Analene Roxas, Dennis Ledesma and Engr. Kenneth Occeño
Capiz State University - Main Campus

I. RATIONALE

The College of Industrial Technology, Main Campus, Roxas City through CapSU Main Extension Office will be having a collaborative effort to render its social relevance of capability building, thus, it continues to reach out and serve its various clienteles, the community to the best of its abilities by empowering and providing them with increased opportunity to access technologies needed for industrial, technical skills and socio-economic development.

With the occurrence of the COVID-19, extension activities of the University particularly to conduct of training's in the community (face to face) has stopped due to the declaration of Enhanced Community Quarantine (ECQ) in the entire country. Until at present with the Modified Community Quarantine (MCQ) in the Province of Capiz, strict quarantine procedures are still being implemented following the health protocols as mandated by the Inter Agency Task Force (IATF) on Emerging Infectious Disease on COVID-19.

In this present situation, an alternative extension delivery system must be followed in order to cope up with the demands in extension services especially in the New Normal. In observance of the health protocols set by IATF, technologies for industrial and technical skills can be delivered to the clientele in the form of video presentations and limited face to face in order to prevent and minimize the spread or contact of COVID-19 to the trainers as well as to the trainees.

II. OBJECTIVES OF THE STUDY:

1. To conduct monitoring activity of BIT extension program.
2. To conduct training and post visitation to the clientele and adopted barangay affected by COVID-19 pandemic.
3. To provide intervention and evaluation program of the BIT extension activity

III. PROJECT DESCRIPTION:

Anchored to the "Serbisyo sa Kumunidad Aton Ihatag" **SKAI** program in consonance with the BIT extension program **BEST** (Building Employability and Sustainability through Technology), an offshoot from the collaborative efforts among CAPSU Main extension service, faculty and students.

The program provides widespread information dissemination to all concern on the availability of consultant and technicians for consultancy and services.

The department committed a poll of experts and staff to provide assistance and consultancy services to facilitate the implementation of the identified programs, projects and other activities directed to the communities. This program has been designed to sustain the community extension services of the Industrial Technology program.

Before Intervention (Issues/Concern)	Intervention	Approaches/ Methodology	Result of Intervention	Sustainability
1. Without much knowledge/ understanding 2. Not qualified Trainer (Specialized Field or major) 2. Recycled Art materials (Handicraft) 3. Without much Interest (Busyness) 5. Stagnant or immature Skills in respective major of specialization 6. Discouragement from the family members 7. Low self-esteem 8. Discrimination 9. Impatient or lack of patience 10. Gender and Sensitivity 11. Political intervention	Conduct visitation and Training Need Assessment (TNA) before the Training will be implemented in cooperation with the Principal/Focal Person/Partner LGU and some of the pupils/students/ out of school youth who will be participating the Skills training provided by the school	Conduct survey visit to the adopted or target beneficiaries/clientele. Interview and consultation Needs Assessment Plan out proposed activity/budget Actual Demonstration and Training proper Evaluation/ Assessment Monitoring Impact assessment	After the training some gain much knowledge/ understanding and basic skills especially in the different field of specialization. It was their livelihood income generation project and some will be their future employability	* Some engaged in part time job in their respective field of specialization and others are doing their business at home as package for deliverable. * Some pupils/students engaged in Art exhibit and others won in local and regional poster making Art competition *Some wanted to enroll in Industrial Technology program and engineering course.

IV. RESULTS OF INTERVENTION

After the training some gain much knowledge/understanding and basic skills in the field of specialization they chosen or requested. It was their livelihood income generation project or IGP and for future employment.

