(9A) Abstract

Students who feel supported by the government especially financially affect their academic performance and how they perceived education. Scholarship grants and financial assistance is a great chance to support their education throughout their years in school and especially during this pandemic. Cash grants to tertiary education students are sought after since pandemic hugely affect the livelihood of most Filipino parents who supports the education of their children.

This study aimed to determine the academic performance of Tertiary Education Subsidy grantees at CapSU Dumarao.

Data revealed that most of the respondents were female, aged 21-23 years old, taking up BS Agriculture and in their 4th year level. When grouped according to sex, male grantees performed better than females. As to age, those grantees with an age group of 18-20 years old, has an outstanding performance among other groups. When grouped as to their course, Bachelor of Elementary Education and Bachelor of Science in Criminology have “Very Good” academic performance while other courses have “Good” performances. As to year level, most of them were in their 4th year level and has a “Very Good” academic performances.

When they were grouped as a whole, their academic performance has a mean of 4.56 described as “Good” academic performance.

(9B) Keywords

Education Subsidy, performance, government financial assistance, grants, pandemic

(10) Introduction

Due to the increasing price of the commodities, utilities and other basic services nowadays, it is hard for a family who's earning below the minimum wage or without regular work to send their children to college. Even the students are academically prepared, still, the first consideration is the cost that they need for college education. Although many college students feel optimistic and think their higher education is a worthwhile future investment, most of them are still concerned if they can study in college or if on how their parents can pay their tuition.

Government focuses its funds to support human capital. Financial assistance in the form of subsidy plays a significant role to alleviate the educational expenses of students enrolled in Higher Educational Institutions (Avery, 2014). To allow the citizens full access to quality education by providing adequate funding and to increase the participation rate in tertiary education, the Universal Access to Quality Tertiary Education Act (RA 10931) was enacted and passed into law on August 3, 2017. This gives preference to the poor but academically proficient and highly motivated students.

Students who feel supported by the government especially financially affect their academic performance. Scholarship grants and financial assistance is a great opportunity to support education throughout the years in school and especially during this COVID-19 pandemic. Cash grants to tertiary education students are sought after since pandemic hugely affect the livelihood of most Filipino parents who supports the education of their children.

As abcampus who has students who availed this financial grants from the government, this research study is pursued to determine the academic performance of Tertiary Education Subsidy (TES) grantees. Among the financial aids and grants of the government under RA 10931, Tertiary Education Subsidy or known as TES has more beneficiaries who availed in Capiz State University specifically in the locale of the study.

To determine the academic performance of Tertiary Education Subsidy (TES) grantees during the pandemic at Capiz State University – Dumarao Satellite College for the academic year 2019 – 2020, it sought to answer the following; 1) What is the socio-demographic profile of the respondents such as age, sex, course, and year level? 2) What is the level of academic performance of Tertiary Education Subsidy (TES) grantees in terms of age, sex, course, and year level and when grouped as a whole?

(11) Materials and Methods or Methodology

Descriptive research design specifically the survey method was employed in this study. Respondents of the study were the 91 selected students from the overall TES Grantees who had availed subsidy in the academic year 2019-2020.

The sample size was determined using Cochran Formula. Stratified Random Sampling was used to get the appropriate number of respondents per course.

The data utilized was the secondary data which is the general weighted average of the respondents for the academic year 2019-2020. Data collected was analyzed using descriptive statistics such as mean, frequency counts, and percentage.

(12) Results and Discussions

Table 1 below shows that there are more females ($n=58$) than males ($n=33$) TES grantees for Academic Year 2019-2020. In terms of age, most of the respondents were in the 21-23 years old age group. Majority of the respondents were from BS Agriculture in their 4th year level and has a very satisfactory academic performance.

Table 1. Socio-Demographic Profile of the Respondents

Socio-Demographic Profile	Frequency	Percentage
SEX		
Male	33	35.2
Female	58	64.8
AGE		
18-20 years old	15	16.48
21-23 years old	58	63.74
24-26 years old	13	14.29
27 years old and above	5	5.49
COURSE		
Doctor of Veterinary Medicine (DVM)	6	6.59
Bachelor of Secondary Education major in Social Studies (BSED Social Studies)	10	10.99
Bachelor of Secondary Education major in Science (BSED Science)	10	10.99
Bachelor of Elementary Education (BEED)	10	10.99
Bachelor of Science in Criminology (BS Crim)	27	29.67
Bachelor of Science in Agriculture (BSA)	28	30.77
YEAR LEVEL		
3RD YEAR	23	25.27
4TH YEAR	68	74.73
GENERAL WEIGHTED AVERAGE		
Highly Outstanding (1.5)	4	4.40
Very Good (1.75)	12	13.19
Good (2.0)	27	29.67
Very Satisfactory (2.25)	33	36.26
Satisfactory (2.5)	13	14.29
Unsatisfactory (2.75)	2	2.20
Passed (3.0)	0	0.00
TOTAL	91	100

Table 2 revealed the academic performance of Tertiary Education Subsidy grantees when grouped according to age, sex, course, and year level. It also shows that the higher the mean score, the lower the performance.

