(1) Extension Program/ Project Title: CELL PROGRAM(Community Education and Leveraging Livelihood)	
Proponent Name:	Ma. Venus B. Lozada
Academic Rank:	Associate Professor IV
Co-Authors (with academic rank):	
Campus/Satellite College/Address:	Burias Campus
Telephone/Cell Phone/Fax Number:	09454752163
E-mail Address:	mvblozada@capsu.edu.ph

(2) Category (please check) ☐ Education and Humanities ☐ Agriculture/Fisheries/Livelihood ☐ Health/Environment ☐ Engineering and Technology
(4) Background (WHAT, WHERE is the proposed project, WHO will benefit, what PRODUCT/SERVICE will address the identified needs/resources. Introduce the product/service that will address the identified needs and resources (general statement). Introduce the target group, organization/community to be served, and the project beneficiaries briefly. Include related literature consistent with the subject – to make the proposal scholarly) CELL (Community Education and Leveraging Livelihood) PROGRAM is a proposed extension program conceptualized by CAPSU Burias Science faculty. CELL PROGRAM will be launched at Sitio Culasi, Brgy. Lonoy, Sapián, Capiz. The beneficiaries will be the residents/community of Sitio Culasi living near the coastal area. Through CELL PROGRAM, community education through training on ecological restoration, environmental protection, livelihood and tourism development will be introduced to the community. Ecological restoration will include activities to assist the recovery of ecosystem structure and function, and the associated provision of goods and services. It will include the provision of other important ecosystem services like ecosystem rehabilitation and conservation. Environmental protection will focus on solving problems arising from the interaction between human and environmental system that includes issues related to conservation, pollution, waste management, land degradation and environmental policy, all of which have created a negative impact on the environment and continue to put humans and animals at risk. Livelihood training will focus on teaching the beneficiaries how to earn a living, thereby improving the quality of their lives through learning different skills and adopting the technology gained from the training. Tourism Development will include creating job opportunities, strengthening the local economy, local infrastructure development, and will help conserve the natural environment and cultural assets and traditions of the locality. At the same time, reducing poverty and inequality among residents.

(5) RATIONALE (WHY should the project be implemented? **WHAT need** is the project trying to address? – how the problem is affecting the targeted beneficiaries, previous efforts done and status, any legal bases and related literature supporting the proposed project, link the relevance of the project to development priorities like mandate and development goals, the comparative advantage to handle the project, and **WHY** act now and not later)

Sitio Culasi is known to be one of the sitios in Brgy. Lonoy with several beach resorts but the place has not been restored after devastation brought by several typhoons. Only a few species of trees and vegetation can be found. It is sad to note that with the vast land areas, the place was not developed fully and or rehabilitated which may pose danger on the lives of residents living near the coastal area especially when flash floods, tides, typhoons, and landslides occur.

Given the mentioned scenario, CELL PROGRAM was conceptualized to assist Sitio Culasi in Brgy. Lonoy, Sapián, Capiz in the recovery and restoration of their locality.

With the presence of several resorts in the area, it is a potential for tourism development. Therefore, launching the CELL PROGRAM is timely and beneficial not only to restore and solve environmental problems but will also create new job opportunities in the area, like nature-based tourism, recreation and businesses based on native plant materials. It will also improve the quality of their lives through livelihood training by learning different skills and adopting the technology gained from the training, hence this proposal was made.

(6) GOALS AND OBJECTIVES (what do you **WANT TO ACHIEVE**? This presents what the proponent hopes to accomplish through the project and what can address the cause of the core problem. Captures changes in people's lives at the societal level – the **IMPACT**. The **BIG PICTURE**.)

CELL PROGRAM will aim to:

1. orient and train the residents of Sitio Culasi on ecological restoration and environmental protection to include solid waste management and recycling activity;
2. improve their standard of living through livelihood education and training and entrepreneurship;
3. develop tourism in the community.

(7) PROJECT DESCRIPTION (what are the **features** of the project process/tools used in the project ID, location, duration, beneficiaries, results chain/framework, project cycle – [*needs/gaps identified, set of solutions noted to address the needs*])

CELL PROGRAM (Community Education and Leveraging Livelihood) is a proposed project conceptualized by CAPSU Burias Science faculty. This will be a three-project components:

Project 1: Community Education

- a. Ecological Restoration
- b. Environmental Protection
- c. Solid Waste Management
- d. Recycling

Project 2: Leveraging Livelihood

- a. Livelihood training (e.g. Product development out of wastes, value addition on seafood products, etc...)
- b. Entrepreneurship Training

Project 3: Tourism Development

This will focus on visitor satisfaction, community development, resource protection, and economic development.

Technology Transfer	2025	2025										
Project Monitoring			2025			2025			2025			2025-2026 up

(9.) SUSTAINABILITY PLAN (All projects have limited time durations. Can the project be supported after its project life? How will the organization sustain the project in terms of dedicated staff? How will the beneficiaries continue to carry out the activities after the project? Is there any financial support required for the project after the project has ended?)

In terms of sustainability, with the collaboration of other agencies and stakeholders, CELL PROGRAM will continue to operate. The campus extension budget through the GAA will also be the source of financial support in cooperation of the LGU of Sapi-an as partner agency. Capability building and training for stakeholders will also be conducted.

(10.) RESOURCE REQUIREMENTS - (a. **Direct Costs** – (Implementing team – manpower (who – names and positions, how many?, Facilities and Equipment needed, Supplies and Materials, Travel, Hauling, Etc) b. **Indirect costs** (rental, electricity, administrative cost 5% to 15%) c. Contingencies (price increases, unforeseen and emergency expenses) 5% of the direct cost, **Budget**)

RESOURCE REQUIREMENTS			
Activities	Materials/Foods	Fuel	Honorarium
Conceptualization and brainstorming	1,000.00	500.00	
Project Proposal Presentation and collaboration with partner agencies	2,500.00	500.00	
TNAS, ocular visit, orientation, and bench marking	10,000.00	2,000.00	
Implementation and Training	50,000.00	10,000.00	10,000.00
Technology Transfer	100,000.00	10,000.00	
Project Monitoring	10,000.00	4,000.00	10,000.00
Subtotal	173,500.00	27,000.00	20,000.00
GRANDTOTAL	P 220,500.00		

(11) Executive Summary (A significant part of the proposal. Summarize the project so that readers can rapidly become acquainted with the problem, background information, implementation scheme, and resource requirements. Intended as an aid to decision-making since it covers all sections, but do not copy and paste and write in the same order as the main document.)
