(9) Rationale

Kimchi, the iconic Korean fermented side dish, has taken the world by storm. But its bold flavors and fiery kick might not suit every palate. This project proposes "Filipino-style Sweet and Spicy Veggie Mixes," a Filipino alternative, aiming to capture the essence of fermentation with a sweeter, milder taste profile tailored to Filipino preferences.

The Philippines already boasts a rich tapestry of fermented dishes like bagoong and patis. However, a widely recognized vegetable counterpart to kimchi remains elusive. Filipino-style Sweet and Spicy Veggie Mixes steps in to fill this gap, not only diversifying Filipino cuisine but also capitalizing on the growing health awareness among Filipinos. Fermented foods offer a potent mix of flavor and probiotic benefits, aiding digestion and potentially boosting overall well-being.

Investing in Filipino-style Sweet and Spicy Veggie Mixes goes beyond satisfying taste buds. Its success could translate into economic opportunities, supporting local farmers and creating new businesses. Moreover, the project delves into the scientific aspects of Filipino fermentation, potentially yielding valuable insights into its health benefits and applications.

Developing the perfect Filipino-style Sweet and Spicy Veggie Mixes recipe is crucial. The project envisions refining it based on consumer feedback, ensuring optimal taste and quality. But ensuring its marketability goes beyond deliciousness. Shelf-life and safety studies will be conducted to guarantee a product that stays fresh and poses no health risks. Understanding consumer preferences is equally important, so sensory evaluation and market research will be conducted to gauge Filipino-style Sweet and Spicy Veggie Mixes 's potential acceptance.

The impact of Filipino-style Sweet and Spicy Veggie Mixes transcends individual enjoyment. It has the potential to enrich Filipino cuisine with a unique fermented offering, promoting Filipino fermentation techniques and ingredients to a wider audience. This, in turn, fosters cultural appreciation and potentially boosts the Philippine economy through job creation and support for local farmers. Ultimately, the project aspires to contribute to scientific knowledge about Filipino fermentation and its potential health benefits.

By investing in Filipino-style Sweet and Spicy Veggie Mixes, we invest in more than just a fermented dish. We invest in enriching Filipino cuisine, promoting cultural appreciation, generating economic opportunities, and advancing scientific knowledge. This sweet and spicy twist on fermentation has the potential to truly benefit Filipinos and its nation.

(9-A) Project Description

The success of Filipino-style Sweet and Spicy Veggie Mixes hinges on a carefully crafted recipe and rigorous testing. The journey begins with initial formulation, meticulously combining locally sourced ingredients like bamboo shoots, papaya, radish, and bell peppers. This base recipe then undergoes sensory evaluation, where target consumers assess taste, texture, aroma, and overall appeal. Feedback fuels refinement, iteratively shaping Filipino-style Sweet and Spicy Veggie Mixes into a crowd-pleaser. Finally, the optimized recipe is meticulously documented, ensuring consistent quality and future replication.

But deliciousness isn't enough. Shelf-life and safety are paramount. Microbiological analysis monitors fermentation, identifying and quantifying beneficial probiotic bacteria while ensuring food safety. Shelf-life testing under various temperatures reveals the ideal storage conditions and consumption timeframe. Additionally, challenge testing with common pathogens safeguards Filipino-style Sweet and Spicy Veggie Mixes 's resistance to spoilage and potential health risks.

Consumer acceptance is the ultimate test. Large-scale sensory evaluation gauges diverse preferences, assessing overall liking, purchase intent, and desired flavor profiles. Market research delves deeper, understanding consumer preferences for fermented foods, pricing sensitivity, and ideal purchase channels.

The project unfolds over a year. The first months focus on recipe development and refinement, followed by shelf-life and safety testing. Consumer acceptance studies and market research take center stage in the latter half, culminating in data analysis, report writing, and project dissemination.

Investing in Filipino-style Sweet and Spicy Veggie Mixes goes beyond ingredients and equipment. Collaborations with sensory booths, consumer panels, and market research resources are crucial. The outputs tell the story: an optimized recipe, shelf-life data, safety reports, consumer acceptance data, market research reports, and a final project report.

