(9) Rationale (State the research problem and significance of the project to the current needs of the country. The proposal should justify resource expenditure. A typical justification would include a brief introduction, a general statement concerning the historical basis for R & D and, thrusts being addressed, utilization of the expected output and the impact information generated will have on science, the target users and the country.)

The Sangguniang Kabataan (SK) plays a crucial role in youth development in the Philippines. By virtue of Republic Act 10742, the SK was established to allow young Filipinos to participate in nation-building. This Republic Act stipulates various roles and responsibilities of SK officials, such as participating in various affairs of the community, especially those that are focused on youth empowerment and development, such as representing concerns in the barangay council and school board, and initiating programs for youth welfare and wellness.

Despite the various expectations from the SK officials, there is only one mandatory training provided for them. Although they are encouraged to initiate training by partnering with non-governmental organizations and other agencies, this is still subject to the priority programs of the elected officials. Additionally, there is no published literature on training needs assessment conducted among SK officials in the area of study, while Erlina et al. (2023) suggest to conduct trainings for SK in order to capacitate them. Thus, this research is conducted to determine the training needs of the SK officials in the Second Congressional District of Capiz that will identify gaps in terms of their competencies in performing their duties and responsibilities and preferred learning methods in order to develop a needs-based training program that will augment the capacity building of these youth leaders.

(9-A) Project Description (Discuss the project strategy and plan of action of the project. It should also describe the technical procedures and other works needed to carry out the project objectives. The relationship of the project inputs and activities should be explained clearly in this section. Projects similar/related to the proposed project should be mentioned. .)

(10) Objectives/Statement of the Problem (for Social Sciences) (Statement of the specific purpose to address the problem areas of the project.)

Generally, this study aims to assess the training needs of SK Officials from the second congressional district of Capiz.

Specifically, it aims to answer the following questions:

1. What is the respondents' level of core, technical, enabling and leadership competencies?
2. What is the respondents' preferred learning method?
3. Is there a significant difference in the competency levels of the respondents when grouped according to municipality, gender, and educational attainment?
4. Is there a significant relationship on the competency levels and preferred learning method of the respondents?

(11) Review of Literature/Prior Art Search (Related researchers/activities that have been conducted. State-of -the-art of current technology / information from which the project proposal will take-off).

This literature review provides basic information on the roles and responsibilities of SK officials as well as the competencies that these officials should possess. This provides the basis for the conduct of a training needs assessment.

The Republic Act 10742, also known as the "Sangguniang Kabataan Reform Act of 2015," It aims to strengthen the Sangguniang Kabataan (SK) as a meaningful youth

participation body at the barangay level, enhance the skills and knowledge of SK officials through capability-building programs, promote transparency and accountability in SK operations, and increase youth participation in local governance and decision-making. The Sangguniang Kabataan (SK) is a youth council in the Philippines that is mandated to represent the interests of young people in the barangay. The SK is composed of a chairman, a vice chairman, a secretary, a treasurer, and seven members, all of whom are elected by the youth in the barangay. They are responsible for formulating and implementing the barangay youth development plan, initiating and participating in youth development activities, representing the youth in the barangay council, and promoting the welfare of the youth.

The Guidebook on the Competency Framework for SK, LYDO, and SK (2021) presents various competencies that SK officials and local youth development officers should possess in order to effectively perform their duties and responsibilities. As a product of various trainings and workshops conducted by the National Youth Commission with its partner organizations, they were able to derive the list of competencies for SY Official and LYDO, on which they categorize them into core competencies, technical competencies, enabling competencies, and leadership competencies. The core competencies of an SK official are organizational awareness, communicating effectively, commitment to serve the Filipino youth, and adaptability. The technical competencies are attention to detail, influence and impact, information management, research aptitude, problem analysis and resolution, understanding youth development, project execution, program monitoring and evaluation, and technical writing. The enabling and leadership competencies are building partnerships and alliances for youth advocacy, effective decision-making, fostering collaborations and consensus for the youth, planning for results, strategic thinking, coaching and mentoring, embracing change for youth development, functional areas, financial management and budgeting, and policy development. All these competencies are defined and described as basic, intermediate, advanced, and superior.

