(7) Sector/Commodity	(8) Discipline/Field of Specialization Linguistics
-----------------------------	--

(9) Rationale *(State the research problem and significance of the project to the current needs of the country. The proposal should justify resource expenditure. A typical justification would include a brief introduction, a general statement concerning the historical basis for R & D and, thrusts being addressed, utilization of the expected output and the impact information generated will have on science, the target users and the country.)*

The intricate tapestry of cultural identity often finds its most palpable expression in the culinary traditions of a community. In the Philippine archipelago, each region boasts a distinctive array of flavors and culinary practices, encapsulating its people's historical, social, and cultural nuances.

Capiz, with its mixed Hispanic-influenced precolonial Filipino traditions, is rich in rice-based delicacies or *kakanin* spread all over the municipalities in the province (Biclar et al., 2019). This food is an important heritage, often defined as culinary or gastronomic heritage that constitutes a community's identity (Mercado et al., 2018). Also, it is an important part of one's identity and a way of reflecting how Filipinos value their rich traditions and customs (Liba et al., 2017).

However, the traditional methods and ingredients utilized with this *kakanin* are gradually fading away because of modernization (De Villa et al., 2022) Aside from this, the current generation that should be trying to acquire this particular tradition is already losing interest in inheriting the culinary traditions and recipes due to the modernized ways of living that we are currently experiencing in this day and age (Liba et al., 2017). Thus, investigating the repeated naming patterns in Capiz delicacies serves the larger purpose of preserving and documenting the province's gastronomic heritage.

(9-A) Project Description *(Discuss the project strategy and plan of action of the project. It should also describe the technical procedures and other works needed to carry out the project objectives. The relationship of the project inputs and activities should be explained clearly in this section. Projects similar/related to the proposed project should be mentioned. .)*

The study will investigate the repeated naming patterns attached to this gastronomic heritage of Capiz delicacies in response to the lack of comprehensive linguistic analysis.

(10) Objectives/Statement of the Problem (for Social Sciences) (Statement of the specific purpose to address the problem areas of the project.)

Generally, this study aims to understand the repeated naming patterns attached to the gastronomic heritage of Capiz delicacies.

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
			Revision No.	00
	Document Title:	RESEARCH PROPOSAL	Effective Date	January 26, 2023
			Page	Page 3 of 9

Specifically, this study will seek answers to the following questions:

1. What are the linguistic origins and cultural significances associated with the repetitive naming patterns found in Capiz delicacies?
2. How the historical and socio-cultural factors influenced the evolution and preservation of these naming conventions?
3. What role do these repetitive naming patterns play in preserving Capiz's cultural heritage through its delicacies?

(11) Review of Literature/Prior Art Search (Related researchers/activities that have been conducted. State-of –the-art of current technology / information from which the project proposal will take-off).

The Filipino's indigenous cuisine, his native food before colonization by Spain and the United States, reveals an intimate knowledge of his environment drawn directly from nature - *biyaya ng lupa* - from nature thoroughly explored and imaginatively used (Fernandez, 1986). However, when the Philippine archipelago was attached to the Spanish Empire from 1565 to 1898, native food and drink were exposed to new foreign ingredients, cooking techniques and technologies, tastes and preparations, as well as terms and status indicators (Maria, 2021). Despite these influences, Filipinos learn to adapt by transforming the dish and making it their own. That is indigenization, and in the Philippines, the process starts with a foreign element and ends with a dish that can truly be called part of Philippine cuisine. These indigenized dishes on the Philippine table can first be recognized by their names since these were often borrowed along with the dish. Also, semantic analysis of food names would thus reveal the origin, something of the nature of the change, and further information. (Kirshenblatt-Gimblett et al., 2003).

While the Spanish and Americans contributed much to the Philippines, the pre-Hispanic cultural interactions between China and the Philippines cannot be neglected since they significantly influenced Filipino culture, specifically Filipino cuisine and the language. In the study conducted by Chan Yap (1997), she analyzes the significance of the Hokkien dialect in the pre-Hispanic Filipino language. One hundred sixty-three (163) Hokkien loanwords were identified; out of this, there are 63 words of Hokkien origin directly related to the naming of food or food-related items in the Filipino language. Two rice delicacies that we have in Capiz that have their names repeated are included. These are the “bilu-bilo” – kneaded rice flour used in *ginataan* (bi – ‘rice’, lu ‘sticky’) and “bitso-bitso” – fried cake made of flour (bi – ‘rice’, co – ‘balls’). Thus, Chinese cultural influence upon the cuisine of the Philippines is embedded not only in the food items themselves but also in the language of the Philippines and the daily cultural practices of Filipinos (Lantrip, 2007).