Inspiration is drawn from existing research on kimchi fermentation, Filipino fermentation techniques, and consumer preferences for fermented foods in the region. The knowledge gained is then disseminated through scientific publications, industry presentations, educational materials, and outreach programs. Partnering with food producers and entrepreneurs paves the way for Filipino-style Sweet and Spicy Veggie Mixes commercialization journey.

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
			Revision No.	00
	Document Title:	RESEARCH PROPOSAL	Effective Date	January 26, 2023
			Page	Page 3 of 9

By meticulously crafting a delicious, safe, and market-friendly recipe, Filipino-style Sweet and Spicy Veggie Mixes is poised to enrich Filipino cuisine, promote cultural appreciation, and generate economic opportunities. This sweet and spicy Filipino twist on fermentation has the potential to truly benefit Filipinos and their nation.

(10) Objectives/Statement of the Problem (for Social Sciences) (Statement of the specific purpose to address the problem areas of the project.)

This study aims to determine the acceptability of Filipino-style Sweet and Spicy Veggie Mixes. Specifically this study aimed to:

1. Determine the sensory qualities of Filipino-style Sweet and Spicy Veggie Mixes in terms of appearance, aroma, taste, and texture;
2. Determine the general acceptability of Filipino-style Sweet and Spicy Veggie Mixes using the following proportions;
Treatment A 16 grms. bamboo shoot, 16 grms. green papaya, 16 grms. radish, 16 grms. scallion leaves, 16 grms. bell peppers (red and green), 16 grms. mushrooms, 16 grms. kutchay, and 16 grms. carrots;
Treatment B 12 grms. bamboo shoot, 12 grms. green papaya, 12 grms. radish, 12 grms. scallion leaves, 12 grms. bell peppers (red and green), 12 grms. mushrooms, 12 grms. kutchay, and 12 grms. carrots and cucumber and 33 grms. cucumber;
Treatment C 8 grms. bamboo shoot, 8 grms. green papaya, 8 grms. radish, 8 grms. scallion leaves, 8 grms. bell peppers (red and green), 8 grms. mushrooms, 8 grms. kutchay, and 8 grms. carrots and 67 grms. cucumber ;
Treatment D 4 grms. bamboo shoot, 4 grms. green papaya, 4 grms. radish, 4 grms. scallion leaves, 4 grms. bell peppers (red and green), 4 grms. mushrooms, 4 grms. kutchay, 4 grms. carrots and 101 grms. cucumber;
Treatment E 135 grams cucumber; and
3. To determine the significant differences in sensory qualities and general acceptability of Filipino-style Sweet and Spicy Veggie Mixes among the treatments.

(11) Review of Literature/Prior Art Search (Related researchers/activities that have been conducted. State-of –the-art of current technology / information from which the project proposal will take-off).

Some studies like Lee & Baek (2014) delve into the probiotic potential of kimchi, highlighting its positive impact on gut health, immunity, and metabolism. Byun et al. (2012) reinforce this notion, emphasizing kimchi's anti-inflammatory and antioxidant properties, suggesting its potential in preventing chronic diseases. Additionally, Anderson (2019) explores kimchi's cultural significance, showcasing its transformation from a traditional Korean dish to a global phenomenon. This resonates with Lee et al. (2020), who discuss the versatility of kimchi beyond conventional consumption, highlighting its integration into diverse culinary creations. Furthermore, Kwon et al. (2022) offer a unique perspective, employing a life cycle assessment to evaluate the environmental impact of kimchi production in Korea. Their findings shed light on sustainability challenges and opportunities, paving the way for future advancements. Collectively, these studies paint a holistic picture of kimchi. It is not just a delicious and versatile food but also a potential source of health benefits, a cultural touchstone, and a subject of ongoing sustainability efforts. Its adaptability and global appeal position it as a significant player in the culinary landscape, with exciting possibilities for the future.

