(8) **Rationale** (include the situation before intervention)

Recent trends in education in the Philippines pose new challenges in the academe for the improvement of literacy rate among Filipinos in response to one of the challenges of the United Nations Educational, Scientific and Cultural Organization (UNESCO) on Millennium Development Goal (MDG) which is to achieve universal primary education. In fact, the current status in the Philippine education as revealed by the Department of education shows that only 6 out of 10 students who entered grade 1 are able to finish Grade 6, and out of these six (6) elementary graduates, only four (4) are able to finish 4th year high school (Marquez, 2012); and because of their low educational attainment this may result to limited comprehension leading to unemployment. It can only be construed that low educational attainment propagates poverty in the Philippines.

Equalizing opportunities in education is “one of the most important conditions for overcoming social injustice and reducing social disparities in any country ... and is also a condition for strengthening economic growth” (UNESCO, 2008a: 24).

Alternative Learning System (ALS) Accreditation and Equivalency (A&E) program plays an important role in achieving the goal of Education for All (EFA) 2015, which is the “Universal Coverage of Out-of-School Youth and Adults in the provision of Basic Learning Needs”. With the Local Government Unit (LGU), Non-government organization (NGO) participation in this endeavor, ALS will certainly uplift the economic situation of the Filipino people. Madrid (2004) emphasized that youth and adults do not wish to become social burdens. However, some of them are just victims of inevitable circumstances.

ALS aimed to equip its Completers with the necessary skills and knowledge in order to be accepted in tertiary levels. In addition, one necessary skill for ALS Completers to pursue their tertiary education is the proficiency in the English Language.

English is regarded chiefly as a skill, as a tool-subject and as a discipline. In fact, it is the foundation substance of thought and experience upon which the rest of the academic knowledge is built San Miguel, J. Barraquio, D. and Revilla R. (2006). Gibbons (2003) posited that one needs to be proficient in the use of English among non-native speakers has become a large-scale phenomenon. As of current, teachers are faced with the challenge of taking in hand the needs of the growing number of students whose chief language is not English. While mastering other skills and content in other subject areas, there is the necessity for these learners to gain proficiency in English.

During the Academic Year 2018-2019, Capiz State University- Mambusao Satellite College's Bachelor of Arts Department is the only curricular program that caters to the needs to of ALS Completers who wished to pursue their tertiary education. However, it was found out that the completers are having a hard time enrolled in the course especially during the second semester where major subjects are taught.

It is on this premise that this extension program is was conducted to help the ALS Learners in the Municipality of Mambusao enhance their English Language Skills through a continued enhancement program that is aligned to the target goals of ALS.

			Effective Date	
			Page	Page 3 of 15

(9) Project Description, Implementation date/duration, and Objectives

This project was conducted at the three Alternative Learning System (ALS) Centers of Mambusao, Capiz. This initiative responds to the challenge of increasing literacy rates and providing educational opportunities for out-of-school youth and adults, aligning with UNESCO's Millennium Development Goals and the EFA 2015 objectives. The program was implemented from 2018 up to the present which aimed to enhance the English language knowledge and skills focusing on reading, writing, speaking and comprehension of the ALS Learners of Mambusao, Capiz. This was a collaborative project of the Department of Education, Schools Division of Capiz – Alternative Learning System (DepEd-ALS) Mambusao, the Local Government Unit (LGU) of Mambusao, and the Capiz State University – Mambusao Satellite College (CAPSU-MSC).

(10) Strategies employed (this may include activities to attain the objectives)

This program was conducted at the different ALS Centers in the District of Mambusao. Mentoring was conducted every third Friday of the week or depending upon the availability of the ALS Learners. Four instructors/facilitators immersed in the ALS Centers where they will be given 1 1/2 hours to discuss their topics related to English Language Proficiency. The topics are aligned on the DepEd curriculum. To attain the objective of the program, the following activities were conducted.

