(9) Rationale (State the research problem and significance of the project to the current needs of the country. The proposal should justify resource expenditure. A typical justification would include a brief introduction, a general statement concerning the historical basis for R & D and, thrusts being addressed, utilization of the expected output and the impact information generated will have on science, the target users and the country.)

Nowadays, there is still a person who does not recognize members of the LGBT community with respect. Most of them are not aware of the concepts of or do not understand the concepts. “SOGIE” stands for Sexual Orientation, Gender Identity and Expression it is another reference to describe the Lesbian, Gay, Bisexual, and Transgender LGBT community. The term SOGIE is related to “LGBT-QIA,” “Q” in which stand for *questioning* or *queer*, I is for *intersex* and “A: is for *asexual*. These phrases were developed over the past 30 years or so. These symbolize the wide spectrum of sexuality. SOGIE is a way of recognizing a person’s right to be thru to themselves and not correspond to the biological body (Tan, 2014).

Sexual Orientation is the term used to distinguish how a person attached romantically, sexually or emotionally to another person, desires affection. Lesbians and Gays are homosexual. They are members of both sexes. Transgender is a gender identity. A transgender self-identification is regardless of the assign on the basis of sexual orientation, gender identity, and expression (SOGIE), passed its. Sexual Orientation refers to the direction of emotional sexual attraction or conduct. This can be towards people of the same sex (homosexual orientation) towards people of both sexes (bisexual orientation), or neither towards people of the opposite sex (heterosexual orientation). Gender Identity refers to the personal sense of identity or expression as characterized among others, by the manner of clothing, inclinations, and behavior in relation to masculine or feminine conventions. A person may have a male or female identity with psychological characteristic of the opposite sex. Gender Expression refers to the external manifestation of the cultural traits that enable a person to identify as male or female according to the pattern that, at a particular moment in history, a given society defines as gender appropriate. (Oculto, 2017)

The Human Rights campaign also defines gender identity as the “innermost concepts of self as male, female, a blend of both or neither. It can show what a person was assigned at birth, or be entirely different. There are dozens of genders, outside of just man or woman that people can identify with. This concept is intimately related to the concepts of gender roles, which is defined as the outward manifestations of personality that reflect the gender identity. In nearly all instances, is self-identified, as a result of a combination of inherent and extrinsic or environmental factor; gender role, on the other hand, is manifested within society by observable factors such as behavior and appearance. For example, if a person considers himself a male and is most comfortable referring to his personal gender in masculine terms, then his gender identity is male. However, his gender role is male only if he demonstrates typically male characteristics in behavior, dress, and/or mannerisms. This was talke about how you express yourself and your gender identity. As an LGBTQ member they have different gender roles, another example is if a person considers herself a girl and referring her personal gender in masculine terms her gender identity is lesbian (Heterosexual.)

In 2019, the Republic Act No. 11313 or the Safe Spaces Act was passed to combat sexual harassment as a form of gender-based violence. This latest enactment steps up the campaign to eliminate gender-based violence in the country. Philippine HEIs, as a facility of learning, nurture the consciousness of Filipinos. They are the catalysts for change and justice in the country. The Safe Spaces Act mandates the HEIs to fulfill their duty or shaping the future of the country to become free of gender-based violence in the form of sexual harassment. The law directs the Commission on Higher Education (CHED) to form policies that will protect the rights and welfare of all stakeholders of Higher Education in the country against gender-based sexual harassment.

The Commission on Higher Education pursuant to Section 8 (n) in relation to Section 2 of Republic Act No. 7722 the 20 “Higher Education Act of 1994”, and in accordance with Sections 25 and 33 of Republic Act NO. 11313, otherwise known as the “Safe Spaces Act,” its implementing Rules and Regulations, as well as the Commission en Banc Resolution No. 061-2022 dated 8 February 2022, issued CHED Memorandum Order No. 3 series of 2022, the Guidelines on gender-based sexual harassment in higher education institutions as a response to the call of various sectors in the country to end gender-based violence and to fulfill its mandate and the direction of Safe Spaces Act and the Anti-Secular Harassment Act of 1995, the Commission hereby promulgates these guidelines to assist HEIs in dealing with gender-related sexual harassment and putting an end to the cycle of violence against the dignity of persons.