Name of Extension Program: **SKAI** (Serbisyo sa Kumonidad Aton Ihatag)

BIT Extension Project: **BEST** (Build Employability and Sustainability through Technology)

Terms: **5 years plan**

Bachelor of Industrial Technology major in **Arch. Drafting, Automotive Technology, Construction & Building Technology, Cosmetology, Electronics, Electrical, Food Technology, Garments, Welding & Fabrication**

Activities Skills Training on	Persons/faculty Involved/major	Percentage Of Faculty Involvement	Date of Activities (Year)	Number of Beneficiaries	Evaluation results Scale 1 - 5	Monitoring Results	Intervention based on the Monitoring Results	Current Status/ *Impact Results	Sustainability
1. Building Wiring Installation	Daliva, George Facto, Felix F. Balataya, Ma. Luisa P. Buenvenida, Allan Crespo, Jayvee Aleligay, Arnel Van V. (Electrical Technology)	4/6X100% = 66%	2018 2019 2022	25 25 20	5	Accomplished	Follow up Feedback Assessment Status Recall	End of Project Impact Assessment	Improved Social, Economic Status of Beneficiary
2. Basic Electronics	Bascos, Stephen Bueno, Rey P. Apolinario, Remar D. (Electronics Technology)	2/3X100% = 67%	2022	20	5	Accomplished	Follow up Feedback Assessment Status Recall	End of Project Impact Assessment	
3. Basic Arc Welding	Bangcoyo Lee L. (Welding & Fabrication Technology)	100%	2018 2019 2020 2022	25 20 25 15	5	Accomplished	Follow up Feedback Assessment Status Recall	End of Project Impact Assessment	
4. Beauty Care	Delos Santos, Nelma P. (Cosmetology)	100%	2018 2019 2022	25 20 15	5	Accomplished	Follow up Feedback Assessment Status Recall	End of Project Impact Assessment	Reduced poverty
5. Dressmaking	Cordova, Eva B. Cavigon, Emily (Fashion Apparel)	100%	2021 2022	25 15	5	Accomplished	Follow up Feedback Assessment Status Recall	End of Project Impact Assessment	Minimized or lessen Bystander
6. Native Delicacies, Baking and Meat Processing	Dordas, Juvy I. Olano, Leila O. Olano, Marifel B. Biaco, Marites C. Barrado, Ace D. (Food Technology)	3/5X100% = 60%	2018 2022	20 15	5	Accomplished	Follow up Feedback Assessment Status Recall	End of Project Impact Assessment	Employability
7. Basic Art Workshop	Celoso, Warren S. Ledasma, Dennis L. Famucol, Eduardo Arguelles, Oliver (Arch. Drafting)	100%	2018 2019 2020 2021 2022	25 25 20+ 20+ 10+	5	Accomplished	Follow up Feedback Assessment Status Recall	End of Project Impact Assessment	Engaged in New Business
8. Refrigeration and Air Conditioning	Bones, Rodolfo Jr. C. (HVAC-RT)	100%	2018 2019 2021 2022	20 20 15 15	5	Accomplished	Follow up Feedback Assessment Status Recall	End of Project Impact Assessment	Networking
9. Automotive Servicing	Acevedo, Doomenes A. Progio, Arturo Jr. L. (Automotive Technology)	100%	2022	15	5	Accomplished	Follow up Feedback Assessment Status Recall	End of Project Impact Assessment	Online Selling
10. Handicraft	Dangan, Margilyn B. Baitan, Antonieta B. Angelias, Gemma B. (Academe)	100%	2018 2019	25 20	5	Accomplished	Follow up Feedback Assessment Status Recall	End of Project Impact Assessment	

Table shows that 10 most requested and implemented activities on skills training conducted by the Industrial Technology program, there are 20 active faculty/trainer involved out of 28 regular faculty in the year 2018 to 2019, but when pandemic strikes in the region especially in Roxas City, Province of Capiz, the extension activity was stopped / canceled. Thus, it also affect the program. But with the intervention of CAPSU

