modified questionnaire was used to gather data from the respondents. It was composed of three parts, part 1 deals with the socio-demographic profile of the respondents, part two collects information on the organization involved, and part 3 gathers information on the contribution of student

organization to students' leadership skills and behavioral traits. Questionnaires were distributed to the respondents through Google Forms. Frequency, percentage, mean, and t-test were the statistical tools used to analyze the data.

(12) Results and Discussions (This part contains presentation of results (data) with reference to the table and figure, to be followed by discussion, with support of reviewed literature. Sequence shall be based on the objectives of the study. Tables are formatted without the vertical lines. Horizontal lines are set at the top and bottom portions as well as below table headings and above major subdivisions. Justify paragraphs with main headings in caps.)

Table 1 shows the respondents participation in the different organization. The table showed that in the total 195 respondents, 100 participated in atleast one organization while 95 only participated in one organization.

Table 1. Participated in Students Organization

	Participated in atleast 1 organization
Yes	n=100
No	n=95
TOTAL	195

Table 2 shows the leadership traits of the students who participated in various organization in Capiz State University Pilar Campus. Data showed that with a mean of 4.21, they strongly agreed on the following leadership traits they gained in joining in the different organization. Specifically, they strongly agreed on the following traits; confidence (m=4.22), honesty (m=4.21), optimism (m=4.21), persistence (m=4.20), and responsibility (m=4.22).

Table. 2. Leadership traits

LEADERSHIP TRAITS	MEAN	VERBAL INTERPRETATION
Confidence	4.22	Strongly Agree
Honesty	4.21	Strongly Agree
Optimism	4.21	Strongly Agree
Persistence	4.20	Strongly Agree
Responsibility	4.22	Strongly Agree
TOTAL	4.21	Strongly Agree

Note: The interpretation is based on the following scale: 1.00 – 1.80 – *Strongly Disagree*, 1.81-2.60 – *Disagree*, 2.61-3.40 – *Uncertain*, 3.41-4.20 – *Agree*, and 4.21-5.00 – *Strongly Agree*

Table 3 shows the relational leadership/skills of the students who participated in various organization in Capiz State University. The data shows that the respondents agreed with a total mean of 4.07 of the following relational leadership traits they acquire from joining in the different student ts organization. Specifically they strongly agreed on working effectively with teams (m=4.21) and motivating others (m=4.21). They agreed on as models for others (m=4.00), deal well with others (m=4.10), deal effectively with failure (m=4.10), evaluate talents of others (m=4.00), resolve conflict (m=3.99), communicate clearly (m=4.00), good listener (m=3.99), develop a vision (m=4.10), execute a vision (m=4.10), and innovate ideas for change (m=3.99).

Table 3. Relational leadership traits of the respondents

RELATIONAL LEADERSHIP TRAITS	MEAN	VERBAL INTERPRETATION
Model for Others	4.00	Agree
Deal Well with Others	4.10	Agree
Deal effectively with Failure	4.10	Agree
Evaluate Talents of Others	4.00	Agree
Resolve Conflicts	3.99	Agree
Communicate Clearly	4.00	Agree
Work Effectively with Teams	4.21	Strongly Agree
Good Listener	3.99	Agree
Develop a Vision	4.10	Agree
Execute a Vision	4.10	Agree
Innovative Ideas for Change	3.99	Agree
Motivate Others	4.21	Strongly Agree
TOTAL	4.07	Agree

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- CR-01
	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 4 of 7

Note: The interpretation is based on the following scale: 1.00 – 1.80 – Strongly Disagree, 1.81-2.60 – Disagree, 2.61-3.40 – Uncertain, 3.41-4.20 – Agree, and 4.21-5.00 – Strongly Agree

Table 4 shows the distribution of respondents whom participated in one or more students organization and leadership traits. Data showed that students whom participated in one student organization had a total grand mean of 4.28 and with a verbal interpretation of agree. Specifically they strongly agree on honesty (m=4.30), optimism (m=4.23), and responsibility (m=4.68). They agree on confidence (m=4.00) and persistence (m=4.20).

Students who participated in two or more students organization strongly agree with a total grand mean of 4.62. Specifically they strongly agreed on all items; confidence (m=4.50), honesty (m=4.66), optimism (m=4.65), persistence (m=4.34) and responsibility (m=4.89). This implied that students who participated in two or more student organization were more likely to acquire leadership traits.

Table 4. Distribution of respondents who participated in one or more students organization and leadership traits

LEADERSHIP TRAITS		MEAN	VERBAL INTERPRETATION
Participated in only one organization	Confidence	4.00	Agree
	Honesty	4.30	Strongly Agree
	Optimism	4.23	Strongly Agree
	Persistence	4.20	Agree
	Responsibility	4.68	Strongly Agree
	Total	4.28	Agree
Participated in two or more organizations	Confidence	4.50	Strongly Agree
	Honesty	4.66	Strongly Agree
	Optimism	4.65	Strongly Agree
	Persistence	4.34	Strongly Agree
	Responsibility	4.89	Strongly Agree
	TOTAL	4.62	Strongly Agree

Table 5 shows the significant difference between the leadership traits of the participants involved in only one organization and participants joining two or more organizations. A was used t-tests to determine whether there is significant differences between the two groups: those students that participated in only 1 organizations and those that joined on two or more organizations. It shows that the mean difference among the variables is 4.44503 and the p-value of 0.023 is less than the 0.05 alpha level. It means that there is a significant difference on the leadership traits of the participants.