Moreover, in the study of Biclár et al. (2019), two *kakanin* with repeated name patterns were included in mapping out the traditional cuisines, the *inday-inday* and *baye-baye*. *Inday-inday* is derived from the Hiligaynon word *Inday*, which means a young lady. They are usually tasked to prepare the *kakanin*, such as *inday-inday*. This Capiñon *kakanin* is similar to what the Tagalog called *palitaw*, derived from the word

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
			Revision No.	00
	Document Title:	RESEARCH PROPOSAL	Effective Date	January 26, 2023
			Page	Page 4 of 9

litaw, which means “to float.” *Inday-inday* is a kind of goodies made from powdered glutinous rice added with a certain amount of water to make it sticky. It is formed into a thumb-size ball-shape and pressed to flatten. The flattened ball-shaped pressed form is then put into a piece of banana leaf until it reaches the desired number of balls. These are then soaked in boiling water for several minutes and removed from the water once it rises. It is best served paired with a *bukayo* or sweetened strips of coconut milk. Others paired the *inday-inday* with purely brown sugar and sesame seeds. The syllables in *inday-inday* are just repeated because this supposedly increases the prosperity it will bring. On the other hand, *baye-baye* is derived from the Hiligaynon word *Bayi*, which means a woman. Like the “Inday” or young lady, they are also tasked to prepare some goodies for the visitors or on any special occasion. Bayebaye is also made from powdered glutinous rice. The rice is fried until it becomes golden brown and then powdered. It is added with freshly scraped young coconut meat and brown sugar pounded in a *hal-o* and *lusong* (mortar and pestle). There is a shared responsibility in the preparation for baye-baye since the man pounds and the woman protects the food from scattering from the pestle. It is served in a circular form. *Bayi-bayi* is part of the colonial delicacy offered to the gods for abundant harvests and wealth.

Among the reviewed studies, only *inday-inday* was mentioned as to why the syllables are repeated, which needs further investigation and linguistic analysis. Though some of the *kakanin*, like *bilo-bilo* and *bitso-bitso*, are Hokkien loan words, the reasons why the name is repeated are yet to be discovered and understood. The same goes with *butong-butong*, and *sapin-sapin*.

(12) Scientific Basis/Theoretical Framework (Include concepts, theories and variables that indicate relevant relationships to be tested.

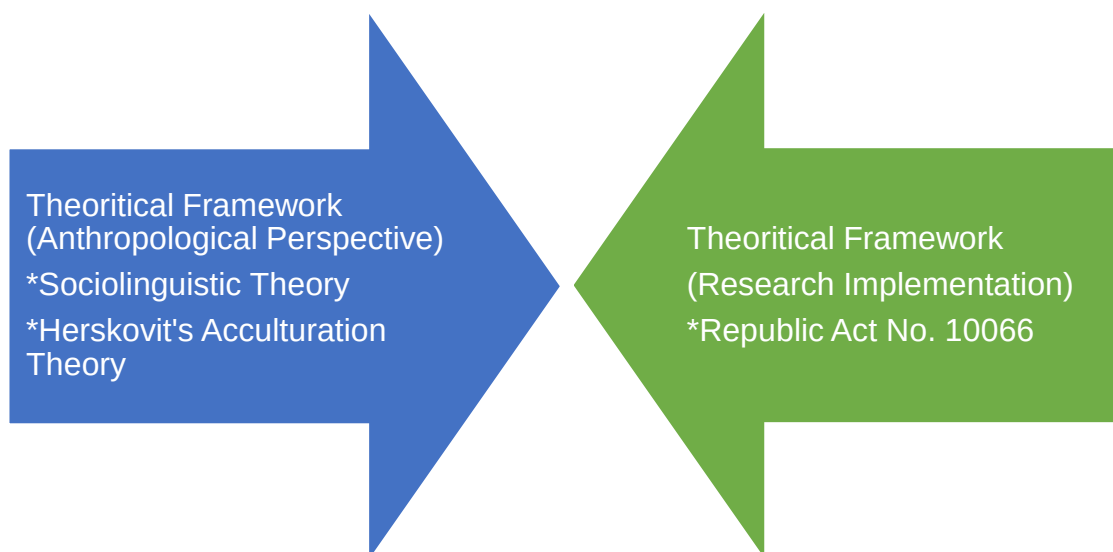

Fig 1. Representation of the research's theoretical framework

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
			Revision No.	00
	Document Title:	RESEARCH PROPOSAL	Effective Date	January 26, 2023
			Page	Page 5 of 9