Research Development and Extension (RDE), they find strategies that would answer the problem to meet the institution's duty while facing the COVID-19 situation. The key officials of RDE Central office meet together thru online platform with limited face to face interaction and collaborate with the different campus extension chair to come up with best idea suited to continue the extension program of the said university. Memos was approved prior to the CHED recommendations and SUC President to conduct limited face to face extension activities which also supported by Campus Administrator and Extension Chairperson. On July 2021, the first ever proposed extension activity was approved and implemented by IT faculty entitled "**Industrial Technology Community Services**". The recipients were from the different colleges of CapSU Main Campus. Among the activities introduced and being offered were from a product demo and technical services that gave satisfaction and benefits to the staffs, personnel, security guards, janitors and emergency instructors. Also, troubleshooting and maintenance of the appliance services through the effort of the technical expert and consultancy program of the Industrial Technology faculty in terms of electrical, electronics, automotive, air-conditioning and refrigeration were done satisfactory. There was also a conduct of manicure/pedicure, hair cut and foot massage by the group of Cosmetology faculties, and free repair and sewing consultation with the expert from Fashion and Apparel faculties. It was a great accomplishment boasted by the BIT faculty expert to render the services to their fellow faculty from other colleges of the said Campus.

The 2 years impact brought by pandemic was not really the end of extension program. With the willingness, availability and support system of the administration, LGUs and Public Schools within the City of Roxas, the BIT extension program and extension implementer continued to deliver the heartfelt effort and best practices to extend their expertise to the least fortunate, Out of School Youth (OSY), ALS learners, person deprived with liberty (PDL), Drug Surrenderers, Barangay Health Workers (BHW), Persons With Disabilities (PWD), Local Farmers, Fisherfolks and By Stander.

There are two types of system or process implemented by extension program. One is the 2 days training program like Handicraft, Basic Art Workshop, Electronics, and Food Technology that was monitored after 3 to 6 months and 1 to 5 years impact study. The other one is the 6 to 9 days training program with the partnership of DOLE by giving of "**Kabuhayan Starter Kit**" such as Dressmaking, Beauty care, Basic Arc Welding, Basic Electrical Installation and HVAC-RT (Heating, Ventilation, Air-Conditioning-Refrigeration Technology) that also to be monitored, follow up, and conduct feed backing with 3 to 5 years impact assessment. The project implementation are also in two process. First, upon the request of the LGU or Barangay Key officials to conduct skills training with the approval of SUC President then channeled to the Campus Administration and Extension Chair for implementation. The other one, the extension coordinator will present an extension proposal to conduct extension activity/ies to the adopted barangay with the approval of the budget from the Administration for implementation.

SUSTAINABILITY

The cooperation and collaboration of LGU, Sangguniang Kabataan, Government owned Elementary and Secondary school and the continuous effort of CapSU in serving the community is the key factor that makes the extension program sustainable. The competence of the faculty involved as trainer and the deliberation of the facts

dissemination is also one of the aspect in the achievement of the program. Thus, the extension activities offered are beneficial and impact to the participants additional knowledge and improvement for their livelihood. Some engaged in part time job and others are doing home business.

However, skills training to the participants is not always a guaranty to have a livelihood that easily. The tools and equipment to use in order to apply the skills gained is the most challenging for one. It's the real scenario that most participants who attended the training are still in need of tools and equipment that they can use for project transactions. That's why in order to support and sustain the needs of the trainee/graduates, the College of Engineering, Architecture and Technology collaborate with the Department of Labor and Employment to avail the program of **DOLE** the “ **KABUHAYAN STARTER KIT**”, a livelihood program for those beneficiaries who attended the skills training conducted under its extension programs namely the “Mobile Technology School” (MTS) and “Sebisyo sa Kumunidad Aton Ihatag” (SKAI).

Number of Beneficiaries per Barangay Received the Kabuhayan Starter Kit from DOLE				
Name of Barangay	Title of Skills Training Graduated	Number of Trainees Graduated	Number of Beneficiaries Availed the Kit	Date of Distribution of Kit
Barangay Sta. Monica, Dumalag, Capi	Basic Arc Welding	35	27	August 28, 2019
	B. Wiring Installation	27	19	
Barangay Bitoorllawod, Cuartero, Capi	Basic Arc Welding	52	18	June 22, 2020
	Bldg. Wiring Installation	29	8	
	Refrigeration/Aircon	21	16	
Barangay West Villaflares, Maayon, Capi	Basic Arc Welding	49	30	July 2, 2020
	Bldg. Wiring Installation	28	9	
Barangay Cabungahan, Maayon, Capi	Basic Arc Welding	43	31	September 4, 2020
	Bldg. Wiring Installation	30	19	
Barangay Liong, Roxas City	Basic Arc Welding	49	26	November 6, 2020
	Bldg. Wiring Installation	30	9	
	Refrigeration/ Aircon	35	16	
Barangay Cristina, Tapaz, Capi	Basic Arc Welding	38	On process	
	Bldg. Wiring Installation	38	On process	
	Refrigeration/ Aircon	27	On process	
Total -----		531	228	