Activities
PRE-IMPLEMENTATION PHASE
Needs Assessment: Conducted a survey or focus group discussions to identify the specific training needs and preferences of ALS students. MOA Launching & Signing Resource Preparation: Compiled relevant materials, resources, and case studies to support the training sessions. Selection of Facilitators: Identified experienced educators or researchers who can facilitate the training sessions effectively. Training Design: Developed and evaluate training design. Logistics Planning: Arranged logistical details such as venue booking, scheduling, and provision of necessary equipment and materials for the training.
IMPLEMENTATION PHASE
Classes/training Sessions: Conducted interactive classes/training sessions covering various aspects of Communication skills in English. Hands-On Exercises: Provided opportunities for participants to engage in hands-on exercises.

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	
	Document Title:	COMPLETED EXTENSION	Revision No.	00
			Effective Date	
			Page	Page 4 of 15

3. **Catch-up Plan:** Designed a revised catch-up plan for the implementation of the extension project.

4. **Monitoring:** Monitored the delivery of the extension project.

POST- IMPLEMENTATION PHASE

1. **Follow-Up Support:** Offered ongoing support and guidance to participants as they begin their classes.

2. **Peer Feedback Sessions:** Organized peer feedback sessions where participants can present their answers and questions and receive constructive feedback from their teachers/facilitators.

3. **Documentation and Reflection:** Encouraged participants to document their ALS journey, including challenges faced, lessons learned, and outcomes achieved.

4. **Evaluation and Feedback:** Gathered feedback from participants to evaluate the effectiveness of the training program and identify areas for improvement in future iterations.

(11) **Results** (extent of the accomplishment of the objectives) include unintended outcomes whenever available

Profile of the ALS Beneficiaries of *Ilos-kaalam* Program

Year	Male	Female	TOTAL
2018	243	49	292
2019	521	216	734
2020	117	85	202
2021	161	85	246
2022	170	138	308
TOTAL	1231	579	1810

Table 1. Profile of the ALS Beneficiaries of *Ilos-Kaalam* Program

Data shows that the Bachelor of Arts in English Language *Ilos-Kaalam* Program had 292 beneficiaries enrolled in the ALS *Ilos-kaalam* Program in 2018, with 243 being male and 49 being female. In 2019, beneficiaries increased significantly to 734 students, with 521 males and 216 females. Meanwhile, in 2020, due to the COVID-19 pandemic, the number of beneficiaries decreased to 202, with 117 males and 85 females. Despite the pandemic, the extension activity of the BAEL continues; the department provided learning modules for ALS students in 2021, having 246 beneficiaries, with 161 males and 85 females. And in 2022, there is a further increase to 308 beneficiaries, with 170 males and 138 females.

Based on the results, it can be implied that there is a clear gender imbalance among the out-of-school youth in Mambusao, where the majority of them are male. The ALS extension program fluctuated during the COVID-19 pandemic. However, over the five years (2018-2022), it shows that the program has provided educational opportunities to 1,810 ALS students through the *Ilos-Kaalam* Program, with 1,231 being male and 579 being female.

	Document Title:	COMPLETED EXTENSION	Revision No.	00
			Effective Date	
			Page	Page 5 of 15

Activities conducted by the BAEL department under the *Ilos-Kaalam* Program to ALS Students

As the start of the *Ilos-Kaalam* Program in 2018, the Alternative Learning System (ALS) students are one of the main beneficiaries of this program. Its primary aim was to improve the English language skills of the out-of-school youth and prepare them to pass the acceleration examination. During that year, the BAEL department conducted English Language Proficiency classes at different ALS centers in the District of Mambusao. The beneficiaries of this extension activity comprise 292 ALS students.

In 2019, the programs and activities conducted by BAEL focused on enhancing English language proficiency, public speaking, technical writing, and related skills. These programs were conducted at different ALS Learning Centers in the District of Mambusao, and 762 individuals benefited from these training throughout the year. The programs aimed to improve the language and communication skills of the participants. In 2020, activities conducted under the *Ilos-Kaalam* program focused on English language proficiency face-to-face and modular. In November 2020, the department distributed modules anchored on the lessons of the ALS students for their supplementary and additional learning materials that could enhance their English language proficiency. A total of 202 individuals benefited from these activities throughout the year.

