(8) Rationale (include the situation before intervention)
BUSINESSES are closing left and right, but in this climate, we tend to overlook art and artists. Already a difficult life before the pandemic hit, coronavirus disease (COVID-19) has exacerbated and highlighted existing problems in the art world. The COVID-19 pandemic has led to cancellations of various extension activities and countless outreaches around the Philippines. The project will be the collaborative effort of both

institution and support funding agencies that will help boost the interest in skills training related issues to cope up the stress brought by the pandemic. The activities are being discussed in order to meet the expectations of trainee and to equip marketing strategy on how to sell their product at affordable price and lesser cost of materials used and enhance their knowledge in order to perform well and become a productive citizen of the community. The intervention of community based program will able to give opportunity, importance, and character building for the trainee-participants and become a sole owner of their businesses someday, which also capable of putting a banner which supports the labor and employment of the Philippines.

The adopted barangay of BIT Extension program wherein the effect of pandemic brought economic concern in their respective family as well as small businesses in that community was also shut down. Closure of some market store and underemployed individual was one of the dilemma and struggle of the LGU in the said barangay.

With this reason, a project eventually initiated to give priority to those who are willing, interested, able to learn with or without disability that will boost their morale to continue engaging the kind of skills for their personal used, for income generating project and for economic development.

(9) **Project Description, Implementation date/duration, and Objectives**

Project Description:

The name of the program is Building Employability and Sustainability through Technology (BEST): An Extension Program of the Bachelor in Industrial Technology under the umbrella of Serbisyo sa Komunidad Aton Ihatag (SKAI). One of the extension project of Industrial Technology were implemented with the Utilization of Research-based Technologies for Extension Initiatives. The tools and equipment to be provided were determined by the Trainer's of this project. The fund will be released to the proponent, the Local Government Unit of the Barangay who will undertake and implement the Phase 1 project.

As mandated by the Commission on Higher Education, the Capiz State University responded to the call for social transformation (RA 7722) through its extension program. The aim is to serve the poorest of the poor, the less privileged, the deprived and the oppressed through livelihood skills training, values formation, and the like.

The BIT department committed a poll of experts and staff to provide assistance and consultancy services to facilitate the implementation of the identified programs, projects and other activities directed to the communities. This program has been designed to sustain the community extension services of the industrial technology program.

Our target beneficiary are those who are less privileged, low income earners family with their children, out of school youth and Single parents in the adopted Barangay of BIT Extension Program within the City of Roxas.

Implementation:

Before the implementation of the project, conduct of visitation with interview to the LGU kaey officials and the chairman of the private organization also with the invitation of the trainee-participants. Giving of TNA in consonance to the protocol of extension program, for them to know what are the most preferred activity they will be requesting and for approval. After the consolidation of the data collected, the extension coordinator with extension implementers formulated the data to determine the trainee-participants who will be

participating the said activity. The proposed budget of the activity was approved by the SUC President with the different signatories from the RDE heads and accounting office of CapSU Main Campus.

Training Need Assessment	Interview and Consultation (Before the Implementation)	During the Training
1. Silk-screen Printing	35	25
2. Hand Soap Making	40	25
3. Tack Welding	35	25
4. Trapik Light System Control	30	25
5. Cassava Crepe with fish filling	40	25
6. SensorDriven Warning Device With Blinker And Sound Alarm	35	25

Before Intervention (Issues/Concern)
1. Without experience
2. Difficulties in applying Methods and Techniques
3. Without Interest
4. Discouragement from the family members to get involve in the activity
5. Boring
7. Impatient (lack of patience)

Date and Duration:

The skills training on Utilization of Research-based Technologies for Extension Initiatives is under the Bachelor of Industrial Technology Extension program BEST Building Employability and Sustainability through Technology spearheaded by the BIT faculty and students were conducted simultaneously for two (2) days last August 26-27 and September 2-3, 2023. Each Training/Activity will have 25 participants who are marginalized group of individual of Barangay Culajao, Barangay I and Barangay Tanque.

OBJECTIVES OF THE STUDY:

1. To conduct skills training in the Utilization of Research-based Technologies for Extension Initiatives to the adopted barangay within the City of Roxas.
2. Evaluate the skills developed before and after the training with the Utilization of Research-based Technologies for Extension Initiatives to the adopted barangay within the City of Roxas.