MONITORING AND EVALUATION (M & E) FRAMEWORK

	INDICATOR	DEFINITION (How is it calculated)	BASELINE (What is the current value)	TARGET (What is the target value)	DATA SOURCE (How it will be measured)	FREQUENCY (How often it will be measured)	RESPONSIBLE (Who will measure it)	REPORTING (Who will be it reported)
Goal	Percentage of Trainee continuing to get involve in skills training program	Number of Trainees who start the first day of Training divided by the total number of previous training, multiplied by 100.	50%	60%	Barangay records	Annual	Extension Chair	Annual report
Outcome	Skills Training conducted increase their ability to learn and adopt	Sum of all training conducted with evaluation sheet to the trainee divided by the total number of previous trainee.	Average Score: 45	Average Score: 55	Training conducted using evaluation sheet	Every 6 months and 1 year Every 3 to 5 years	Faculty/Trainer	6 month training report 3 to 5 years training report
Outputs	Number of Trainees who completed a skills training course being provided by the extension program	Total number of trainee who were present on both the first and last day of the training skills	0	500	Training using attendance sheet	End of every training	Faculty/Trainer	Stakeholder review report
	Number of beneficiaries who helped their children and family in the previous years	Total number of beneficiaries who answered "Best" to the question "Did the training help the employability of trainee?"	0	500	Survey of Beneficiary	End of every training	Extension Coordinator	Survey report

Monitoring And Evaluation (M&E) Framework Template - www.tools4dev.org

PARTNERSHIP

The strong collaboration of CapSU Main Extension Office, the Administration and the LGU Barangay Key Officials, Sangguniang Kabataan, Elementary & Secondary Principals and Focal person will always associate to sell social transformation, offering livelihood abilities and to take part within the network services.

V. LESSONS LEARNED

The faculty trainer, students and school officials are involved in project/services of the extension of the Industrial Technology program. The barangay key official is also part of the community that provides the materials and other resources used during the skills training and to other activity.

The CAPSU provide vehicles, tools, and equipment to be used by trainers in skills training and to the other related activity. The barangay also provides the materials to be used by the participants in skills training as well as the meals and snacks of the trainers and facilitators. The Department of Labor and Employment (DOLE) counterpart is to provide the Kabuhayan Starter Kit, a set of tools and equipment per course for the beneficiaries who are graduated in skills training conducted by the College of Engineering, Architecture and Technology where most of the time the BIT faculty are the trainers/implementer of the said skills training.

The school allocated budgets for the expenditure of the extension program such as honorarium of trainers, transportation, documentations, and other expenses related to extension activity.

The monitoring and evaluation of the extension services of Industrial Technology program were conducted six months after the skills training and other activity rendered to the barangays. It was a continuous effort and accomplishment of the Industrial Technology with the collaboration of College of Engineering, Architecture in supporting

the Vision, Mission and Goals of the University. The Testimony of the beneficiary/trainee gave high regards and reliable information that the intervention of CAPSU Extension program provides life changing individual in our community.

VI. RECOMMENDATIONS

1. Continue to prepare “Extension Program/agenda for the period 2022-2026. The five year program must indicate the specific extension projects, and their respective leaders, locations, beneficiaries, budget, schedule of implementation, cooperating agencies etc.
2. Implement specific projects/studies in the different field of specialization of the Industrial technology program.
3. Make a continuous report on the accomplishment of extension program of BIT.
4. Conduct an impact study of each project that is carried out.
5. Continue to pursue Research-Extension based project in the adopted community.