Further, in the year 2021, the department conducted both enhancement programs and modular extension activities in various learning centers. A total of 246 individuals benefited from these programs and activities throughout the year. These initiatives aimed to enhance the language and reading skills of the participants, further supporting their educational and personal development. In 2022, BAEL continued to improve the language of ALS learners' communication skills. Specific training programs on technical writing, public speaking, and vocabulary building were also conducted. A total of 308 individuals benefited from these activities. These initiatives aimed to improve various language-related skills.

This simply shows that the Bachelor of Arts in English Language (BAEL) department has consistently committed to enhancing language skills, particularly English proficiency. This commitment is evident in the sustained offering of training programs over multiple years. Based on the data results, it could be implied that the *Ilos-Kaalam* program reflects the diversity of extension activities offered by the BAEL department, including public speaking, technical writing, vocabulary building, and reading skills. This variety of programs varies depending on the training needs of ALS learners, ensuring a comprehensive approach to language and communication skill development.

Levels of satisfaction of the beneficiaries towards the *Ilos-Kaalam* Program

For the University of Wisconsin (2012), extension programs exist within a situation or environment that is often complex and changing. Understanding the situation is the beginning step in designing the educational response. With them, the more we know about the situation, the more solid will be the foundation of our program. In UW-Extension, situational analysis involves analyzing needs and assets, problem diagnosis, and examining relevant research, knowledge, and experience.

	Document Type:	DOCUMENTED INFORMATION		Document Code	
		ISO 9001:2015		Revision No.	00
	Document Title:	COMPLETED EXTENSION		Effective Date	
				Page	Page 6 of 15

According to them, involving others in situational analysis could help to build a better understanding of the context or situation. Surveys on satisfaction ratings are essential in every activity. This will help understand and improve the quality of services, activities, and experiences provided to customers, participants, or stakeholders. In the *Ilos-Kaalam* Program of the BAEL department, all participants in every activity must fill out the evaluation form at the end of the training. As shown in the figures below, different satisfaction ratings were consolidated yearly.

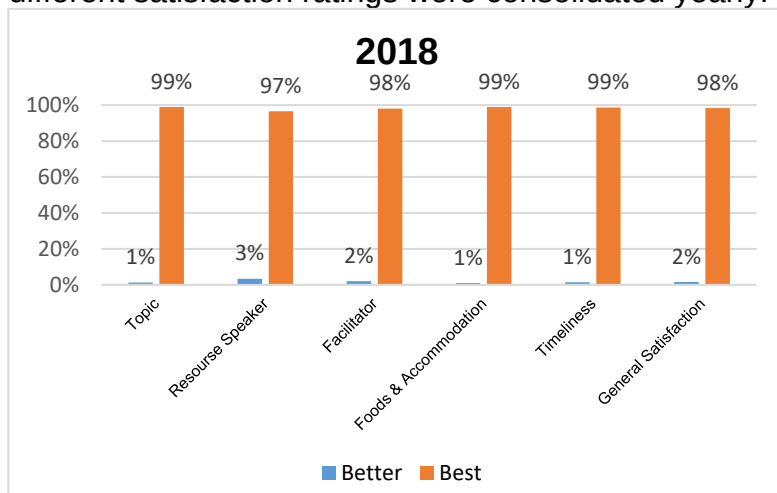

Figure 1. 2018 Satisfaction rating of the ALS beneficiaries

Figure 1 shows that in 2018, only 1% of the beneficiaries rated the program as "Better" regarding the topic covered, while 99% rated it as "Best." It simply shows that the beneficiaries found the topics covered in the program relevant. Further, 3% of the beneficiaries rated the resource speaker as "Better," while 97%

considered them the "Best." This indicates that the participants well-received the resource speaker's expertise and delivery. The facilitators had 2% "Better" and 98% "Best" ratings. On the other hand, 1% rated the foods and accommodation as "Better," while 99% rated them as "Best." For the timeliness, only 1% of the beneficiaries rated it as "Better," while 99% rated it "Best." The general satisfaction rating of the program was high, with 2% of beneficiaries rated it as "Better" and 98% as "Best." This reflects the overall positive experience and perceived value of the *Ilos-Kaalam* Program in 2018.