Activities Conducted Research Product Demo	2022-2023 25 Recipients (Before the Training)	BIT Faculty

2.HAND SOAP USING CALAMANSI(citrofortunella microcarpa) andLEMONGRASS (cymbopogon ciatrus)as NATURAL ADDITIVES	25 - Category A	Prof. Nelma Delos Santos (Cosmetology)
3.Traffic Lights System and Control (ET)	20 - Category A 5 - Category B	Engr. John Carlo Llano (Electrical Technology)
4.Utilization of Oyster (Ostreidae) Shells as Tailor's Chalk with Blue Ternate Pigment	25 - Category A	Prof. Anne Jane Francisco (Faschion Apparel)
5.Portable Electronic Tack Welding Device	20 - Category A 5 - Category B	Prof. Stephen Bascos (Electronics Technology)
6.Acceptability, analysis & Shelf-life of cassava Crepe with fish filling	25 - Category A	Prof. Isabel Cabugao (Food Technology)
7.Sensor-Driven Warning Device With Blinker And Sound Alarm	20 - Category A 5 - Category B	Prof. Regie O. Dasig (Automotive Technology)

RUBRICS

Criteria	Description
Category A - Having No Experience	No Background about the Device
Category B - Average Experience	No Background about the Training but having aware of the device
Category C - Less Experience	Never get involved in participating the training

INTERVENTION

Conduct survey visits to the adopted or target beneficiaries/clientele.

Interview and consultation

Needs Assessment

Plan out the proposed activity/budget

Actual Demonstration and Training proper

Evaluation/

(10) Strategies employed (this may include activities to attain the objectives)

Participants profiles will be gathered, and a pre-test will be conducted before the training. On the other hand, a training evaluation and post-test will be given after the training period. Regular monitoring will be conducted after six months to one year thereafter, which will be done via text, call, messenger, or actual visit to the area.

(11) Results (extent of the accomplishment of the objectives) include unintended outcomes whenever available

Activities Conducted Research Product Demo	2022-2023 25 Recipients (After the Training)
1.Multi-processor Photographic Silk-screen Device for production	15 - Category A 4 - Category B 6 - Category C
2.HAND SOAP USING CALAMANSI(citrofortunella microcarpa) and LEMONGRASS (cymbopogon ciatrus)as NATURAL ADDITIVES	15 - Category A 5 - Category B 5 - Category C
3.Traffic Lights System and Control (ET)	18 - Category A 3 - Category B 4 - Category C

Overall result, the Utilization and Product Demo of BIT Faculty Research for Extension projects was indeed a successful part of the community extension project of the BIT program in partnership with the Barangay LGU and participants which also contributed to the improvement of knowledge, awareness of skills, improvement of oneself and somehow become a income generating project of the said Barangay. Still looking forward for the next opportunity and other skills training to be conducted by the BIT Extension program.

(12) Lessons Learned/Insights Gained

The livelihood skill training introduced by the BIT extension program to the said community answered the need towards earning a living. It gave them the opportunity to be more productive and spend their time wisely by engaging in training and applying skills learned. Eventually, changed their lives and perspective.

The training conducted and the product demo resulted in a big impact on the trainees in terms of their outlook in life such as enthusiasm, self-direction, motivation, and encouragement that developed them into better persons with positivity.

The objective was attained that those who were recipients of the training were able to explore their potential with the help and sharing of expertise of the trainers. It was a happy feeling to be of service and a catalyst of change in the lives of others. It cannot be denied that there were some problems however, it was not a hindrance in attaining the objective. A well-planned activity and the support and involvement of everybody made things possible.

This type of extension program to the community assisted and gave encouragement to the different members or groups of people, to disseminate and utilize the result of the research and improve their lives.

(13) Recommendation/s

1. Venturing other possibilities to develop the skills and level up the learned skills by having advanced studies and training in the field of Research which is a challenge to the LGU or concerned agency to provide such opportunity.
2. The BIT extension program supports the vision, mission, and goals of the college. Continuous support for the improvement of oneself and to assist in reaching out to the least privileged individual in the community.
3. There are still need of follow up or to undergo another level of competency wherein the pupils will thoroughly masters or finally adapt the needed skills required for their enhancement activity.
4. Look for the possibility of skills training to be impart and enhance with required amount of budget for the implementation such as Hand soap Making and Acceptability, analysis & Shelf-life of cassava Crepe with fish filling for marketing with the help of LGU and the organization.
5. Other part of Utilization of Research-based Technologies for Extension Initiatives will be part of knowledge and enhancement program for leveling the competency.

(14) Acknowledgments (Include only important persons and institutions involved in funding and conducting the extension activities. Justify paragraphs with main headings in caps.)

To the RDE key officials headed with Engr. Efren L. Linan (Vice President, RDE), Engr. Wennie F. Legario (Vice President for Finance & Administration), Prof. Jocelyn Legaspi (Extension Director), Engr. Gemma B. Angelias (Extension Chair-CapSU Main), BIT Faculty Implementers, Extension Secretary Mary Ann Perez, to the Barangay LGU Key Officials of Brgy. I & Barangay Culajao as partner in the implementation and conduct of the said BIT Extension program and Activity.
