(4) Background (WHAT, WHERE is the proposed project, **WHO** will benefit, what **PRODUCT/SERVICE** will address the identified needs/resources. Introduce the product/service that will address the identified needs and resources (general statement). Introduce the target group, organization/community to be served, and the project beneficiaries briefly. Include related literature consistent with the subject – to make the proposal scholarly)

The "REACH PROGRAM (Rural Empowerment through Economic Activities among marginalized Community Households.)" is a comprehensive initiative aimed at enhancing the knowledge and skills on business management, specifically in the field of marketing, technical, and financial aspects. The proposed program will focus on providing officers and members under Sustainable Livelihood Program with necessary knowledge and skills in the effective management of their chosen enterprise, including the innovative use of digital marketing and the like. By integrating these knowledge and skills to the target beneficiaries, the program seeks to enhance the lives of marginalized community households by exposing them to economic activities.

The program aims to enhance the knowledge and skills of beneficiaries on business management in terms of marketing, technical and financial aspects.

The target group for this program are associations in the Municipalities of Dao, Sigma, Mambusao and Sapián. Each association will have an assigned Faculty Project Leader to assure

its sustainability. The program will collaborate with Department of Social Welfare Development Office and Local Government Unit to implement and sustain the training program.

The primary beneficiaries of this program are officers and members of the different associations, as they will receive training and support to effectively manage their chosen enterprise.

The product or service offered by the program is a comprehensive training program for intended beneficiaries. This program will include training workshops, technology transfer and skills development.

(5) RATIONALE (WHY should the project be implemented? **WHAT need** is the project trying to address? – how the problem is affecting the targeted beneficiaries, previous efforts done and status, any legal bases and related literature supporting the proposed project, link the relevance of the project to development priorities like mandate and development goals, the comparative advantage to handle the project, and **WHY** act now and not later)

The Sustainable Livelihood Program, also known as SLP, is a community-based program, which provides capacity building to improve the program participants' socio-economic status. As a component of the Convergence Strategy, the program aims to serve the beneficiaries of the Pantawid Pamilya, hoping to sustain and expand beyond the five-year intervention the socio-economic benefits gained.

Prior to being called SLP, the Department of Social Welfare and Development already implements the Self-Employment Assistance Kaunlaran (SEA-K) Program. It is one of the core social protection programs geared to combat poverty. The SEA-K Program is an investment in building social capital at the community level in order to increase the access of marginalized households to financial services. It has the goal of establishing community-based, self-managed and sustainable credit facilities to enable the economically active poor to have continued access to credit.

The Sustainable Livelihood Program under DSWD recognizes the need to establish partnership with the academic institutions like Capiz State University to better uplift the living condition of intended beneficiaries and by extending its technical expertise and services

Capiz State University as a higher institution plays a vital role in rural development. It has been a partner of the different Municipalities in the Province of Capiz, in organizing cooperatives, communities and projects. It has also been instrumental in seeking recognition and funding of these organizations from various funding institutions. Help, assistance and disseminated technologies are channeled through these organizations to be distributed to their members. Through these associations/cooperatives the sense of responsibilities and belonging of the farmers, residents and other stakeholders are boasted and their bargaining power is increased.

The conceptualization of REACH Program (Rural empowerment through Economic Activities among marginalized Community Households) was based on the needs asserted by DSWD Region, Provincial and Local Personnel and was anchored on the PUNLA Program of the said department. hence, this proposal submitted.

(6) GOALS AND OBJECTIVES (what do you **WANT TO ACHIEVE**? This presents what the proponent hopes to accomplish through the project and what can address the cause of the core problem. Captures changes in people's lives at the societal level – the **IMPACT**. The **BIG PICTURE**.)

