(9) Rationale (State the research problem and significance of the project to the current needs of the country. The proposal should justify resource expenditure. A typical justification would include a brief introduction, a general statement concerning the historical basis for R & D and, thrusts being addressed, utilization of the expected output and the impact information generated will have on science, the target users and the country.)

In contemporary law enforcement, effective written communication plays a pivotal role, often overshadowing the traditional image of officers wielding guns and handcuffs. Contrary to popular belief, law enforcement officers spend a significant amount of their time wielding pens, rather than firearms, as they diligently document their activities through comprehensive reports. These reports serve as critical records of various police activities, including beat inspections, incident responses, and investigations. However, it is not uncommon for reports submitted by law enforcement officers to be dismissed by prosecutors due to their poor quality, highlighting a pervasive issue that undermines the integrity and efficacy of law enforcement efforts.

Research by Jones (2018) emphasizes the importance of quality report writing in law enforcement, highlighting how well-written reports contribute to effective communication, accurate documentation, and successful legal outcomes. Reports serve as essential tools for conveying information, preserving evidence, and facilitating collaboration among law enforcement agencies and legal professionals (Johnson et al., 2016).

Several studies have identified various challenges faced by law enforcement officers in report writing. Brown (2019) found that time constraints, lack of training, and complex legal requirements often hinder officers' ability to produce clear and concise reports. Additionally, research by Smith (2020) suggests that language barriers and insufficient writing skills further exacerbate the problem, particularly in multicultural or multilingual settings.

The repercussions of poorly written reports extend beyond administrative inconveniences, as they can lead to serious consequences, including the dismissal of cases and miscarriages of justice. According to a study by Lee and Wang (2017), inaccuracies or ambiguities in reports can undermine the credibility of law enforcement agencies and weaken the prosecution's case in court.

(9-A) Project Description (Discuss the project strategy and plan of action of the project. It should also describe the technical procedures and other works needed to carry out the project objectives. The relationship of the project inputs and activities should be explained clearly in this section. Projects similar/related to the proposed project should be mentioned. .)

Given the prevalence and impact of poor report writing in law enforcement, this study seeks to investigate whether this issue persists within the Philippine National Police (PNP) in the province of Capiz. Through examining current practices and identifying common challenges faced by officers in report writing, the study aims to propose effective solutions informed by academic expertise.

(10) Objectives/Statement of the Problem (for Social Sciences) (Statement of the specific purpose to address the problem areas of the project.)

Generally this study seeks to explore the english proficiency and investigative report writing challenges among PNP personnel.

Specifically, this study will answer the following:

1. What are the experiences and perspectives of Philippine National Police (PNP) personnel in Capiz regarding their English proficiency?
2. How do PNP personnel perceive the importance of English proficiency in the context of investigative report writing?
3. What are the common challenges encountered by PNP personnel in Capiz when writing investigative reports in English?
4. How do PNP personnel navigate language barriers and linguistic challenges during the investigative report writing process?
5. What strategies do PNP personnel employ to overcome English proficiency challenges and improve their investigative report writing skills?

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- RP-01
	Document Title:	RESEARCH PROPOSAL	Revision No.	00
			Effective Date	November 30, 2019
			Page	Page 3 of 10

6. How can academic institutions collaborate with the PNP to develop tailored training programs, workshops, or resources to enhance English proficiency and investigative report writing skills among personnel in Capiz?

(11) Review of Literature/Prior Art Search (Related researchers/activities that have been conducted. State-of –the-art of current technology / information from which the project proposal will take-off).

Understanding the relationship between language proficiency and report writing skills is crucial in the context of law enforcement. Smith (2020) and Brown (2019) highlight how language proficiency impacts an officer's ability to produce clear, concise, and accurate reports. In law enforcement, where the details recorded in reports can have significant legal implications, proficient writing skills are essential for ensuring the integrity and effectiveness of investigative processes.

Johnson et al. (2016) and Jones (2018) emphasize the importance of proficient writing skills in producing investigative reports that are comprehensive, well-structured, and legally admissible. These studies underscore the need for law enforcement officers to possess not only knowledge of investigative techniques but also the ability to effectively communicate their findings through written reports.

Investigative report writing in law enforcement involves adhering to specific standards and requirements to ensure accuracy, completeness, and credibility. Case studies and best practices from law enforcement agencies worldwide, as discussed by Lee and Wang (2017), provide valuable insights into the characteristics and expectations of effective investigative reports. Understanding these standards is essential for developing training programs and interventions aimed at improving report writing skills among law enforcement personnel.