The Filipino-style Sweet and Spicy Veggie Mixes recipe, in stark contrast to the Korean kimchi disclosed in the prior art by Zhuhai Rude Green Food Co Ltd and invented by Lin Rongqi (Application: CN201610451447A), demonstrates significant disparities in both ingredients and processes. Notably, Filipino-style Sweet and Spicy Veggie Mixes deviates from the traditional Korean kimchi by opting for a vegetable composition that excludes Chinese cabbage and instead incorporates bamboo shoots, green papaya, radish, scallion leaves, bell peppers, mushrooms, kutchay, carrots, and cucumber. In contrast, the Korean kimchi relies heavily on Chinese cabbages, dried anchovies, and rice paste. The seasoning and flavoring agents in Filipino-style Sweet and Spicy Veggie Mixes, including anatto seeds, garlic, ginger, chili flakes, fish sauce, white vinegar, and Muscovado sugar, further differentiate it from the Korean kimchi's use of sauce, dried anchovies, rice paste, and coarse salt. Additionally, the inclusion of Muscovado sugar as a sweetener and ground anatto seeds for color sets Filipino-style Sweet and Spicy Veggie Mixes apart. The disparity continues in the vegetable preparation, marination time, and fermentation process, with Filipino-style Sweet and Spicy Veggie Mixes recommending shorter marination periods and involving a distinct marinade approach. Ultimately, these differences underscore the unique culinary identity of Filipino-style Sweet and Spicy Veggie Mixes, reflecting a Filipino adaptation that showcases diverse flavors, ingredients, and cultural preferences in contrast to the traditional Korean kimchi.

(12) Scientific Basis/Theoretical Framework (Include concepts, theories and variables that indicate relevant relationships to be tested.

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
			Revision No.	00
	Document Title:	RESEARCH PROPOSAL	Effective Date	January 26, 2023
			Page	Page 4 of 9

(13) Methodology (Details such as; a) variables to be measured and evaluated; b) treatments to be used and their layout; c) experimental procedures and design; d) statistical analysis; e) evaluation method and observations to be made, strategies for implementation.)

a) Variables to be Measured and Evaluated:

1. **Dependent Variables (Sensory Qualities):**

- Appearance
- Aroma
- Taste
- Texture

2. **Independent Variable (Treatment Proportions):**

- Treatment A 16 grms. bamboo shoot, 16 grms. green papaya, 16 grms. radish, 16 grms. scallion leaves, 16 grms. bell peppers (red and green), 16 grms. mushrooms, 16 grms. kutchay, and 16 grms. carrots;
- Treatment B 12 grms. bamboo shoot, 12 grms. green papaya, 12 grms. radish, 12 grms. scallion leaves, 12 grms. bell peppers (red and green), 12 grms. mushrooms, 12 grms. kutchay, and 12 grms. carrots and cucumber and 33 grms. cucumber;
- Treatment C 8 grms. bamboo shoot, 8 grms. green papaya, 8 grms. radish, 8 grms. scallion leaves, 8 grms. bell peppers (red and green), 8 grms. mushrooms, 8 grms. kutchay, and 8 grms. carrots and 67 grms. cucumber ;
- Treatment D 4 grms. bamboo shoot, 4 grms. green papaya, 4 grms. radish, 4 grms. scallion leaves, 4 grms. bell peppers (red and green), 4 grms. mushrooms, 4 grms. kutchay, 4 grms. carrots and 101 grms. cucumber;
- Treatment E 135 grams cucumber

b) Treatments and Their Layout:

1. **Preparation of Filipino-style Sweet and Spicy Veggie Mixes:**

- Filipino-style Sweet and Spicy Veggie Mixes will be prepared according to the specified ingredient proportions for each treatment.
- Each treatment will be labeled accordingly.

2. **Randomization:**

- Treatments will be assigned randomly to avoid bias.
- Replicates of each treatment will be created for robust statistical analysis.

c) Experimental Procedures and Design:

1. **Sensory Evaluation:**

- Trained panelists will assess appearance, aroma, taste, and texture using standardized sensory evaluation methods.
- Quantitative data will be collected through a hedonic scale.

2. **General Acceptability Assessment:**

- Participants (consumers) will provide overall acceptability scores for each treatment using a hedonic scale.

d) Statistical Analysis:

1. **Analysis of Variance (ANOVA):**

- To determine significant differences in sensory qualities and overall acceptability among treatments.
- Post-hoc tests (e.g., Tukey's HSD) will be applied for pairwise comparisons.

e) Evaluation Method and Observations:

1. **Sensory Evaluation:**

- Panelists will be trained to assess sensory qualities independently.
- Observations will include descriptive notes on each sensory attribute.