1. Enhance Business Management Skills of the Participants in terms of:
 1. Marketing Aspect
 2. Technical Aspect
 3. Financial Aspect
2. Enhance knowledge on Environmental Protection and Conservation

(7) PROJECT DESCRIPTION (what are the **features** of the project process/tools used in the project ID, location, duration, beneficiaries, results chain/framework, project cycle – [*needs/gaps identified, set of solutions noted to address the needs*])

REACH PROGRAM (Rural Empowerment through Economic Activities among marginalized Community Households)

is a proposed extension program conceptualized by CAPSU Burias faculty. This will have three-project components:

Over-all Project Leader- Prof. Mark L. Sibug

Project 1: Prof. Salve M. Ferrer

Community Education /Capacity Building

- a. Profiling and selection of identified beneficiaries

Project 2: Dr. Rosine O. Labado

Leveraging Livelihood and Entrepreneurship Program

- a. Livelihood trainings
- b. Entrepreneurship Trainings
- c. Technology Transfer
- d. Commercialization

Project 3: Prof. Jejomar Farinas

Environmental Education

- a. Ecological Restoration
- b. Environmental Protection
- c. Solid Waste Management/Recycling

(8) PROJECT IMPLEMENTATION AND Monitoring & Evaluation SYSTEM (how will the project be implemented, how will the project be tested if it is working, when - detailed activities to be undertaken by component to generate the outputs, support the description of activities through a matrix or work plan identifying how each activity will be delivered, who will be responsible for WHAT, WHEN, WHERE – state your Activities, Work Plan - Project Schedule supported with a Gantt chart, Project Management [proponent, partners and their roles and responsibilities including counter parting scheme, if any, capacity to handle the project, and accompany with the simple management structure. Provide theoretical background and apply it to the project. Describe how the project will be monitored and evaluated during the planning/pre-implementation, implementation, and operation/post-implementation phases. M&E framework must be accompanied by a **DATA Collection Plan**)

1. Profiling

With the data taken from DSWD, profile of the beneficiaries will be gathered using the forms from the Extension Department.

2. Collaboration with Target Agencies and Stakeholders

This activity focuses on partnership with other agencies and stakeholders that could help in the implementation of the project. It could also be an avenue for giving solutions to the financial problems of the implementers in realizing the goals and objectives of the extension project.

CapSU Burias Extension Department will be the implementing agency that will spearhead in the conduct of trainings and other extension-related activities in order to meet the needs and demands of the people in the community.

DSWD will serve as data providers in identifying the target beneficiaries of the project. They will also serve as partner agency in the establishment of the project and in the conduct of trainings and other extension-related activities.

3. Orientation and Training Need Assessment

In this activity, the identified beneficiaries will be oriented on their roles and responsibilities towards the implementation of the project. Their absorptive capacity will be taken into consideration and their priority needs will also be identified through the conduct of training needs assessment.

4. Planning and organizing

Plans made by the implementers and collaborating agencies will be laid down for deliberation and approval. From the TNA results, interventions will be taken into consideration.

5. Consultative Meeting

This is the stage of laying down problems and observations encountered during the conduct of extension activities and trainings for deliberation and so that assistance, suggestions and recommendations will be given for the improvement of the project

6. Launching and MOA signing

This is the presentation and unveiling of the project. Memorandum of agreement between the implementers, collaborating agencies, stakeholders, and beneficiaries is conducted. The roles and responsibilities of the parties will also be stipulated and emphasized during the MOA signing.

7. Implementation

All trainings and extension-related activities are executed as planned.

	Document Title:	EXTENSION PROPOSAL	Revision No.	00
			Effective Date	November 25, 2019
			Page	Page 5 of 6

8. Project Monitoring and evaluation

Quarterly and semi-annual monitoring and evaluation will be conducted by the implementers, stakeholders, and the HEI to identify the strengths and weaknesses of the project. Problems encountered and the lessons learned will be identified.

9. Impact assessment

Assessment in terms of research study will be conducted to measure the sustainability and effectiveness of the implemented project.

(6) PROJECT IMPLEMENTATION AND Monitoring & Evaluation SYSTEM (how will the project be implemented, how will the project be tested if it is working, when - detailed activities to be undertaken by component to generate the outputs, support the description of activities through a matrix or work plan identifying how each activity will be delivered, who will be responsible for WHAT, WHEN, WHERE – state your Activities, Work Plan- Project Schedule supported with a Gantt chart, Project Management [proponent, partners and their roles and responsibilities including counter parting scheme, if any, capacity to handle the project, and accompany with the simple management structure. Provide theoretical background and apply it to the project. Describe how the project will be monitored and evaluated during the planning/pre-implementation, implementation, and operation/post-implementation phases. M&E framework must be accompanied by a **DATA Collection Plan**)