Figure 1 illustrates the theoretical frameworks that will be utilized in this study, which are categorized into two perspectives: the anthropological viewpoint and the research implementation standpoint. From the anthropological perspective, the researchers identified two theoretical approaches delineating the repeated naming patterns in Capiz delicacies. The first approach involves examining how social, cultural, and historical factors influence the naming patterns, thereby reflecting the linguistic heritage of the community (Sociolinguistic Theory). The second approach draws parallels with the culinary landscape in the Philippines, specifically the naming patterns of food, highlighting the impact of Chinese, Americans, and Spaniards in which cultural interactions shape linguistic expressions in the context of gastronomy (Acculturation Theory). From the research implementation standpoint, these frameworks will be the foundation for collecting and analyzing research findings and data. Additionally, they will be instrumental in formulating recommendations for preserving Capiz's culinary tradition. Drawing on the Republic Act No. 10066 principles, this approach provides a framework for implementing documentation of intangible heritage. Republic Act No. 10066 provides the protection and conservation of the national cultural heritage, strengthening the National Commission for Culture and the Arts (NCCA) and its affiliated cultural agencies and other purposes.

(13) Methodology (Details such as; a) variables to be measured and evaluated; b) treatments to be used and their layout; c) experimental procedures and design; d) statistical analysis; e) evaluation method and observations to be made, strategies for implementation.)

Research Design

The researchers will use a descriptive qualitative research design to understand the repeated naming patterns of Capiz delicacies. It is a common form of qualitative research found in education wherein data are collected through interviews, observations, or document analysis (Meriam et al., 2015).

Participants of the Study

Purposive sampling will be used in selecting the three (3) participants for each municipality in the Province of Capiz based on the predefined criteria and the researcher's judgment through the three (3) generation test of Manuel (1965). It is a sampling technique where the researcher relies on his discretion to choose participants from the study population (Obilor, 2023). Snowball sampling will also be used to trace additional participants or informants. It begins with one or more study participants and then continues on the basis of referrals from those participants. This process continues until you reach the desired sample or a saturation point (Nikolopoulou, 2023). Informants are Culinary Historians, Food Experts in terms of Capiz delicacies, and *Kakanin* Vendors.

Data Gathering Procedure

In the context of this study, the researchers will conduct in-depth interviews with experts who are believed to give reliable information based on anthropological perspectives. Note-taking, video recording, and audio recording will be used during the interview process with the consent of the informants. Also, the researchers will use journals, books, and magazines as secondary sources of information to support the information gathered from the interviews.

A letter to the mayors and a consent form will be secured to observe ethical considerations.

Data Analysis

The data gathered through in-depth interviews and documentation using field notes, audio recordings, and video recordings will be analyzed using the interactive data analysis models from Miles and Huberman. This model has three components: data reduction, display data, and conclusion drawing (verification). The data analysis phase starts after the data is collected. All research data collected were selected and selected (data reduction) on what should be presented and used (data display) (Miles & Huberman, 1994).

(14) Major Activities/Work plan (Enumerate in chronological order the task to be undertaken. Use gantt chart.

Research Objectives	MARCH	APRIL	MAY	JUNE	JULY	AUGUST
Secondary Data Gathering						
Data Collection (In-depth Interviews)						
Data Analysis						

(15) Expected Output (Indicate the specific products, processes or services which the project is expected to produce; quantify when possible)

- Published paper on Scopus index journal
- IEC Material

(16) Technology Transfer Activity Design (Indicate the specific products, activity design, processes or services to be transferred as extension activities)

(17) Target Beneficiaries (Who the clientele are and what are the expected outcome/effects of the use of the projects output)

Individuals and groups with an interest or stake in the cultural, linguistic, and culinary aspects of Capiz.

(18) Personnel Requirement

Name	Role (Program Project, Study Leader)	Field of Specialization
Ronald A. Almanon	Researcher	English
Carl Eduard L. Arroyo	Researcher	English
Rossandrew Villaruel	Study Leader	Applied Linguistic
Leo Andrew B. Bicular	Study Leader	Literature

Percent time devoted to the Program/ Project/ Study
