(9A) Abstract (This has a maximum of 250 words. It contains 1-2 sentences of rationale, followed by objectives, brief methodology, major findings, and implications of impact of the study.)

(9B) Keywords (Write 3-6 words you used in the study, preferably not found in the title because words in the title are already given keywords. This would also include process, or methodology employed.)

The study was conducted in the Gawad Kalinga Village, Milibili Roxas City as an adopted community of the College of Education-CapSU Roxas City Main Campus during the academic years 2017-2018, 2018-2019, and 2019-2020 to assess the development of the beneficiaries of the extension program through English literacy and values formation. The study used experimental, qualitative – interview and descriptive method of research. Beneficiaries of the extension program were the 42 GK kids known as *Sibol* (ages 4 to 10 years old). The trainers were the students from the different majors and faculty of the College of Education. As to the literacy skills of the GK Sibol kids, results indicated that there was an improvement comparing before and after of the intervention of the extension program. In listening skills, from low (2.60 mean) to high (4.06 mean); speaking skills of the beneficiaries became average (2.77 mean) from a low level (2.31); reading skill improved from low level (2.20) to high (5.15 mean); and, writing skill was greatly improved from low level (2.30 mean) to a very high level (4.31 mea.) Generally, the results revealed that from a low level literacy skills, through the literacy program implementation, it resulted to a high level (3.83 mean) progress among beneficiaries. Generally, results indicated that there was an improvement on the literacy skills measured among participants in the implementation of the extension program. The challenges encountered upon the conduct of the extension were the following: funds, transportation, distance of the school from CapSU, weather, schedule and time, and attendance among participants. Lastly, there are learnings which surfaced throughout the conduct of the program.

Keywords: Extension activity, literacy program, Capiz State University, GK village

(10) Introduction (This includes the rationale, background of the study, and objectives which are not divided by subheadings. Incorporate at least three (3) reviews)

One of the four functions of CapSU is Extension Services which aimed to stimulate development through provision and appropriate assistance to the community and linkages with GOs and NGOs. Community development is effective through active unity, participation, unity, and cooperation among CapSU extension workers and GK Capiz. Both are advocating for the development of social business/entrepreneurship, values formation and literacy program to support the countryside economic growth.

Gawad Kalinga, meaning to 'give care', is a Philippine-based movement that aims to end poverty by first restoring the dignity of the poor. The organization employs an integrated and holistic approach to empowerment, with values-formation and leadership development at its core. *Gawad Kalinga* is building a nation empowered by people with faith and patriotism; a nation made up of caring and sharing communities, dedicated to eradicating poverty and restoring human dignity. Their mission is to end poverty for five million poor families by 2024. The organization was established in 2003, but the work began as early as 1994 in Bagong Silang, the biggest squatters' relocation site in Manila. Since then *Gawad Kalinga* has expanded its work to over 2,000 communities in the Philippines, and to other developing nations like Cambodia, Indonesia, and Papua New Guinea. *Gawad Kalinga* is at the forefront of peace-building work in conflict areas in Mindanao, and reconstruction work in post-disaster communities (Skoll Foundation, 2021).

The Community Extension Program of the College of Education was initiated and organized to the adopted barangay of GK Village, Milibili, Roxas City, Capiz last 2017. Through this program, the college, faculty and students through its various student organizations were given the opportunity to experience learning-beyond-the-classrooms and they served as instruments in enhancing the capabilities of the beneficiaries, parents and community. Thus, it is important to scrutinize whether the GK Community Extension Program of the CoEd achieves its desired goal and to determine its effectiveness to the lives of its beneficiaries.

This study focused on the assessment of the *Gawad Kalinga* Community Extension Program of the College of Education, CapSU Roxas City-Main Campus.

Specifically, it aimed:

1. To determine the level of literacy skills of the target beneficiaries before and after of the community

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- CR-01
	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 3 of 6

extension program.

2. To assess the development of the beneficiaries of the Gawad Kalinga Community Extension Program of the College of Education;
3. To identify the problems encountered during the conduct of the community extension program.
4. To identify the learnings surfaced throughout the conduct of the program; and,

(11) Materials and Methods or Methodology (This includes the materials, methods, duration & location of the study. Materials and Methods are headings used in Natural Science researches and methodology is Social Sciences. Presentation of materials may not necessarily be in separate heading but may be incorporated in the specific methods used. Justify paragraphs with main headings in caps.)

METHODOLOGY. The study used experimental, qualitative – interview and descriptive method of research. Beneficiaries of the extension program were the 42 GK kids known as *Sibol* (ages 4 to 10 years old). The trainers were the students from the different majors and faculty of the College of Education.

After the MOA signing with the adopted community, training needs assessment/diagnostic test was conducted. After identifying the target needs and interest of the beneficiaries, planning followed. Pre-assessment on the pupils' knowledge was done prior to the conduct of the training. After, post-evaluation was conducted. Training evaluation sheet was also used as an instrument. The conduct of interview was also employed.

MATERIALS. Simplified Lesson Guide and Modules on Literacy Skills personally designed by the Gawad Kalinga which includes listening, speaking, reading and writing. They also include such things as awareness of the sounds of language, awareness of print, and the relationship between letters and sounds. Other literacy skills include vocabulary, spelling, and comprehension.