	Document Type:	DOCUMENTED INFORMATION		Document Code	
		ISO 9001:2015		Revision No.	00
	Document Title:	COMPLETED EXTENSION		Effective Date	
				Page	Page 7 of 15

In 2019 as shown in Figure 2, 1% rated the program's topic as "Better," while 99% rated it as "Best." Three (3%) of the beneficiaries rated the resource speaker as "Better," while 97% considered them the "Best." The facilitators received a 2% "Better" rating and a 98% "Best" rating. One (1%) rated the foods and accommodation as "Better," while 99% rated it as "Best." For timeliness, 2% of the beneficiaries rated it as "Better," while 98% rated it as "Best." The general satisfaction level for the program was high, with 1% of beneficiaries rated it as "Better" and 99% as "Best." This reflects the overall positive experience and perceived value of the Ilos-Kaalam Program in 2019.

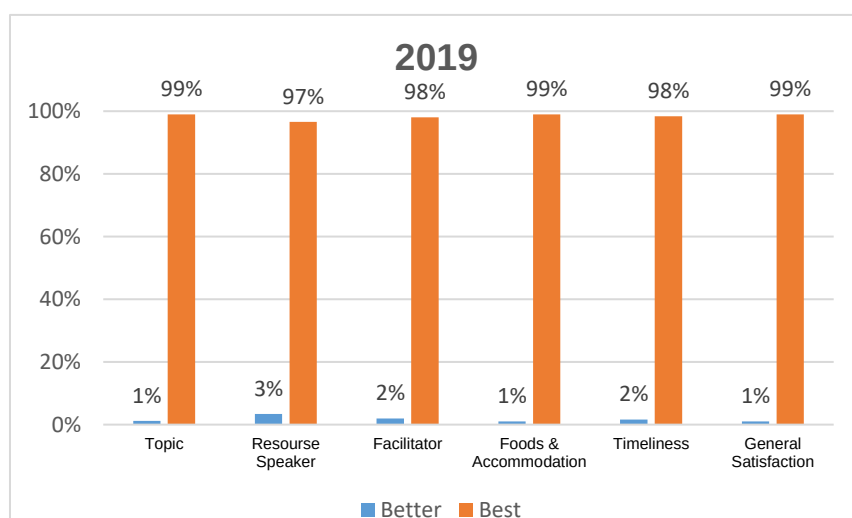

Figure 2. 2019 Satisfaction rating of the ALS beneficiaries

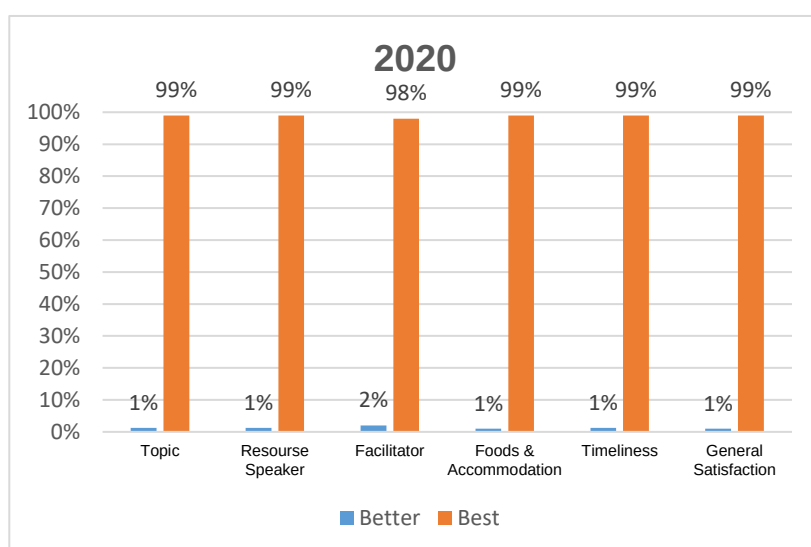

Figure 3. 2020 Satisfaction rating of the ALS beneficiaries

The facilitator received a 2% "Better" rating and a 98% "Best" rating. A 1% rated the foods and accommodation as "Better," while 99% found them "Best." In timeliness, 1% of the beneficiaries rated it as "Better," while 99% rated it as "Best." The general satisfaction rating of the program was high, with just 1% of beneficiaries rated it as "Better" and the rest 99% as "Best." This reflects the overall positive experience and perceived value of the Ilos-Kaalam Program in 2020.

Figure 3 presents the satisfaction rating of the ALS beneficiaries towards the *Ilos-Kaalam* Program. As shown in the figure, 1% of the beneficiaries rated the program's topic as "Better," while 99% rated it as "Best." Only 1% of the beneficiaries rated the resource speaker as "Better," while the majority (99%) considered them "Best." The facilitator received

	Document Type:	DOCUMENTED INFORMATION		Document Code	
		ISO 9001:2015		Revision No.	00
	Document Title:	COMPLETED EXTENSION		Effective Date	
				Page	Page 8 of 15

Figure 4 shows the satisfaction rating in 2021. As shown in the figure, 2% of beneficiaries rated the program's topic as "Better," while 98% rated it as "Best." Only 1% of beneficiaries rated the resource speaker as "Better," while the majority (99%) considered them the "Best." The facilitators received a 1% "Better" rating and a substantial 99% "Best" rating. On the other hand, 2% of the beneficiaries rated the foods and accommodation as "Better," while 98% rated "Best." Regarding timeliness, 2% of beneficiaries rated it as "Better," while 98% rated it as "Best." The general satisfaction rating got a 1% "Better" rating and 99% "Best" rating.