Capiz State University as one of the Higher Education Institution practicing inclusive education This study will be conducted to address bullying and discrimination in schools that included the basis for sexual orientation and gender identity specifically at Capiz State University, Mambusao Satellite College with an end goal of developing IEC materials and conducting trainings/seminars to help students who were in the state of

gender questioning to better understand their real selves and to create an institution where all students will respected despite their gender-differences.

(9-A) Project Description (Discuss the project strategy and plan of action of the project. It should also describe the technical procedures and other works needed to carry out the project objectives. The relationship of the project inputs and activities should be explained clearly in this section. Projects similar/related to the proposed project should be mentioned. .)

(10) Objectives/Statement of the Problem (for Social Sciences) (Statement of the specific purpose to address the problem areas of the project.)

The study aims to describe the awareness of students on Sexual Orientation, Gender Identity, and Expression. Specifically, it sought to answer the following questions:

1. How may the respondents' profile be described, in terms of
 - 1.1 Age;
 - 1.2 Program;
 - 1.3 Year level; and
 - 1.4 Gender
2. What is the students' awareness on the following:
 - 2.1 Sexual Orientation;
 - 2.2 Gender Identity; and
 - 2.3 Gender Expression
3. Are there significant differences on the respondents' awareness on when grouped according to their profile variables? and
4. What communication materials/trainings and seminars may be produced/conducted to enhance understanding of the respondents?

(11) Review of Literature/Prior Art Search (Related researchers/activities that have been conducted. State-of –the-art of current technology / information from which the project proposal will take-off).

Sexuality is a natural and healthy part of who we are it is not only about taking part in sexual behaviors. It is an integral part of everyone's personality and includes cultural, psychological, ethical, and biological dimensions (Bruess, 2014)

The biological characteristics that distinguish males and females are sex. There are two kinds of sex, primary sex, and secondary sex. It is the primary sex that has the characteristic consist of a vagina or a penis and other organs related to reproduction. Secondary sex characteristics are the physical distinction between males and females that are not directly connected with reproduction. Gender is a social characteristics it consists of whatever behaviors and attitudes a group considers proper for its male and females. Consequently, it varies from one society to another. It also refers to masculinity or femininity. (Henslin, 2010).

Human sexuality is diverse. It tackles on a belief on sex and gender put people in a closet. These beliefs on human sexuality do not reflect on the realities of how gender roles and expressions, sexual attraction, and sexual behavior influence the person views on their own sexuality. Sex is simply the marker recorded in our birth certificates. It may distinguish the biological difference of the people as manifested by a combination of anatomical (our internal reproductive organs), genetic, and hormonal distinctions, as well as other sexual characteristics. The concept of heterosexuality, homosexuality, and bisexuality are inherently problematic when applied to nonverbal species because whatever sex is sexuality seems to imply something more an abstraction representing a theoretical framework. Sexuality is an emergent property of sexual behavior and is applicable only to homosapiens. (Chong, 2016).

A gender difference in emphasizing relational aspects of sexuality is also found among lesbians and gay men. Like heterosexual women, lesbians tend to have less permissive attitudes toward casual sex and sex outside a primary relationship than do gay or heterosexual men. Also, like heterosexual women, lesbians have sex fantasies that are more likely to be personal and romantic than the fantasies of gay or heterosexual men. Lesbians are more likely than gay men to become sexually involved with partners who were first their friends, then lovers. Gay men in committed relationships are more likely than lesbians or heterosexuals to have sex with partners outside their primary relationships (Peplau L. 2015)

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
			Revision No.	00
	Document Title:	RESEARCH PROPOSAL	Effective Date	January 26, 2023
			Page	Page 4 of 10

Gender identity is the inner experience of one's self as male or female; the role is the outward expression of that identity. Gender identity is the personal belief that one is either a male or a female, regardless of assigned male gender at birth, but has gender identity is female. Gender identity, like physical sex, is also not always a straightforward as males who are masculine and females who are feminine. People's sense of gender identity does not always match their external appearance or even the sex chromosomes that determine whether they are male or female. Such people are typically termed transgender.

Gender role stereotype conforms to the polar distinction of masculinity and femininity by rigidly assigning certain oversimplified characteristics to all males and females-based role on their gender (Handy, 2008).

(12) Scientific Basis/Theoretical Framework (Include concepts, theories and variables that indicate relevant relationships to be tested.