2. **Consumer Acceptability Evaluation:**

- Participants will be provided with evaluation forms and instructed on using hedonic scales.
- Observations will include participants' comments and preferences.

Strategies for Implementation:

1. **Participant Selection:**

- Participants will be recruited based on demographic diversity to ensure a representative sample.

2. **Blinding:**

- Both panelists and participants will be blinded to treatment identities to prevent bias.

3. **Replication:**

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
			Revision No.	00
	Document Title:	RESEARCH PROPOSAL	Effective Date	January 26, 2023
			Page	Page 5 of 9

- Each treatment will be replicated to enhance the study's reliability and validity.
4. **Data Collection:**
- Data on sensory evaluations and general acceptability scores will be systematically recorded.
5. **Data Analysis:**
- Statistical analyses will be conducted using appropriate software (e.g., SPSS).
 - Findings will be interpreted in terms of sensory preferences and overall acceptability.
- By employing these rigorous methodologies, the study aims to provide comprehensive insights into the sensory qualities and general acceptability of Pinoy-style sweet and spicy Filipino-style Sweet and Spicy Veggie Mixes, allowing for informed recommendations and recipe optimization.

(14) Major Activities/Work plan (Enumerate in chronological order the task to be undertaken. Use gantt chart.

Research Objectives	Year 1 2024											
	Jan	Feb	Mar	Apr	May	Jun	July	Aug	Sept	Oct	Nov	Dec
1. Field work/observation												
2. Analysis of data gathered from observation												
3. Lay-outing, Editing and Printing of 100 copies of coffee table book												

(15) Expected Output (Indicate the specific products, processes or services which the project is expected to produce; quantify when possible)

- ✓ The study's quantifiable outcomes will contribute to optimizing the recipe for Pinoy-style sweet and spicy Filipino-style Sweet and Spicy Veggie Mixes, ensuring it aligns with consumer preferences.
- ✓ Insights gained from the study can inform potential commercial production, as the optimal recipe is identified and quantified for market success.

(16) Technology Transfer Activity Design (Indicate the specific products, activity design, processes or services to be transferred as extension activities)

Extension Activities:

- Recipe Optimization Workshops:**
 - Conduct workshops to transfer the optimized Pinoy-style sweet and spicy Filipino-style Sweet and Spicy Veggie Mixes recipe to local chefs, home cooks, and food enthusiasts.
 - Provide hands-on training on preparing Filipino-style Sweet and Spicy Veggie Mixes using the identified optimal proportions from the study.
- Culinary Training Programs:**
 - Develop culinary training programs incorporating the insights from the study to educate aspiring chefs and culinary students on the art of crafting Pinoy-style sweet and spicy Filipino-style Sweet and Spicy Veggie Mixes.

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
			Revision No.	00
	Document Title:	RESEARCH PROPOSAL	Effective Date	January 26, 2023
			Page	Page 6 of 9

- Integrate sensory evaluation techniques to enhance their understanding of flavor profiling.
- 3. **Educational Initiatives:**
 - Collaborate with educational institutions to include Pinoy-style sweet and spicy Filipino-style Sweet and Spicy Veggie Mixes in their culinary arts curriculum.
 - Provide educational materials and resources derived from the study to enhance learning on Filipino fermentation techniques.
- 4. **Community Cooking Classes:**
 - Organize community cooking classes to share the unique recipe variations and preparation techniques identified in the study.
 - Promote cultural appreciation and awareness of Filipino fermented dishes.
- 5. **Promotional Events:**
 - Host promotional events showcasing the different treatments of Pinoy-style sweet and spicy Filipino-style Sweet and Spicy Veggie Mixes.
 - Offer tastings, demonstrations, and educational sessions to create awareness and interest in the local community.
- 6. **Collaborations with Local Food Businesses:**
 - Collaborate with local restaurants and food businesses to incorporate the optimized Filipino-style Sweet and Spicy Veggie Mixes recipe into their menu.
 - Provide support in implementing the recipe and marketing the dish to attract customers.
- 7. **Online Resources and Publications:**
 - Develop online resources, such as recipe guides and video tutorials, to disseminate the optimized Filipino-style Sweet and Spicy Veggie Mixes recipe.
 - Publish articles and research summaries to share the study's findings and the significance of Pinoy-style sweet and spicy Filipino-style Sweet and Spicy Veggie Mixes.