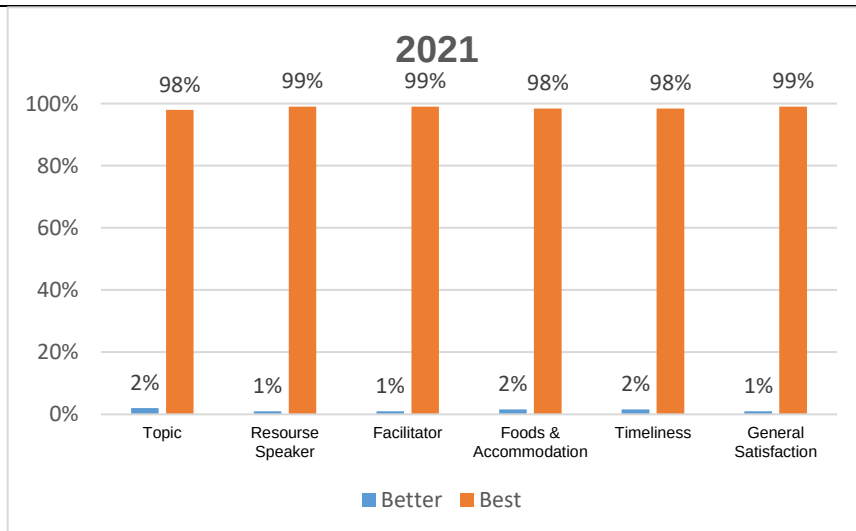

Figure 4. 2021 Satisfaction rating of the ALS beneficiaries

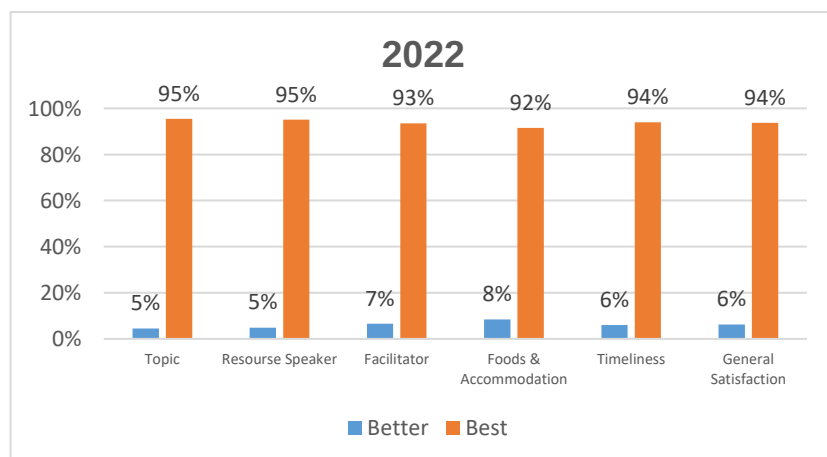

Figure 5. 2022 Satisfaction rating of the ALS beneficiaries

As for the year 2022, as shown in Figure 5, 5% of beneficiaries rated the program's topic as "Better," while 95% rated it as "Best." Regarding the resource speaker, 5% of beneficiaries rated it as "Better," while 95% considered them the "Best." The facilitators had a 7% "Better" rating and a 93% "Best" rating. On the other hand, 8% rated the foods and accommodation as "Better," while 92% found them to be "Best." Regarding timeliness, 6% of beneficiaries rated it as "Better," while 94% found it "Best." The general satisfaction rating for the program in 2022 showed 6% of beneficiaries rated it as "Better" and 94% as "Best." This reflects a high overall satisfaction with the program but with a slightly increased percentage of "Better" ratings compared to previous years.

The data indicate an overwhelmingly high level of satisfaction among beneficiaries participating in the *Ilos-Kaalam* Program for five consecutive years. In 2018, 2019, and 2020, the beneficiaries expressed their highest levels of satisfaction

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	
	Document Title:	COMPLETED EXTENSION	Revision No.	00
			Effective Date	
			Page	Page 9 of 15

across various program extents – encompassing topics covered, resource speakers, facilitators, food and accommodation, timeliness, and overall satisfaction. These ratings, predominantly marked as "Best," affirm the effectiveness of the program and its positive impact on the participants.

Throughout these years, the *Ilos-Kaalam* Program received consistently positive feedback, indicating its effectiveness in meeting the beneficiaries' needs. However, in 2021 and 2022, there was a slight increase in "Better" ratings in some aspects—specifically in facilitating, food, accommodation, and timeliness. Thus, the BAEL department will cope with the improvement of the program. Rennekamp (2009) cited that in an era of accountability, Extension must be able to defend who and how people are being