This study is anchored on Stryker's Identity Theory where gender socialization and gendered identities are greatly a function of identity salience. To address how this operates a more detailed look at Stryker's work is necessary. Stryker's hierarchical approach to identity seeks to explain how individuals will behave in a situation based on how well identity meanings match the meanings in a situation. Behavior is a function of how salient and committed identities are for actors as they interact with others in the social structure. Identity salience refers to the probability that an identity will be invoked by the self or others in social situations; identity commitment refers to the degree to which actors' relationships to others depend on specific roles and identities. The more committed one is to an identity, the more salient an identity will be. The more salient an identity, the more likely a person will perform roles that are consistent with role expectations associated with the identity, perceive a situation as an opportunity to enact an identity, and seek out situations that provide an opportunity to enact the identity. Identities that are regularly committed to are the identities that are invoked most often across situations.

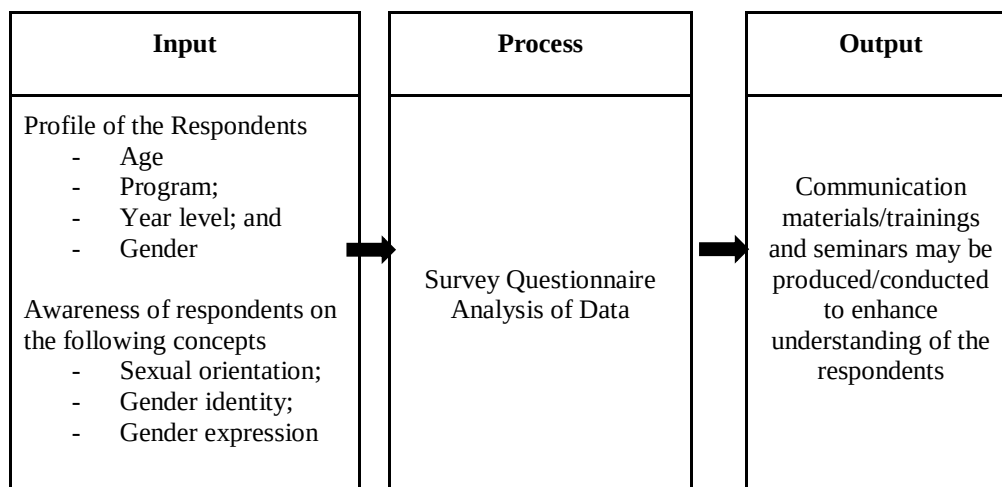

Figure 1. Research Paradigm of the Study

(13) Methodology (Details such as; a) variables to be measured and evaluated; b) treatments to be used and their layout; c) experimental procedures and design; d) statistical analysis; e) evaluation method and observations to be made, strategies for implementation.)

The research will use descriptive type of research with quantitative approach. This method describes systematically a situation or area of interest factually and accurately. Descriptive research is a study designed to depict the participants in an accurate way, more simply, put descriptive research is all about describing people who take part in the study. (Kowalczyk, 2016).

The respondents of the study will be the students of Capiz State University, Mambusao Satellite College enrolled in S.Y 2023-2024. Stratified random sampling will be used. Out of 1037 students of CAPSU-MSC, 281 will be the respondents utilizing Raosoft sample size calculator. A survey questionnaire will be used as the data gathering instrument of the researcher. The survey-questionnaire is composed of two parts. The first part of the questionnaire includes the profile of the respondents. The second part includes the level of awareness of students on sexual orientation, gender identity and expression.

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
	Document Title:	RESEARCH PROPOSAL	Revision No.	00
			Effective Date	January 26, 2023
			Page	Page 5 of 10

Weighted mean, percentage and ranking, and one-way ANOVA will be utilized as statistical tools the data to be gathered will be subjected to statistical analysis using the Statistical Package for Social Sciences (SPSS) software.

(14) Major Activities/Work plan (Enumerate in chronological order the task to be undertaken. Use gantt chart.

Research Objectives	Year 1		Year 2						
	April	May	June	July	August	Sept	Oct	Nov	
1. Gathering and reading materials connected to the study of interest									
2. Writing of proposal									
3. Pilot-testing of instrument									
4. Data gathering and data analysis									
5. Writing the report									
6. Colloquium/defense									

(15) Expected Output (Indicate the specific products, processes or services which the project is expected to produce; quantify when possible)

IEC Material and Proposed Program for students

(16) Technology Transfer Activity Design (Indicate the specific products, activity design, processes or services to be transferred as extension activities)

(17) Target Beneficiaries (Who the clientele are and what are the expected outcome/effects of the use of the projects output)

Students and faculty

QUESTIONNAIRE
(Adopted from Añonuevo, et. al 2018)

Part I. Profile of the Respondents

Direction: Put your answer in the space provided for the information that corresponds to you as respondents. Put check (/) in the blank below.