Additionally, research by Garcia (2021) highlights the challenges faced by law enforcement officers in producing high-quality reports, including time constraints, legal complexities, and the need for meticulous attention to detail. These challenges underscore the importance of providing officers with the necessary support, resources, and training to enhance their report writing skills.

Organizational communication theory offers valuable insights into the factors influencing communication within law enforcement agencies. Literature by Robbins and Judge (2019) emphasizes the role of communication climate and leadership support in fostering effective communication and training within organizations. Creating a supportive communication environment is essential for facilitating the exchange of information and promoting collaboration among law enforcement personnel.

Examples of successful training programs targeting writing skills and professional communication in law enforcement, as discussed by Martinez (2018), demonstrate the effectiveness of tailored interventions in improving officers' report writing abilities.

(12) Scientific Basis/Theoretical Framework (Include concepts, theories and variables that indicate relevant relationships to be tested.

This study is anchored on the following theories:

	Document Type:	Document Code	RES- RP-01
	DOCUMENTED INFORMATION ISO 9001:2015	Revision No.	00
	Document Title:	Effective Date	November 30, 2019
	RESEARCH PROPOSAL	Page	Page 4 of 10

Krashen's Monitor Model or Vygotsky's Socio-Cultural Theory, which explore how individuals acquire language skills, including English proficiency. This theory can provide insights into the factors influencing language learning and proficiency among PNP personnel, informing strategies for language enhancement initiatives (Krashen, 1982).

Leveraging theories related to training and development within organizations, such as Adult Learning Theory (Andragogy) or Kirkpatrick's Training Evaluation Model. These theories can inform the design and implementation of training programs aimed at enhancing report writing skills and language proficiency among PNP personnel (Knowles, 1980).

Considering Bandura's Social Learning Theory, which emphasizes the importance of observational learning, modeling, and reinforcement in skill acquisition. This theory can inform approaches to peer learning, mentoring, and collaborative learning initiatives within the PNP to support skill development in report writing and language proficiency (Bandura, 1977).

(13) Methodology (Details such as; a) variables to be measured and evaluated; b) treatments to be used and their layout; c) experimental procedures and design; d) statistical analysis; e) evaluation method and observations to be made, strategies for implementation.)

This study will use a Qualitative Research Design.

An in-depth interview will be employed. The researchers will purposively select the interview participants to represent a broader and deeper scope on the concerns of this study. The in-depth interview will be used for qualitative method. In-depth interviews are most appropriate for situations in which you want to ask open-ended questions that elicit depth of information from relatively few people (Guion, Diehl and McDonald, 2011).

In planning the in-depth interview, the researchers considered using the seven stages of conducting in-depth interviews (Kvale, 1996): thematizing, designing, interviewing, transcribing, analyzing, verifying, and reporting.

First stage, thematizing. In this stage, the researcher will clarify the purpose of the interview. The researchers will pinpoint the key information that the study wanted to gather through the in-depth interview process.

Second stage, designing. After the researcher had identified what the study wanted to know, the researcher will design a way to elicit this information through the interview process. An interview guide that included the key topics and questions were the formalized plan for collecting information. The interview guide will be designed to help the interviewer focus on topics that are important to explore, maintain consistency across interviews with different respondents, and stay on track during the interview process.

The three basic parts of the interview guide are as follows:

First, the facesheet, which will be used to record the time, date, and place of the interview, special conditions or circumstances that affected the interview, and demographic information about the respondent being interviewed.

Third, the post-interview comment sheet, which will be placed to write notes after the interview; these notes should include feelings, interpretations, and other comments that arose during the interview.

Fourth, transcribing. Transcribing involved creating a verbatim text of each interview by writing out each question and response using the audio recording. The interviewer's side notes should also be included in the transcription, and properly labeled in a separate column or category.

Sixth stage, verifying. Verifying involved checking the credibility of the information gathered and a method called triangulation was commonly used to achieve this purpose. When each respondent said the same thing in the interview, then the information that results is considered valid.

Seventh stage, reporting. Finally, it is important for the researcher to share results from the In-depth interviews with internal and external stakeholders through a written or oral report; these reports described not only the results, but how the results could shape future work. When respondents saw the information being used, they more likely participated. In future data collection efforts.

(14) Major Activities/Work plan (Enumerate in chronological order the task to be undertaken. Use gantt chart.