(12) Results and Discussions (This part contains presentation of results (data) with reference to the table and figure, to be followed by discussion, with support of reviewed literature. Sequence shall be based on the objectives of the study. Tables are formatted without the vertical lines. Horizontal lines are set at the top and bottom portions as well as below table headings and above major subdivisions. Justify paragraphs with main headings in caps.)

Literacy Skills of the Target Beneficiaries Before and After of the Community Extension Program

As to the literacy skills of the GK Sibol kids, results indicated that there was an improvement comparing before and after of the intervention of the extension program. In listening skills, from low (2.60 mean) to high (4.06 mean); speaking skills of the beneficiaries became average (2.77 mean) from a low level (2.31); reading skill improved from low level (2.20) to high (5.15 mean); and, writing skill was greatly improved from low level (2.30 mean) to a very high level (4.31 mea.) Generally, the results revealed that from a low level literacy skills, through the literacy program implementation, it resulted to a high level (3.83 mean) progress among beneficiaries.

Results of the study conform with Once et al, (2019), stating that as to the literacy program in the GK Village s revealed that there was an increase in the performance in post-test of the target beneficiaries. Whereas, a slight increase was noted on the area especially in Reading and Writing.

English Literacy Skills	Before		After	
	Mean	Verbal Interpretation	Mean	Verbal Interpretation
Listening	2.60	Low	4.06	High
Speaking	2.31	Low	2.77	Average
Reading	2.20	Low	4.15	High
Writing	2.30	Low	4.31	Very High
Grand Mean	2.35	Low	3.82	High

Development of the beneficiaries of the Gawad Kalinga Community Extension Program of the College of Education

As to the development of the Literacy Skills of the beneficiaries, there were 42 GK kids who were the recipients of the Community Extension Program.

In listening skills, 86% (36) of the GK kids are now on their Proficient Level while 14% (5) are on their Moderately Proficient Level.

In speaking skills, 60% (25) of the GK kids are now on their Proficient Level while the remaining 40% (17) GK kids are on their Average Level of Proficiency.

In reading skills, 90% (38) GK kids are Very High Proficient Level and 10% (4) of them are on their High Proficient Level.

Lastly, writing skills of GK kids revealed that 76% (32) participants are on their High Level of Proficiency while

	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 4 of 6

only 24% (10) GK kids are on Moderately Proficient Level.

Generally, results indicated that there is an improvement on the literacy skills measured among participants in the implementation of the extension program.

Problems encountered during the conduct of the community extension program.

Based on the interview conducted to both the participants, parents and the trainers, the following problems were identified:

- funds (notarization of parental waiver, transportation, materials)
- transportation
- distance of the school from CapSU
- weather
- schedule and time
- attendance among participants

Tapscott (2010) has mentioned three problems that come with community extension programs. First is poor organization. The coordination of some activities proves to be not well organized that the activity fails or there would be logistics problems that would hinder the activity from being a success. Second is the ingratitude to the benefactors. There would be cases where in the people students are helping would complain and have a bad attitude towards the people who are helping them. And lastly, safety issues. The lack of safety precautions makes it problem in doing community services.

Learnings Surfaced Throughout the Conduct of the Program

1. The Gawad Kalinga Community Extension Program of the College of Education, CapSU Roxas City-Main Campus is generally effective in developing the Literacy Skills of the beneficiaries. With the different intervention programs and activities, it led to the positive cooperation among the learners and parents of the community. It improved also their academic and social skills.

2. The pre-service teachers and faculty of the CoEd CapSU Roxas City Main Campus were able to extend knowledge, skills and training to the target beneficiaries. The community extension program has been an avenue for CoEd students to transpire and transcend their learnings and practice their teaching theories and methodologies as part of their training becoming teachers in the field.

3. Parents of the GK sibol kids were able to execute effective participation and cooperation throughout the course of planning, implementing and evaluating the needs and learning of their children.

4. CoEd Extension program holds problems that make it difficult but tolerable for students and faculty trainers as well as to the participants.

(13) Conclusions and Recommendations (This part shall be written in narrative form and arranged based on the objectives and findings. Conclusions are general statements answering the objectives. Recommendations are based on the conclusions. They may be split or combined based on their length, which means, conclusions and recommendations may be split under separate headings if they are long. Justify paragraphs with main headings in caps.)

CONCLUSIONS. Literacy skills of the target beneficiaries evidently improved and developed after of the community extension program implementation of the College of Education of CapSU Roxas City Main Campus. As to the development of the beneficiaries towards their skills proficiency level on listening, speaking, reading, and writing, an increase of number from the GK kids deliberately improved to proficient and highly proficient levels. The challenges encountered upon the conduct of the extension were the following: funds, transportation, distance of the school from CapSU, weather, schedule and time, and attendance among participants. Lastly, there are learnings which surfaced throughout the conduct of the program.

RECOMMENDATIONS. Gawad Kalinga as a community extension program of the CapSU-CoEd maybe strengthened and continued further in all subjects in the academe, all the continuing programs of the college and other adopted communities. Other areas of literacy skills or advance levels maybe considered for the continuity program. The administration may take into consideration the problems encountered during the conduct of the activity and similar studies may be conducted using other variables to further validate the results of the study.

(14) Output (Indicate the specific products, processes or services which the project has produced; quantify when possible.)

The deliverables of the study are modules for learning enhancement for learners and instructional materials in the extension program.