Name: _____
(Optional)

Age: _____ 15 to 20 years old _____ 21-25 years old
 _____ 26-30 years old _____ 31 and above

Course: _____ BSFT _____ BAEL _____ BSOA _____ BSCS

Year Level: _____ 1st Year _____ 2nd Year _____ 3rd Year 4th Year

Part II.

Direction: this questionnaire is designed to measure the level of awareness of CAPSU-MSC student regarding their sexual orientation, gender identity, and Expression. It is not a test so there is no right or wrong answer. Please indicate your opinion on each by checking (/) the table which corresponds to your choice.

- 4 – Extremely aware
- 3 – Moderately aware
- 2 – Slightly aware
- 1- Not all aware

Sexual Orientation		4	3	2	1
1.	I know that the term sexual orientation can be described where in a person is sexually attracted.				
2.	Sexual Orientation is component of identity that includes a person's sexual and emotional attraction to another person.				
3.	Sex refers to biological differences between men and women. While gender refers to social differences between men and women.				
4.	When women are attracted to men and men are attracted to women, it is called homosexual.				
5.	The term gay and lesbian are generally refers to homosexual while straight persons are heterosexual.				
6.	If women are attracted to women, and men are attracted to men they can be identified as heterosexual.				

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
	Document Title:	RESEARCH PROPOSAL	Revision No.	00
			Effective Date	January 26, 2023
			Page	Page 9 of 10

7.	A person may be called asexual if they are attracted nor have desire to act on attraction to anyone.				
8.	A person may be born homosexual, straight, or bisexual.				
9.	Just lie in other species, male and female homosexuality is natural expression of sexuality in human men/lesbian.				
10.	A person may called pansexual if they are not attracted nor doesn't have desire to act on attraction to anyone.				
Gender Identity					
11.	The term gender identity is our internal sense, what we feel and personal experience of gender.				
12.	Gender identity may be the person's internal and psychological sense of oneself as man and woman, both, in between or neither.				
13.	A person, whose gender corresponds to their assigned sex, can be called as cisgender.				
14.	Transsexual people are the one who have no desire for surgery or hormones from transsexuals.				
15.	Transgender refers to individual who have medically and legally changed their sex.				
16.	A person whose sex assigned at birth is man and identified as man called cisgender man, while a person whose sex assigned at birth is woman and identifies as woman called cisgender woman.				
17.	A person whose sex assigned at birth is man and identified as woman called transgender man, while a person whose sex assigned at birth is woman and identified as man called transgender woman.				
18.	A person's gender identity may not be the same as or different from gender traditionally associated with their biological sex at birth.				
19.	A person who may be processing, questioning, or exploring how they want to express their gender identity is called gender questioning.				
20.	Gender binary is a system of viewing gender as consisting only into two identities and sexes, man and woman or male and female.				
Expression					
21.	Gender expression is how a person outwardly shows their gender identity.				
22.	A person's appropriate, style, dress, or the way they walk or talk may affection on how other people describe them.				

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
	Document Title:	RESEARCH PROPOSAL	Revision No.	00
			Effective Date	January 26, 2023
			Page	Page 10 of 10

23.	A person who was born male and act and dress like a girl may be gay, while a person who was born female, dress up and act like a boy is a lesbian.				
24.	Neither LGBTQIA+ people nor straight can usually be identified by certain mannerisms or physical characteristics.				
25.	Masculine is not having qualities or appearance traditionally associated with men especially strength and aggressiveness.				
26.	Femininity is a set of attributes, behaviors, and roles generally associated with girls and women.				
27.	Androgynous refer to the fact that you seemingly exhibit about equal amount of male and female personality characteristics.				
28.	Cross-dressing refers to wearing clothing of the “opposite” gender.				
29.	Gender neutral is a gender classification where one individual does not feel/belong to neither gender.				
30.	A person who is Gender fluid may always feel more boy some days, and more girl other days.