Quantifiable Outcomes:

1. **Number of Participants in Workshops:**
 - Measure the number of participants attending recipe optimization workshops and culinary training programs.
2. **Incorporation into Culinary Curricula:**
 - Track the number of educational institutions incorporating Pinoy-style sweet and spicy Filipino-style Sweet and Spicy Veggie Mixes into their culinary curricula.
3. **Community Engagement:**
 - Assess community participation in cooking classes and promotional events to gauge the impact on cultural awareness.
4. **Business Collaborations:**
 - Measure the number of local businesses adopting the optimized Filipino-style Sweet and Spicy Veggie Mixes recipe and the resulting impact on their menu offerings.
5. **Online Reach and Engagement:**
 - Track the online reach of resources, including downloads, views of video tutorials, and engagement on social media platforms.

By implementing these extension activities, the study's outcomes can be disseminated widely, fostering culinary education, cultural appreciation, and potential economic opportunities within the community.

(17) Target Beneficiaries (Who the clientele are and what are the expected outcome/effects of the use of the projects output)

Clientele and Expected Outcomes:

1. **Consumers and Food Enthusiasts:**
 - **Outcome:** Increased awareness and appreciation of Pinoy-style sweet and spicy Filipino-style Sweet and Spicy Veggie Mixes.
 - **Effects:** Enhanced culinary experiences, introduction of a new and culturally rich dish, and diversified food options for consumers.
2. **Chefs and Culinary Students:**
 - **Outcome:** Access to an optimized Filipino-style Sweet and Spicy Veggie Mixes recipe and culinary insights.
 - **Effects:** Improved culinary skills, integration of Filipino fermentation techniques into their repertoire, and potential inclusion of Filipino-style Sweet and Spicy Veggie Mixes in their professional offerings.
3. **Educational Institutions:**

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
	Document Title:	RESEARCH PROPOSAL	Revision No.	00
			Effective Date	January 26, 2023
			Page	Page 7 of 9

- **Outcome:** Incorporation of Pinoy-style sweet and spicy Filipino-style Sweet and Spicy Veggie Mixes into culinary curricula.
 - **Effects:** Enriched culinary education, exposure to diverse cultural practices, and potential enhancement of students' understanding of fermented foods.
- Local Businesses and Restaurants:**
 - **Outcome:** Adoption of the optimized Filipino-style Sweet and Spicy Veggie Mixes recipe into their menus.
 - **Effects:** Diversification of offerings, potential for increased customer base, and promotion of Filipino culinary identity.
 - Community Members:**
 - **Outcome:** Participation in cooking classes and community events.
 - **Effects:** Strengthened community bonds, increased cultural awareness, and engagement in shared culinary experiences.
 - Online Community:**
 - **Outcome:** Dissemination of Filipino-style Sweet and Spicy Veggie Mixes recipe through online resources.
 - **Effects:** Global awareness of Pinoy-style sweet and spicy Filipino-style Sweet and Spicy Veggie Mixes, potential for cultural exchange, and an online community centered around Filipino culinary traditions.
 - Local Farmers and Suppliers:**
 - **Outcome:** Increased demand for ingredients used in the Filipino-style Sweet and Spicy Veggie Mixes recipe.
 - **Effects:** Economic opportunities for local farmers, support for sustainable agriculture, and potential growth in the supply chain.
 - Researchers and Academia:**
 - **Outcome:** Publication and dissemination of study findings.
 - **Effects:** Contribution to academic knowledge on Filipino fermentation methods, potential for further research, and enrichment of scientific understanding.
 - Tourism and Cultural Promotion Agencies:**
 - **Outcome:** Inclusion of Pinoy-style sweet and spicy Filipino-style Sweet and Spicy Veggie Mixes in cultural promotion efforts.
 - **Effects:** Enhanced cultural tourism, showcasing the diversity of Filipino cuisine, and potential economic benefits from culinary tourism.

The expected outcomes and effects are designed to create a positive impact on various stakeholders, ranging from individuals seeking new culinary experiences to communities, businesses, and cultural institutions aiming to promote and celebrate Filipino food traditions.