served. It also needs to document that programs are achieving positive results. Taken for granted, programs are excellent and appropriate; Extension is operating in a new environment- an environment more open to criticism and demanding to justify actions. All publicly funded agencies, not Extension, are vulnerable to these times.

(12) Lessons Learned/Insights Gained

Impact of *Ilos-Kaalam* Program to ALS students

Themes	Significant Statement
Personal	1. Gained confidence in expressing themselves. 2. Became Independent in understanding the words read.
Social	1. It helps socialize with other people. 2. Lessons learned were shared with family and the community.
Educational	3. It has improved English Language Proficiency skills, leading to a better chance of passing the A&E exam.

Table 2. Themes and Signification Statements of the Study

Personal impact was the prominent theme. The theme was supported by significant statements that were ferreted from the participant's responses. Results revealed that most ALS beneficiaries gained confidence in expressing themselves. One participant stated, *"When the teacher asked me to deliver my speech in front of my classmates, I felt nervous, but after that experience, now I am okay to speak in front of them."* Another participant added, *"It is okay to speak even in simple English; at least I could express myself to others."* Further, through *Ilos-Kaalam*, the participants became independent in understanding the words read in the selection. As one participant shared, *"I can now read and understand basic words in our books without the guidance of our teacher."* This shows that the *Ilos-Kaalam* program of the BAEL department has been effective in helping participants overcome their fear of speaking, develop their self-confidence in expressing themselves even if they are not fluent in English, and enhance their vocabulary. According to Siti Sukainah & Melor 2014, studying the English language may help students adopt an expanded worldview and foster an optimistic attitude toward life. When individuals recognize that they can converse easily with people speaking the same language, it might boost self-

