| <b>(7) Sector/Commodity</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <b>(8) Discipline/Field of Specialization</b> |
| <p><b>(9) Rationale</b> (State the research problem and significance of the project to the current needs of the country. The proposal should justify resource expenditure. A typical justification would include a brief introduction, a general statement concerning the historical basis for R &amp; D and, thrusts being addressed, utilization of the expected output and the impact information generated will have on science, the target users and the country.)</p> <p>The study aims to assess the level of stress and the degree of social interest of college students. The findings of the study may serve as a basis in the formulation of an Enhanced Guidance Program for the continuous improvement of Guidance and Counseling services as well as students' activities of various colleges and universities in Capiz and nearby provinces.</p>                                                                                                                                                                                                                                                                                                                                              |                                               |
| <p><b>(9-A) Project Description</b> (Discuss the project strategy and plan of action of the project. It should also describe the technical procedures and other works needed to carry out the project objectives. The relationship of the project inputs and activities should be explained clearly in this section. Projects similar/related to the proposed project should be mentioned. )</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                               |
| <p><b>(10) Objectives/Statement of the Problem</b> (for Social Sciences ) (Statement of the specific purpose to address the problem areas of the project.)</p> <p>The study aims to determine the stress and the social interest of students during the Academic Year 2022 – 2023.</p> <p>Specifically, it will answer the following questions:</p> <ul style="list-style-type: none"> <li>○ What is the level of stress of respondents in the areas of life transitions, academics, finances, social relations, and family relations when they are taken as a whole and grouped according to sex, year level, course, and family income?</li> <li>○ What is the degree of social interest in the areas of concern for others, responsibility, courage, and self-acceptance when they are taken as a whole and grouped according to demographics?</li> <li>○ Is there a significant difference in the level of stress when grouped according to demographics?</li> <li>○ Is there a significant difference in the degree of social interest when grouped according to demographics?</li> <li>○ Is there a significant relationship between the level of stress and the degree of social interest?</li> </ul> |                                               |
| <p><b>(11) Review of Literature/Prior Art Search</b> (Related researchers/activities that have been conducted. State-of –the-art of current technology / information from which the project proposal will take-off).</p> <p>Delino (2020) conducted a study on Stress and Coping Skills of College Students; Dy (2015) on Stressors and Stress Responses of Filipino College Students; Bulo &amp; Sanchez (2014) Sources of Stress among College Students. Agolla &amp; Ongori (2009) specifically pointed out that stressful activities such as exams, papers, organization activities, deadlines and the like. Studies on the development of the social interest scale for Iranians were made Alizadeh et al, (2021 &amp; 2017) and Sandi &amp; Halle, (2015). However, there has been limited literature dealing with stress and social interest and the correlation of both, particularly for college students in Philippine setting. This is where information from which the research proposal will take off.</p>                                                                                                                                                                                      |                                               |
| <p><b>(12) Scientific Basis/Theoretical Framework</b> (Include concepts, theories and variables that indicate relevant relationships to be tested.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                               |

The level of stress will be measured in the areas of life transitions, academics, finances, social relations, and family relations when taken as a whole and grouped according to sex, year level, course, and family income. While the degree of social interest will be measured in the areas of concern for others, responsibility, courage, and self-acceptance when taken as a whole and grouped according to demographics. This study will also correlate the level of stress and the degree of social interest.

This study will employ the quantitative research design, particularly the descriptive-comparative and correlational approaches. This design will be utilized to statistically describe, compare, and correlate the variables of stress and social interest. The descriptive approach will describe the level of stress and the degree of social interest of students in a state university in Capiz. On the other hand, the comparative approach will compare the difference in stress when taken as a whole and grouped according to sex, year level, course, and family income and the difference in social interest when taken as a whole and grouped according to sex, year level, course, and family income. Lastly, the correlational approach will determine the relationship between stress and social interest. Meanwhile the use of appropriate inferential tools will be determined after the test of normality.

**(15) Expected Output** (Indicate the specific products, processes or services which the project is expected to produce; quantify when possible)

Enhanced Guidance Program and Students' Services

**(15) Technology Transfer Activity Design** (Indicate the specific products, activity design, processes or services to be transferred as extension activities)

Adaptation of the guidance/students' activities of other colleges and universities

**(16) Targets Beneficiaries** (Who the clientele are and what are the expected outcome/effects of the use of the projects output)

The results of the study would provide the students information about stress and the importance of connecting to others when they are stressed and supporting people around them who are dealing with stress. Thus, the rate of suicidal and depression cases will decrease.