In terms of sex, male grantees have "Very Good" ($m=4.42$) academic performance compared to female ($m=4.55$). Although female grantees are greater in numbers, it can be inferred that male grantees performed better than them.

In terms of age, grantees with 18-20 years old has ($m=3.00$) "Outstanding" academic performance higher among the rest of the age groups. Second to it were the 24-26 years old grantees who has ($m=4.00$) "Very Good" academic performance. While the rest of the age groups displayed "Good" performances during the academic year 2019-2020.

In terms of course, Bachelor of Elementary Education ($m=4.22$) and Bachelor of Science in Criminology ($m=28$) has the same “Very Good” academic performance than the rest of the group. Other courses have “Good” academic performance during the academic year.

In terms of year level, majority of grantees performed excellently during their 4th year with a mean score of 4.43 described as “Very Good” while during their 3rd year, they have “Very Satisfactory” academic performance.

When grouped as a whole, the level of academic performance of the grantees was 4.56 described as “Good” academic performance during the academic year 2019-2020.

Table 2. Level of Academic Performance of the Tertiary Education Subsidy Grantees

Socio-Demographic Profile	N	Mean	SD	Verbal Interpretation
SEX				
Male	33	4.42	.90244	Very Good
Female	58	4.55	1.20193	Good
Total		4.49		Good
AGE				
18-20 years old	15	3.00	1.02722	Outstanding
21-23 years old	58	4.56	1.41421	Good
24-26 years old	13	4.00	.83666	Very Good
27 years old and above	5	5.20	1.09923	Good
Total		4.19		Very Good
COURSE				
Doctor of Veterinary Medicine	6	5.00	1.15470	Good
Bachelor of Secondary Education major in Social Studies	10	4.90	.99443	Good
Bachelor of Secondary Education major in Science	10	4.70	.48305	Good
Bachelor of Elementary Education	10	4.22	1.56347	Very Good
Bachelor of Science in Criminology	27	4.28	.75103	Very Good
Bachelor of Science in Agriculture	28	4.55	1.37805	Good
Total		4.61		Good
YEAR LEVEL				
3RD YEAR	23	5.43	1.27242	Very Satisfactory
4TH YEAR	68	4.43	1.05609	Very Good
Total		4.93		Good

Variables	N	Mean	Verbal Interpretation
When Grouped as a Whole	91	4.56	Good

Scale:

1.00-1.85	Excellent	4.44-5.29	Good
1.86-2.71	Highly Outstanding	5.30-6.15	Very Satisfactory
2.72-3.57	Outstanding	6.16-7.00	Satisfactory
3.58-4.43	Very Good		

(13) Conclusions and Recommendations

Conclusions:

From the aforementioned findings, the following is concluded.

In general, most of the respondents were female, aged 21-23 years old, taking up BS Agriculture and in their 4th year level. It can be concluded that when grouped according to sex, male grantees performed better than females. When grouped according to age, those grantees with an age group of 18-20 years old, has an outstanding performance among other groups. Grantees when grouped as their course, Bachelor of Elementary Education and Bachelor of

Science in Criminology have “Very Good” academic performance while other courses have “Good” performances. While when they are grouped according to year level, most of them were in 4th year level and has a “Very Good” academic performances.

When they were grouped as a whole, their academic performance has a mean of 4.56 described as “Good” performance.

These results infer that grantees from which age, sex, course and year level had performed better during this academic year with the help of the tertiary education subsidy. It further shows that during this academic year 2019-2020, these group of grantees performed well despite that the 2nd semester of this academic year has been suspended due to the increasing cases of COVID 19 in the country. This also means that, if government never cease to provide financial grants especially during COVID 19 pandemic, these performances of the students will be maintained or may also increase, and students will more likely to graduate from college.

Recommendations:

With all the conclusions given, the following recommendation is forwarded.

The Grantees may continue this academic performance level or excel even more to succeed in their academic pursuit. This grants may also give them higher chances to be employed after passing the board examinations and successfully land a good paying job according to their graduated courses.

The Government may continue to support the grantees as it has a positive effect in their performances. They may also expand the program where this subsidy is designed to include more students from this campus so that they will also have a chance to succeed with the help of the government funds. In addition, most of the students enrolled CapSU Dumarao were from indigent or marginalized families from upland to remote areas which needed this kind of financial support from the government may be considered to be included in the grants.

The University may consider conducting more comprehensive researches related to this grants involving the non-Tertiary Education Subsidy students to compare the performances. They may also focus on studying the living experiences of the TES grantees during the pandemic.