	Document Type:	DOCUMENTED INFORMATION	
		ISO 9001:2015	
	Document Title:	COMPLETED EXTENSION	
		Document Code	
		Revision No.	00
		Effective Date	
		Page	Page 10 of 15

confidence without worrying about ridicule or intimidation. Offering a haven for language learners to develop and refine their communication abilities is essential.

Moreover, Penis et al. 2023 observed that having English language proficiency has a positive impact on the personality development of the students. According to them, when the students have proficiency in English, they can express themselves clearly and confidently. It even boosts their self-esteem, and is willing to share their capabilities and knowledge with their classmates.

Another theme generated is the social impact supported by significant statements: It helps socialize with other people as one participant stated, *"I can now participate in a simple discussion with my friends who are already in college."* another participant shared that, *"through the public speaking activity, I can now express my ideas."* It shows that the extension activities under the Ilos-Kaalam Program develop meaningful interaction with others. Further, another significant statement stating that Lessons learned were shared with family and community is evident in the study. One participant shared, *"I am trying my best to learn English to help my children, especially in answering their assignments."* This demonstrates a strong connection between the ALS students' effort to learn and its impact on the family and the community.

Educational impact is another theme brought from this program. A significant statement supporting this theme was Improved English Language Proficiency skills, leading to a better chance of passing the Accreditation & Equivalency Test. As one participant stated, *"Because of the Ilos-kaalam (vocabulary enhancement), I could understand directions in the test."* Another participant said, *"I have learned a lot of words that helped me pass the examination."* Further, another participant said, *"Attending extension activity made me feel like I am a college student, so I will study hard to become a college graduate."* This shows that the Ilos-Kaalam program has a positive impact on the success rates of ALS students. As the activities under the Ilos-Kaalam Program are all tailored from the curriculum of DepEd ALS, it can be inferred that this extension activity is one of the instruments in improving the passing rates and overall educational achievement of ALS students in the District of Mambusao. UNICEF (2021), in their study, shows that many learners aspired to finish primary education and decided to enroll in the ALS program because of its flexible schedule, which enables them to attend to work and/or other day-to-day commitments while studying. When they joined ALS, learners who encountered lesson issues were less likely to complete the program.

Moreover, some learners discontinued the ALS program for the same reasons they left formal education: lack of financial support and parental guidance, lack of interest, and vices. Additionally, learners who were not fully prepared for the A&E Test could not take and pass the exam once they completed the ALS program. Learners with jobs were less likely to take and pass the A&E Test than those who did not have jobs. Apao et al. (2014) mentioned in their study that after completion of the program, the ALS passers improved their quality of living by engaging in jobs or entrepreneurial activities that increase financial stability, participating actively in community events and social gatherings, cultivating a positive outlook in life and developing the passion for pursuing higher education. Also, the Philippines' Alternative Learning System A&E program effectively boosts recipients' life skills. The program has improved the

	Document Type:	Document Code	
	DOCUMENTED INFORMATION ISO 9001:2015	Revision No.	00
	Document Title:	Effective Date	
	COMPLETED EXTENSION	Page	Page 11 of 15

respondents' quality of living as they continue pursuing meaning and significance in life.

