(9) Rationale (State the research problem and significance of the project to the current needs of the country. The proposal should justify resource expenditure. A typical justification would include a brief introduction, a general statement concerning the historical basis for R & D and, thrusts being addressed, utilization of the expected output and the impact information generated will have on science, the target users and the country.)

Hampuro is a native dialect which means traditional games played by young local folks in Tapaz, Capiz, Philippines.

Traditional games are played across multiple generations, usually using native materials or instruments. However, the revenue of the video games in the Philippines in 2020 was reported to have 300,000,000 significant increases over the previous year. The increase is most likely due to Covid 19 pandemic in which people are confined to their homes and consequently seek alternatives means of entertainment (Statista Research Department, 2021). This fact leads an individual to wonder of what will become of the traditional Filipino games once the pandemic has passed. It is imperative that studies be conducted to discover and develop strategies in order to preserve our cultural heritage especially in the increasingly popular digital games.

Given the issue of traditional Filipino games allegedly having almost vanished from the mainstream of the Philippine society. Young children should be encouraged to play traditional games in order to preserve our cultural heritage. It is in this premise that researchers are guided to delve into the study Hampuro: Reviving the Traditional Games of the Young Local Folks in Tapaz, Capiz, Philippines.

(9-A) Project Description (Discuss the project strategy and plan of action of the project. It should also describe the technical procedures and other works needed to carry out the project objectives. The relationship of the project inputs and activities should be explained clearly in this section. Projects similar/related to the proposed project should be mentioned.)

(10) Objectives/Statement of the Problem (for Social Sciences) (Statement of the specific purpose to address the problem areas of the project.)

The study generally aims to document the hampuro as the traditional games and practices of the local folks. Specifically, the study aims to answer the following questions:

- 1) What are the traditional games practiced by the young local folks in Tapaz, Capiz?

	Document Type:	Document Code	RES- PROP-01
	DOCUMENTED INFORMATION ISO 9001:2015	Revision No.	00
	Document Title:	Effective Date	November 25, 2019
	RESEARCH PROPOSAL	Page	Page 3 of 7

2) How the local folks preserve and conserve the hampuro as part of the traditional knowledge systems?

(11) Scientific Basis/Theoretical Framework (Include concepts, theories and variables that indicate relevant relationships to be tested.

(12) Review of Literature (Related researchers/activities that have been conducted. State-of –the-art of current technology / information from which the project proposal will take-off).

Children in today's generation no longer know how to play Traditional Filipino Games (Booc, 2019). According to statistics, 44.7 million individuals in the Philippines played video games in the year 2020. The revenue of the video games market in the Philippines in 2020 was reported to have 300 million significant increases over the previous year. The increase is most likely due to the COVID-19 pandemic, in which people are confined to their homes and consequently seek alternative means of entertainment (Statista Research Department, 2021). This fact leads an individual to wonder of what will become of the Traditional Filipino Games once the pandemic has passed. It is imperative that studies be conducted to discover and develop strategies in order to preserve our cultural heritage especially in the time of increasingly popular digital games. Given the issue of Traditional Filipino Games allegedly having almost vanished from the mainstream of the Philippine society, the researchers seek to investigate the efforts made by the government and non-governmental organizations in the previous years to encourage Filipino children to play Traditional Filipino Games in order to preserve our cultural heritage, as well as the results of these endeavor through the use of collated data from previous research. Specifically, the study aims to answer the following: (1) What are the concrete efforts made by the government and non-governmental organizations to preserve traditional Filipino games? (2) Do Filipino children still play and understand the mechanics of traditional Filipino games? and (3) Do Filipino children prefer traditional Filipino games or digital games? Why?

Traditional Filipino games or indigenous games in the Philippines are games that have been played across multiple generations, usually using native materials or instruments. In the Philippines, due to limited resources for toys, children usually invent games without needing anything but players. There are different kinds of Philippine Traditional Games that are suited for kids, and the games also stand as one of the different culture and/or traditional games of the Philippines. These games are not only fun to play, but these games are also good for you. This is because different games require different skills. These games are also an important part in Filipino culture.

As time passes, innovation and integration of technology are also done as well as the emergence of digital games. However, a study showed that most children, especially in rural areas, still prefer traditional games over digital games due to their significance as part of the unique Filipino heritage and a tool for sportsmanship and socialization. The rural towns of Ilocos Norte enjoy a continuing practice of street games.

(13) Methodology (Details such as; a) variables to be measured and evaluated; b) treatments to be used and their layout; c) experimental procedures and design; d) statistical analysis; e) evaluation method and observations to be made, strategies for implementation.)

The purpose of this study is to explore on Hampuro: Reviving traditional games of local folks in Tapaz, Capiz, Philippines. It aims to explore the possibility of using traditional games as motivational activities that can aid in their practice teaching and eventually will help learners increase their interest as well as performance in social science. This study will use qualitative research design that aims to gather an in-depth understanding of social science ideas, concepts and practices in Philippine traditional games. The purposively selected respondents of this study will be the selected children in the municipality of Tapaz, Capiz. The respondents will be invited every weekend to play one traditional game, and to observe friendship play during free time. These children will be interviewed using the conversation analysis method wherein the native dialect will be used. This will be tape recorded and the responses related to social science were extracted and triangulated. The study assumed scientific ideas and concepts that is embedded in the pine traditional games and can be used as instructional materials in teaching and learning in Bachelor of Secondary Education major in Social Studies. With the inclusion of these traditional games, learners will become more aware in learning in the said traditional games. An educational material using traditional games will be formulated to be used in teaching tertiary education curriculum. This is to help students understand, appreciate and help revive our traditional games.

(14) Major Activities/Work plan (Enumerate in chronological order the task to be undertaken. Use gantt chart. Below is an example. This can be modified base on your desired Work plan.)

Research Objectives	Year 1					Year 2				
	Oct	Nov	Dec	Jan	Feb	Mar	Apr	June	July	Aug
1. Preparation and presentation of research proposal										
2. Data collection of the existing traditional games in Capiz										
3. Preparation of checklist/questionnaires for intended data to be gathered										
4. Hiring of data entry staff/enumerators										
5. Distribution, gathering of data and collection of checklist/survey questionnaires on identified areas										
6. Recording, analysis and interpretation of the data gathered										

(15) Expected Output (Indicate the specific products, processes or services which the project is expected to produce; quantify when possible)

- Printed and Offline Educational References of Traditional Games

(15) Technology Transfer Activity Design (Indicate the specific products, activity design, processes or services to be transferred as extension activities)

(16) Targets Beneficiaries (Who the clienteles are and what are the expected outcome/effects of the use of the projects output)
