I. RATIONALE

As mandated by the Commission on Higher Education, the Capiz State University responded to the call for social transformation (RA 7722) through its extension program. The aim is to serve the poorest of the poor, the less privileged, the deprived and the oppressed through livelihood skills training, values formation, and the like.

The Industrial Technology department of CapSU Main extension program promote school-community based extension activity, and how it wished to penetrate more barangays within the city of Roxas, it cannot because lack of information dissemination, awareness campaign and livelihood skills training which gives impact to the community. In answer to this problem, BIT program formulated the a theme refers to ***“Skills, Livelihood Training and Environmental Awareness Campaign”*** in collaboration with College of Education and Graduate Program. The project is intended to equip with information dissemination and livelihood skills especially to least privilege, least fortunate out-of-school youth, Person With Disabilities (PWD) and Person Deprived with Liberty (PDL) Returnee with the adopted Barangay Culajao, city of Roxas.

The tools and equipment to be provided were determined by the Trainer's of CapSU. The fund will be released to the proponent, the Local Government Unit of the Barangay who will undertake and implement the livelihood project. This is also one way of encouraging, promote social transformation, imparting livelihood skills and to participate in the community services.

II. OBJECTIVES OF THE STUDY:

1. Improved skills training and livelihood activity in the utilization of paper waste materials into useful handicraft product to the adopted Barangay.
2. Strengthen Information Dissemination in the in the utilization of paper waste materials into handicraft product to the adopted Barangay on the effect of Climate change.

III. PROJECT DESCRIPTION:

Before the Intervention

The BIT Extension program conducted a Need Assessment activity to the target barangay with the interview and interaction between the Punong Barangay and key officials before the

conduct of livelihood, information dissemination and skills training. There are 10 to 15 participant or trainee were selected by the key officials which recognize as least privilege and low income earner family of the said community or Barangay.

Intervention

The BIT extension coordinator informed and have the assigned task to feedback the result of session meeting of the Barangay key officials to the Extension Chair, BIT program Chair and BIT Faculty members handling skills & information dissemination in terms of waste segregation management and handicraft. The preparation, documentation, training proper, assessment/evaluation and monitoring were implemented to ensure the target outcome of the extension activity.

Approaches/Methodology:

1. Conduct survey visit to the adopted or target beneficiaries/clientele.
2. Interview and consultation
3. Needs Assessment
4. Plan out proposed activity/budget
5. Actual Demonstration and Training proper
6. Evaluation/Assessment
7. Monitoring
8. Impact assessment

Budget Implemented and Duration:

Services	Budget	Duration
Trainer (Skills, Livelihood Training) • Handicraft • Information Dissemination	500/2 days = P3,000 Per Trainer (3)	Activity were implemented in the duration of 1 year round with 6 months Monitoring, Evaluation and 1 year Impact Study
Materials: (Participant) • Assorted • Information dissemination • Tools/Equipment • Modules	P5,000	
Foods (Trainer) • Snacks • Lunch	P2,000 P3,000	
Transportation	P2,000	
Grand Total	P15,000	

IV. SUSTAINABILITY

The commitment of CapSU extension implementers, Punong barangay with the key officials and the strong support of the administration make the program sustainable. The competence of the trainers and the deliberation of the information dissemination is one of the key factor in the success of the program. The selected trainee/participants are very participative and creative. They are encouraged to transfer the technology to their community as well. The program is also evaluated and monitored.

V. PARTNERSHIP

There is a strong collaboration between the Extension Office, the Admin and the Barangay LGU. Strong partnership with the community (where the technology is being transferred) is also evident.

VI. THE IMPACT/RESULTS OF INTERVENTION

The program has impacted the outlook of the trainees/participants and the lives of the community-beneficiaries.

On the part of the trainees/participants:

1. They were excited with the new learning's and skills
2. Their creativity were unleashed
3. They learn how to use, reduce and recycle scrap materials
4. Entrepreneurship were inculcated to them
5. They help in the promotion of CapSU Extension Programs

On the part of the community-beneficiaries:

1. They able to adapt the skills as well as how to be an environmental friendly to the issues concerning global climate change
2. Using their own creativity they were able to enhance/improve their products
3. It ease their boredom; and make themselves productive
4. They are very grateful to CapSU

VII. LESSONS LEARNED

The technology transfer and awareness campaign brought by the intervention of BIT extension program with the collaboration of College of Education and Graduate Program in the said community enhances their perspective towards the global effect brought by climate change and they also able to utilized waste materials especially paper into a useful, decorative and environmental friendly handicraft product.

VIII. CONCLUSIONS

1. The trainees/participants are now equipped with livelihood skills.
2. They also able to understand and value the importance of waste management segregation.
3. The trainees/participants do not only transfer the technology but they themselves use the technology for their self and for environmental consciousness; instead of buying the commercial product, they now produce it
4. The programs meets the psycho-emotional needs of the trainees. Once in a while they were able to forget the issue of pandemic, thus, they were relieved from stress. They felt self-satisfaction as they saw their output.

IX. RECOMMENDATIONS

1. Pursuing to conduct another information dissemination in the said community.
2. In handicraft training, try to venture on local materials and develop products as alternative to plastic bag and Styrofoam.
3. Create other souvenir products using different scrap materials (metal, plastic, cans, etc.)
4. Conduct other livelihood skills training such as food preparation, t-shirt printing, painting, dressmaking, beauty care, etc.
5. Promote IGP
6. Continue monitoring the project