Implications and measures to be undertaken to enrich further the services being rendered by the Bachelor of Arts in English Language Department

Impact assessment evaluates the extension program's effectiveness in achieving its ultimate objectives and the relative effectiveness of the activities in meeting common ultimate goals. This study is anchored on Judith M. Ottoson's Evaluation Theory (2005), which includes three components: use, program, and value. For the first component, service, this evaluation is intended to be useful for stakeholders to make decisions. Based on the results of this study, it can be implied that the high level of satisfaction and the effectiveness of the *Ilos-Kaalam* Program shows the importance to the ALS learners in the District of Mambusao. Expanding the geographical reach of the program to make it accessible to more ALS students is one way to enhance the extension program; recognizing the differences in learning needs among the ALS students and tailoring the activities of the *Ilos-kaalam* program to the diverse needs of these beneficiaries that will suits on their skill levels and ends will serve as the primary measures of this program. Moralists and Delarierte (2014) stressed that an explanation for the diverse status and learning styles of the learners is the increasing learning competencies, which are the major problems encountered by the implementers as advanced and slow learners are affecting how the interference or cognition abilities to task-related factors such as the complexity of a task or lesson. In addition, the instructional managers should look into the factors contributing to the learning motivation of the ALS learners in involving themselves in school or any instructional program. Alternative Learning System providers should also revisit and review the agenda and balance out the relationship of the learner's ability and appropriateness, complexity, and demands of the tasks given to them, as the relationship of these factors is crucial in bridging the willingness of the learners needed for an achievement outcome (Atilano et al., 2016).

The second component is a program, which seeks to understand what is being evaluated, such as specific aspects of outreach programs. A transparent understanding of how outreach achieves intended goals, its activities and linkages, and the context in which it operates precedes any attempt to measure it. Gleaning at the results of the study, it can be implied that the *Ilos-Kaalam* Program proved effective in addressing the ALS students' personal, educational, and social needs. In this component, the plan of action includes regular assessment and updating of programs of activities that will suit the curriculum of the ALS students—encouraging facilitators and resource speakers to utilize innovative teaching methods and strengthening the emphasis on the personal development of the beneficiaries. Pappas (2013) asserted that in the instruction or the method of teaching, Knowles' four principles of andragogy which are applied in adult learning are: (1) adults need to be involved in the planning and evaluation of their instruction; (2) experience (including mistakes) provides the basis for the learning activities; (3) adults are most interested in learning subjects that have immediate relevance and impact to their job or personal life, and (4) adult learning is problem-centered rather than content-centered. In addition, he underscored the life skills approach of ALS, which is defined as the ability

	Document Type:	Document Code	
	DOCUMENTED INFORMATION ISO 9001:2015	Revision No.	00
	Document Title:	Effective Date	
	COMPLETED EXTENSION	Page	Page 12 of 15

for positive and adaptive behavior that enables individuals to deal effectively with the demands, challenges, experiences, and situations of everyday life. It is the principal teaching-learning methodology of the Alternative Learning System.

The third component of this theory, valuing, is concerned with the process by which value is placed on outreach. As can be seen in the study results, the impact of the *Ilos-kaalam* program highlights its Impact on ALS students. They are collecting success stories and testimonials from ALS beneficiaries who have experienced the positive effects of this program, developing a sustainability plan to ensure the program's long-term value, and expanding partnerships will be the primary plan of action for this component. According to Abasolo (2017), the accomplishment of ALS implementation will depend on the ability to bring partnership to the local level, the provinces, the cities, the municipalities, and the barangays. Cultivation and coordination of partnerships with the private sector, international agencies, national government agencies, LGUs, and other community-based groups involved in mobilizing donations must be done to ensure that these are reliable and associated with the goals of the DepEd.

(13) Recommendation/s

1. Diversify Program Activities: Customize extension activities to suit ALS students' varied learning levels and needs.
2. Pandemic Preparedness: Continue to enhance the program's resilience by developing and maintaining contingency plans for future challenges like the COVID-19 pandemic.
3. Continuous Improvement: Continuous assessment and evaluation of the program's activities. Gather feedback from participants as a basis for improvements, adapting to the changing needs, and maintaining high satisfaction levels.
4. Expand Partnerships and Sustainability: Forge and maintain partnerships, collect success stories, and develop a sustainability plan to ensure the long-term value and success of the Ilos-Kaalam Program.