(18) Personnel Requirement

Name	Role (Program, Project, Study Leader)	Field of Specialization
Jhonnell J. Abalajon	Lead Author	Hospitality Management
Monalisa G. Odad (Assistant Professor II)	Lead Author	Food Technology
Ginalyn J. Obien (Associate Professor V)	Co-Author	Science and Technology
Roselyn P. Cabantud (Associate Professor III)	Co-Author	Education
Ramy Lloyd L. Lotilla (Associate Professor V)	Co-Author - Statistician	Science, Technology and Mathematics
Analie G. Campos (Professor VI)	Co-Author	Education

Percent time devoted to the Program/ Project/ Study: 100%

Program/Project Leader (in hours): 4 Hours (Per Day)

Program/Project Members (in hours): 2 Hours (Per Day)

(19) Budgetary Requirement

SOURCES OF EXPENSES	Quantity	Amount (PhP)
A. Personnel Services (For studies needed the Research Assistant, informant/s, guide)	2	3, 000.00

jhonnabalajon@gmail.com

Currently working at Capiz State University Sigma Satellite College and a dedicated teacher in the field of Tourism and Hospitality Management. Active and passionate employee. With a proven track record commended having college and an excellent employee, with a passion, companion for the school's success. Committed in helping students identify and develop their own passions and careers while becoming successful and confident hospitality personnel. An active participant in research and development for the future of humankind.

EDUCATION

DOCTOR IN HOSPITALITY MANAGEMENT
Philippine Women's University / Tala Ave., Manila.
Completed Academic Requirements
Doctor in Hospitality Management, Candidate

MASTER OF SCIENCE IN HOTEL AND RESTAURANT MANAGEMENT (MSHRM)
Philippine Women's University / Tala Ave., Manila / 2018

BACHELOR OF SCIENCE IN HOTEL AND RESTAURANT MANAGEMENT
Capiz State University / Sigma, Capiz, Philippines / 2012
• Capiz State University, 2008-2012
• Outstanding School Paper Staff of the Year 2010-2012
• Outstanding Supreme Student Council Senator 2011
• One-Thirty-Two Talent of the Year
• Best Debating Team of the Year
• University Awardee
• Gen. Victor A. Tanon Sr. Excellence Awardee
• Cong. Mark Aaron Sanhar Awardee
• Congresswoman Jane Tan Castro, Excellence Awardee
• Are Excellence Awardee
• Civil Service Awardee

HIGH SCHOOL DIPLOMA
Vicente Avelar Sr. National High School / Publication Sur, Sigma, Capiz, Philippines / 2008

WORK EXPERIENCE

Capiz State University
Oct 2020 - Present
Roman City, Philippines

INSTRUCTOR I
Instructor I, Tourism and Hospitality Management Department
Gender & Development Focal Person
Research Adviser and Panelist
Capiz State University Sigma Satellite College
October 2020 - Present

Researcher
Completed 3 Research entitled:
1. "Impact of Community Extension Programs To Capiz-sigma Faculty & Students"
2. "Perception of the Students Towards the Bachelor of Science in Hospitality Management Department (Home-Based Internship Program of Capiz State University)"
3. Perception of the Students towards the Bachelor of Science in Hospitality Management Department (Home-based Internship Program of Capiz State University)

Subjects taught:
1. Introduction to Meetings, Incentives, Conferences and Exhibitions
2. Accommodation Operations and Management
3. Ergonomics in Tourism and Hospitality Management
4. Hospitality & Tourism Facilities Management & Design

Colégio de San Juan de Letran
Sep 2004 - May 2020
Cebu City, Cebu, Philippines

INSTRUCTOR
Major Key Role & Contributions:
• Library Committee 2019-2020
• Tourism & HRM/IM Research Adviser & Panelist
• Building Course Curriculum
• Preparing Course Syllabi
• Mentoring and Coaching Students
• Create and Prepare Supplementary Materials
• Community Extension Service Moderator 2019-2020
• Research Adviser and Panelist

Subjects taught:
• Applied Business Tools and Technologies for Tourism and Hospitality
• Tourism & Hospitality Management Information Systems