The Republic Act 10742 further states that SK officials should undergo mandatory training on topics such as leadership, parliamentary procedures, and financial management. This is to equip them with the skills and knowledge they need to effectively serve their constituents.

(12) Scientific Basis/Theoretical Framework (Include concepts, theories and variables that indicate relevant relationships to be tested.

This study is anchored on Dreyfus and Dreyfus Model of Skill Acquisition, developed by Stuart and Hubert Dreyfus in the 1980s. This model describes how learners progress through distinct stages as they acquire a new skill. It focuses on four key mental functions namely recollection, recognition, decision, and awareness. This model further proposes the five stages of skills acquisition namely novice, advance beginner, competent, proficient and expert. These stages present the respective learning styles of individuals belong in the specific stage.

Based on this model, the competencies of the SK Officials can be assessed and determined as to its level which can further provide a picture of their learning style. This can provide an input in their trainings as a main consideration in the development of a training program for them.

(13) Methodology (Details such as; a) variables to be measured and evaluated; b) treatments to be used and their layout; c) experimental procedures and design; d) statistical analysis; e) evaluation method and observations to be made, strategies for implementation.)

This study will utilize the descriptive research method. It will use the survey method to gather data using a researcher-made questionnaire. The data will be gathered during the first quarter of fiscal year 2024. This will be conducted among the 1,603 elected officials of the SK in the municipalities of Sigma, Dao, Cuartero, Dumarao, Dumalag, Mambusao, and Jamindan. A sample population of 311, determined using Cochran's formula, will be the respondents of the study. Furthermore, the respondents will be determined using stratified random sampling in order to ensure representation of participants from the municipalities covered in the study. Ethical considerations will be observed to ensure the welfare of the participants of the study by securing informed consent from the respondents before gathering data, ensuring confidentiality of the gathered data, and keeping the identity of the respondents in the research output for presentation or publication. The gathered data will be coded and processed using SPSS. The descriptive analysis will be done using frequency, percentages, mean, and standard deviation, and the inferential analysis will be done using the Chi-Square test.

(14) Major Activities/Work plan (Enumerate in chronological order the task to be undertaken. Use gantt chart.

Research Objectives	Year 1											
	Jan	Feb	Mar	Apr	May	Jun	July	Aug	Sept	Oct	Nov	Dec
1. Preparation of research proposal												
2. Data Gathering												
2. Data analysis and interpretation												
3. Writing of Research Report and Paper Presentation												

(15) Expected Output (Indicate the specific products, processes or services which the project is expected to produce; quantify when possible)

Needs – Based Training Program for SK Officials

(16) Technology Transfer Activity Design (Indicate the specific products, activity design, processes or services to be transferred as extension activities)

The Needs – Based Training Program for SK Officials will be proposed and implemented in interested municipalities in the second district of Capiz

(17) Target Beneficiaries (Who the clientele are and what are the expected outcome/effects of the use of the projects output)

SK Officials – The SK Officials will be capacitated in performing their duties and

responsibilities

(18) Personnel Requirement

Name	Role (Program, Project, Study Leader)	Field of Specialization
JP Lota Medina	Study Leader	Psychology and Guidance
Crizamae Untayao	Member	Education

Percent time devoted to the Program/ Project/ Study

Program/Project Leader (in hours): 8 hours per week

Program/Project Members (in hours): 5 hours per week

(19) Budgetary Requirement

SOURCES OF EXPENSES	Quantity	Amount (PhP)
A. Personnel Services (For studies needed the Research Assistant, informant/s, guide)		
B. Maintenance and Other Operating Expenses (MOOE) (modify and include only whichever is applicable)		
- Transportation allowance		3,000.00
- Meal allowance during data gathering		3,000.00
- Professional fees (laboratory analysis and other related fees)		
- Miscellaneous (for incidental expenses)		5,000.00
- Printing		5,000.00
C. CAPITAL OUTLAY		
Total		16,000.00
