(1) Research Program/Project/Study Title:	
Folklorocity and Choreology of Capiz Festivals	
Proponent Name:	Polansky Pinky A. Barrientos
Academic Rank:	Associate Professor V
Co-Authors (with academic rank):	Emmanuel D. Dayalo Associate Professor V
Campus/Satellite College/Address:	CapSU Roxas City Main Campus
Telephone/Cell Phone/Fax Number:	
E-mail Address:	

Program or Project has component (*if no proceed to 2*)? ☐ Yes ☐ No

(9) Rationale (State the research problem and significance of the project to the current needs of the country. The proposal should justify resource expenditure. A typical justification would include a brief introduction, a general statement concerning the historical basis for R & D and, thrusts being addressed, utilization of the expected output and the impact information generated will have on science, the target users and the country.)

Festivals of Capiz depict the rich, colorful and unique culture of the province and Capizeño people. Behind every celebration and merry making, the events mark and signify stories and tales about the hardship, honoring the divine Persona and success of the people being surmounted despite challenges.

As people tend to express way to celebrate tradition and culture through celebrating festivals in adding social structure of bringing happiness to our lives, passing knowledge and tradition onto the next generation as enhancing and strengthening the development of our society (Corneanu, 2011).

Dance is one of the potent factors in the improvement, promotion, or strengthening of tradition. Traditional dances are dances that still reflect traditions, customs and religious beliefs retained in near pristine form which could offer valuable club in today's search for authentic roots of pre-Hispanic Philippines(Goquinco,1980). There are living dance traditions with unbroken transmissions from dancer to dancer extending back in time hundreds and even thousands of years. Some of these dances are older than spoken language and the advent of writing. These ancient dances are endangered with extinction. Threats to the continued transmission of ancient dance practices include war, political instability, religious fanaticism, diaspora, lack of documentation and survival strategies, lack of public interest, boisterous popularism of pop culture, rampant capitalism, the passing on of masters, uninterested youth, rural drain (The movement of youth from the countryside into the cities), economic hardship, lack of resources, very little historical archiving, poor and improperly formed university curricula, and the lure of quick money to be made by dancing for tourists.

Understanding the beliefs, practices, rituals and performances inhibit by the folks in celebrating such festivals and providing an in-depth and comprehensive literature that could establish general perspective why and how the community continues the practices can be a great significant in preserving and cultivating the culture of Capizeño in the contemporary times. Thus, determining and contextualizing the folkloricity and choreology of festivals in Capiz can intensify appreciation among people and tourists in the province.

(9-A) Project Description (Discuss the project strategy and plan of action of the project. It should also describe the technical procedures and other works needed to carry out the project objectives. The relationship of the project inputs and activities should be explained clearly in this section. Projects similar/related to the proposed project should be mentioned.)

(10) Objectives/Statement of the Problem (for Social Sciences) (Statement of the specific purpose to address the problem areas of the project.)

1. To determine the folkloricity of Capiz festivals and literarily analyze the oral literatures based on the aesthetic elements: character, setting, plot, point of view, theme, tone and mood;
2. To trace the choreology of Capiz festivals according to:
 - a. History/Background,
 - b. Nature /Classification, and
 - c. Music

(11) Review of Literature/Prior Art Search (Related researchers/activities that have been conducted. State-of -the-art of current technology / information from which the project proposal will take-off).

According to UNESCO, cultural heritage does not only include monuments and collections of objects, but also contains traditions or living expressions inherited from our ancestors and passed to our descendants. Folk dances represent part of cultural heritage and their preservation for the next generations appears of major importance. Digitization and visualization of folk dances form an increasingly active research area in computer science. In parallel to the rapidly advancing technologies, new ways for learning folk dances are explored, making the digitization and visualization of assorted folk dances for learning purposes using different equipment possible. Along with challenges and limitations, solutions that can assist the learning process and provide the user with meaningful feedback are proposed. In this paper, an overview of the techniques used for the recording of dance moves is presented. The different ways of visualization and giving the feedback to the user are reviewed as well as ways of performance evaluation (Kico et al, 2018).

(12) Scientific Basis/Theoretical Framework (Include concepts, theories and variables that indicate relevant relationships to be tested.

Ethnochoreology has been developing gradually, expanding both in terms of its area of research and its methods. Several authors have carried out an overview of dance research (Dunin 1981; Sremac 1983; Zebec 1996, 2009a). Research into ethnology and folklore, which represent the boundaries of ethnochoreological study, initially focused on traditional folk dances and comparative studies. As an accepted field of folklore research, ethnochoreology shared a similar course of development aimed at preserving a disappearing folk heritage. Researchers studied music and dances that were on the “path to extinction” and chose their research subjects on the basis of their authenticity.⁴ In this quest for “original” and “authentic” folklore, “new styles” of dance and anything that was not “national” were excluded. Using an empirical approach, research is directed primarily at recording collected data on a given dance and its structure. Dances were systematized according to history, type and function and then arranged by location.

(13) Methodology (Details such as; a) variables to be measured and evaluated; b) treatments to be used and their layout; c) experimental procedures and design; d) statistical analysis; e) evaluation method and observations to be made, strategies for implementation.)

The study used the qualitative research design employing participation action ethnography.

Participation action ethnography is the recording and analysis of a culture or society, usually based on participant-observation and resulting in a written account of a people, place or institution (Coleman & Simpson, 2017). This study adopted descriptive-qualitative research method which according to Myers (1997) is designed for research to understand the people and the social and cultural ethnographic in- depth contexts within they live.

To be able to gather the data needed, the following instruments and tools were used structured Interview, Observations, Video camera Documentation, Still Camera and Recorder. Data for this research were generally gathered mainly through resourcing observation, interviews, recording, documenting, and notation.

The actual dance research was undertaken as follows:

1. Making preliminary arrangements with the local key informants
2. Doing field observations.
3. Interviewing the informants
4. Learning the Dances.

Cultural Mapping Tool Kit as prescribed by the National Commission for the Culture and the Arts will be utilized.

Figure 1. The Cultural Mapping Phases

(14) Major Activities/Work plan (Enumerate in chronological order the task to be undertaken. Use gantt chart.

Research Objectives	Year 1						Year 2					
	July	Aug	Sept	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun
1. Field work/observation												
2. Analysis of data gathered from observation												
3. Lay-outing, Editing and Printing of 100 copies of coffee table book												

(15) Expected Output (Indicate the specific products, processes or services which the project is expected to produce; quantify when possible)

(15) Technology Transfer Activity Design (Indicate the specific products, activity design, processes or services to be transferred as extension activities)

(16) Target Beneficiaries (Who the clienteles are and what are the expected outcome/effects of the use of the projects output)

(17) Personnel Requirement

Name	Role (Program,Project, Study Leader)	Field of Specialization

Percent time devoted to the Program/ Project/ Study

Program/Project Leader (in hours):

Program/Project Members (in hours):

(18) Budgetary Requirement

SOURCES OF EXPENSES	Quantity	Amount (PhP)
A. Personnel Services (For studies needed the Research Assistant, informant/s, guide)		
B. Maintenance and Other Operating Expenses (MOOE) (modify and include only whichever is applicable)		
- Transportation allowance		
- Meal allowance during data gathering		
- Professional fees (laboratory analysis and other related fees)		
- Miscellaneous (for incidental expenses)		
- Printing		
C. CAPITAL OUTLAY		
Total