Table 5. Significant difference on the leadership traits acquired by students who participated in one or more organization

Participated in two or more organizations	27.270	1	4.44500	0.023
---	--------	---	---------	-------

Table 6 shows the distribution of respondents who participated in one and two or more students organization and relational leadership behavior. Data showed that respondents who participated in only one organization had a total grand mean of 4.07 and agreed on acquiring relational leadership behavior. Specifically, they agreed on the following relational leadership behavior: models for others (m=4.00), deal well with others (m=4.10), deal effectively with failure (m=4.10), evaluate talents of others (m=4.00) resolve conflict (m=3.99), communicate clearly (m=4.00), good listener (m=3.99), develop a vision (m=4.10), execute a vision (m=4.10), innovate ideas for a change (m=3.99) and motivate others (m=4.21). On the other hand they strongly agreed on working effectively with teams (m=4.21).

On the other hand, respondents who participated in two or more students organization had a total mean of 4.23 with a verbal interpretation of strongly agree. Specifically they strongly agreed on the following: : models for others (m=4.32), deal well with others (m=4.28), deal effectively with failure (m=4.50), evaluate talents of others (m=4.33) resolve conflict (m=4.20), Work effectively with teams (m=4.21), Good listener (m=4.56), Develop a vision (m=4.33), Execute a vision (m=4.47) and motivate others (m=4.27)

Table 6. Distribution of respondents who participated in one or more student ts organization and relational leadership behavior

RELATIONAL LEADERSHIP BEHAVIOR		MEAN	VERBAL INTERPRETATION
Participated in only one organization	Model for others	4.00	Agree
	Deal well with others	4.10	Agree
	Deal effectively with failure	4.10	Agree
	Evaluate talents of others	4.00	Agree
	Resolve conflicts	3.99	Agree
	Communicate clearly	4.00	Agree
	Work effectively with teams	4.21	Strongly Agree
	Good listener	3.99	Agree
	Develop a vision	4.10	Agree
	Execute a vision	4.10	Agree
	Innovative ideas for change	3.99	Agree
	Motivate others	4.21	Strongly Agree
	TOTAL	4.07	Agree
Participated in two or more organizations	Model for others	4.32	Strongly Agree
	Deal well with others	4.28	Strongly Agree
	Deal effectively with failure	4.50	Strongly Agree
	Evaluate talents of others	4.33	Strongly Agree
	Resolve conflicts	4.37	Strongly Agree
	Communicate clearly	4.20	Agree
	Work effectively with teams	4.21	Strongly Agree
	Good listener	4.56	Strongly Agree
	Develop a vision	4.33	Strongly Agree

Execute a vision	4.47	Strongly Agree
Innovative ideas for change	4.10	Agree
Motivate others	4.21	Strongly Agree
TOTAL	4.32	Strongly Agree

Table 7 shows the significant difference between the relational leadership behavior of the participants involved in only one organization and participants joining two or more organizations. A was used t-tests to determine whether there is significant differences between the two groups: those students that participated in only 1 organizations and those that joined on two or more organization s. It shows that the mean difference among the variables is 4.19458 and the p-value of 0.020 is less than the 0.05 alpha level. It means that there is a significant difference on the relational leadership behavior of the participants.

Table 7. Significant difference on the leadership traits acquired by students who participated in one or more organization

VARIABLES	t	df	Mean Difference	Sig.
Participated in only one organization	32.579	1	4.19458	0.020
Participated in two or more organizations				

(13) Conclusions and Recommendations (This part shall be written in narrative form and arranged based on the objectives and findings. Conclusions are general statements answering the objectives. Recommendations are based on the conclusions. They may be split or combined based on their length, which means, conclusions and recommendations may be split under separate headings if they are long. Justify paragraphs with main headings in caps.)

Based on the result of the study, there were 100 respondents who were officers of more than 1 student organization. They agreed that they develop leadership traits such as confidence, honesty, optimism, persistence and responsibility. They also agreed that they acquire relational leadership traits such as Model for Others, Deal Well with Others, Deal effectively with Failure, Evaluate Talents of Others, Resolve Conflicts, Communicate Clearly, Work Effectively with Teams, Good Listener, Develop a Vision, Execute a Vision, Innovative Ideas for Change and Motivate Others. Result also showed that there is a significant difference of the leadership traits and relational leadership behavior of the respondents who joined in one and more than two students organizations.

The researchers recommend that every student organization should conduct leadership training and team activities to its officers and members to develop leadership skills and team work.

(14) Output (Indicate the specific products, processes or services which the project has produced; quantify when possible.) Journal

(15) Technology Transfer Activity Conducted (Indicate the specific products, activity design, processes or services transferred as extension activities)

	Document Type:	Document Code	RES- CR-01
	DOCUMENTED INFORMATION ISO 9001:2015	Revision No.	00
	Document Title:	Effective Date	
	COMPLETED RESEARCH	Page	Page 7 of 7

(16) Economic Analysis (This should present the direct cost of project implementation, expenses in the production of technology, revenues generated from technology produced, return on investment (ROI) and payback period.

(17) Acknowledgments (Include only important persons and institutions with involvement in funding and conduct of the research. Justify paragraphs with main headings in caps.)

(18) References (It should include only works mentioned in the text and should be arranged alphabetically. Citations shall not be less than 13 entries. This must follow the APA latest edition format, in hanging indention with 12-point space in between.)