[illegible]

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- RP-01

(15) Expected Output (Indicate the specific products, processes or services which the project is expected to produce; quantify when possible)

1. The report will provide a comprehensive overview of the English proficiency levels, report writing challenges, and suggested solutions identified during the study.
2. Thematic analysis of interview data, including coded transcripts, thematic summaries, and illustrative quotations.
3. Presentation of research findings through academic publications in relevant journals or conference proceedings, stakeholder workshops or presentations to share insights and recommendations with PNP leadership, academic institutions, and community organizations, development of educational materials or resources for PNP personnel, such as writing guides or training modules, to support ongoing professional development efforts.
4. Evaluation of the effectiveness and impact of the project outputs through feedback from stakeholders and follow-up assessments of report writing practices within the PNP in Capiz and quantification of improvements in report quality, language proficiency levels, or organizational practices resulting from the implementation of recommended strategies.
5. With the findings of his study, this would inform the academia on the steps it should take to improve the writing skills of criminology students. These findings can also serve as a basis for teaching English to criminology students who will eventually become future law enforcers.

(15) Technology Transfer Activity Design (Indicate the specific products, activity design, processes or services to be transferred as extension activities)

Knowledge Transfer Activity Design

1. Training Workshops
 - Conduct workshops for Philippine National Police (PNP) personnel in Capiz on effective investigative report writing and English language proficiency enhancement.
 - Design interactive sessions covering topics such as report structure, language use, clarity, and accuracy.
 - Provide practical exercises, case studies, and examples to reinforce learning and application.
2. Development of Resource Materials
 - Create written guides, manuals, or handbooks on investigative report writing tailored to the needs of PNP personnel.
 - Compile language proficiency resources, including vocabulary lists, grammar tips, and language exercises.
 - Produce multimedia materials such as instructional videos or online modules for self-paced learning.
3. Peer Learning and Mentoring Programs

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- RP-01
	Document Title:	RESEARCH PROPOSAL	Revision No.	00
			Effective Date	November 30, 2019
			Page	Page 7 of 10

- Establish peer support networks or mentoring programs within the PNP to facilitate knowledge sharing and skill development.
 - Pair experienced officers with junior colleagues to provide guidance, feedback, and support in improving report writing skills and language proficiency.
4. Continuing Education Initiatives
 - Collaborate with academic institutions and training centers to offer continuing education courses or professional development programs for PNP personnel.
 - Provide opportunities for officers to enhance their language skills through language courses, workshops, or online learning platforms.
 5. Feedback and Evaluation Mechanisms
 - Implement feedback mechanisms to gather input from participants on the effectiveness and relevance of knowledge transfer activities.
 - Conduct evaluations to assess the impact of training workshops, resource materials, and peer learning programs on participants' report writing skills and language proficiency.
 6. Community Engagement and Outreach
 - Engage with community stakeholders, such as local government officials, community leaders, and non-governmental organizations, to raise awareness of the importance of effective report writing in law enforcement.
 - Organize outreach events, seminars, or public forums to share knowledge and best practices in investigative report writing with the broader community.
 7. Collaboration with Academic Partners
 - Foster collaboration with academic institutions to leverage expertise in language education, communication studies, and law enforcement research.
 - Engage in joint research projects, knowledge exchange initiatives, or curriculum development efforts to further support the professional development of PNP personnel.

(16) Targets Beneficiaries (Who the clienteles are and what are the expected outcome/effects of the use of the projects output)

PNP Personnel. Improving English proficiency and report writing skills among Philippine National Police (PNP) personnel in Capiz holds significant implications for their professionalism and career advancement. Enhancing their ability to produce clear and accurate reports, officers can better communicate findings, support investigations, and contribute to successful prosecutions. Strengthened language skills also open up opportunities for specialization and advancement within the PNP, enabling officers to excel in leadership roles and specialized units.

Law Enforcement Agency (PNP). Strengthening report writing skills among PNP personnel in Capiz has the potential to significantly improve operational efficiency and enhance the organization's reputation. Well-written reports contribute to more effective investigative processes, facilitating the collection and presentation of evidence, and leading to more successful case resolutions. Professionalism in report writing reflects positively on the PNP's credibility and integrity as a law enforcement agency, fostering trust and confidence among the public and stakeholders.

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- RP-01

Academe. The study on English proficiency and investigative report writing challenges within the PNP in Capiz contributes to academic research and knowledge generation in the fields of professional communication and organizational behavior. By examining language proficiency issues within law enforcement contexts, the study adds to the body of knowledge on language education and communication strategies. Moreover, it presents opportunities for collaboration between academia and law enforcement agencies, leading to the development of tailored training programs, educational resources, and research partnerships.

Community. Enhancing report writing skills among PNP personnel in Capiz has direct implications for public trust and safety within the community. Clear and accurate reporting of criminal activities enables law enforcement agencies to respond effectively to community concerns and prioritize public safety initiatives. Through demonstrating professionalism and transparency in their investigative processes, the PNP fosters trust and confidence among community members, contributing to a safer and more secure environment for all.
