

CAPIZ STATE UNIVERSITY
BURIAS CAMPUS

EXTENSION CATEGORY

Project TITLE	Project MATHOTO (Mathematics Organized Teaching Opportunities)
PROGRAM LEADER	JOBEE V. NAVIA
PROJECT LEADERS	JOBEE V. NAVIA DR. CHARINA C. GLORIA JOAN RAE L. LANTORIA DAVIDICA L. AVELINO
TRAINING PROGRAM	Training on Algebra of Junior High school
CAMPUS	Burias Campus
CAMPUS EXTENSION PROGRAM	Project MATHOTO (Mathematics Organized Teaching Opportunities)
BENEFICIARIES	Junior High School Students of Brgy Burias
TIME FRAME/DURATION	3 years

RATIONALE

Capiz State University as a higher institution plays a vital role in rural development.. It actively collaborates with different municipalities in the Province of Capiz, fostering the establishment of educational cooperatives, community initiatives, and projects. By promoting collaboration, fostering resilience, and emphasizing the importance of education, Capiz State University stands as a beacon of hope and progress in these challenging times. Through its initiatives, the university not only supports the development and improvement of math education but also prepares individuals to navigate the complex economic landscape and contribute to a brighter future for themselves and their communities.

The barangay Burias, being the immediate community of the university, faces challenge in mathematics education. The youth of the barangay struggle with their learning in mathematics primarily because they lack access to knowledgeable individuals who can guide them through the various topics of the subject. Without mentors or tutors who possess a deep understanding of mathematics, the youth are left to navigate the complexities of the subject on their own. This absence of guidance hinders their ability to grasp fundamental mathematical concepts, inhibiting their progress and overall competence in the subject.

As a result, the university recognizes the pressing need to address this issue and bridge the knowledge gap among the youth of barangay Burias. By leveraging its expertise and resources in math education, the university aims to provide the necessary support and guidance to empower these young learners. Through initiatives such as mentoring programs, workshops, and interactive learning opportunities, the university seeks to cultivate a conducive learning environment that fosters mathematical growth and proficiency.

By bringing together knowledgeable individuals and the eager youth of barangay Burias, the university aims to create a symbiotic relationship that enriches the educational experience of both parties. This collaboration serves as a catalyst for enhanced math education and enables the youth to overcome their learning challenges. It instills confidence, ignites a passion for mathematics, and equips them with the skills needed to excel academically and thrive in future endeavors.

In essence, the university acknowledges the crucial role it plays in empowering the community of barangay Burias by addressing the absence of knowledgeable individuals to guide the youth in their mathematical learning. Through its dedicated efforts, the university endeavors to unlock the full potential of these young learners, paving the way for a brighter future enriched with mathematical competence and a passion for lifelong learning.

This project was based on the result of the research conducted entitled “*Mathematical Achievement in Distance Learning During the COVID-19 Crisis*” and the needs asserted by the youth and barangay officials. For them, it is about time to make initiatives and asked help from other people.

A consultative meeting with the Campus Administrator of Capsu Burias, Dr Rodyard Madiclum, Extension Chairperson, Prof. Mark Sibug, Dean of College of Education, Dr. Romulo Lagon, Prof. Jobee Navia and Sanggunian kabataan Chairperson of Brgy. Burias, Mambusao Capiz, Hon. John Launio.

The CAPSU Burias College of Education conducts needs assessment analysis in order to identify what assistance and support they can offer to the stakeholders in barangay Burias

OBJECTIVES

- Increase the competencies of the target beneficiaries in mathematics.
- Provide services that guide and aid students in learning mathematics
- Provide a supportive learning environment for children and youth of the target barangay

The College of Education and the Youth and Barangay Officials of Burias plan out their extension activities after conducting the needs analysis and discovering the results based on the study entitled *“Mathematical Achievement in Distance Learning During the COVID-19 Crisis”*

PROGRAM DESCRIPTION

Prior to the conceptualization of the project, On October 27, 2022, the Sanguniang Kabataan officials of Barangay Burias approached Capiz State University-Burias Campus for support. They sought the expertise of the university's faculty to conduct Mathematics training sessions, aiming to enhance the Mathematical skills of the local youth.

Having expressed the needs of the youth of barangay Burias represented by Hon. John Launio, Sanguniang Kabataan Chairperson and the the Brgy. Chairperson Hon. Rosalia F. Loja, CAPSU Burias then requested the expertise of the College of Education since it offers the degree Bachelor of Secondary Education, major in Mathematics. They immediately heed the call for help.

As a response to the needs of the Youth and Barangay Officials, the Help through Project MATHOTO (Mathematics Organized Teaching Opportunities of CAPSU Burias started to exist. One of the major components of the said project is to enhance the mathematical competence among the Junior High School Students of Brgy. Burias,. In order to achieve this, the faculty and staff of the College conducted the **‘Training on Algebra of Junior High school Students’** which was participated by the Junior High School students of the said barangay.

During the conduct of the training program, the following topics were discussed thoroughly by the faculty of the College: “Finding solutions on Linear equation”,” Finding solutions on Linear inequalities”; “Application of Linear equation”; and “Application of Linear inequalities”.

In order to monitor the sustainability of the said program and to find out if the knowledge and skills transfer to the recipients are put into practice, the Extension Coordinator of the College of Education conducts quarterly monitoring by attending the Barangay Officials and Association’ regular meeting. Moreover, a sustainability plan was created.

METHODOLOGY

Memorandum of Agreement (MOA) Signing

The College of Education and
the Youth and Barangay
Officials of Burias Signing of
Memorandum of Agreement

Conduct of Training

College of Education
conducts Training on
Algebra of Junior High
school

RESULTS AND INTERVENTIONS

To find out if the conduct of the “**Training on Algebra of Junior High school Students**” has derived positive effects, quarterly monitoring is conducted. The following are the observed results:

1. Enhanced knowledge on mathematical concepts on Algebra.
2. With the assistance of College of Educaiton of CAPSU Burias Campus, the Junior High School Students were:
 - equipped with mathematical skills in solving problems involving linear equation and inequalities;
 - given clearer understanding on the application of linear equations and inequalities in real life situations.
3. The barangay has established the MaTHOTO Learning Hub, a dedicated platform for continuous service in supporting students' learning of mathematics.

LESSONS LEARNED

1. Capiz State University-Burias Campus, being an institution of higher learning, plays a significant role in promoting human development in its immediate community.
2. When Junior High School students are provided with the opportunity to expand their knowledge and understanding of fundamental topics in Mathematics, it has a profound effect on their overall competence and motivation to learn higher mathematical concepts. By equipping these students with a strong foundation in basic mathematics, they develop the necessary skills and confidence to tackle more advanced mathematical principles. As their knowledge base expands, they become more adept at problem-solving, critical thinking, and analytical reasoning, which are essential skills for success in higher-level mathematics. Moreover, the increased competency in mathematics instills a sense of empowerment and enthusiasm in students, driving them to explore and engage with more complex mathematical concepts with eagerness and determination. This process of building upon a solid mathematical foundation not only enhances their academic performance but also fosters a lifelong love for learning and a passion for the field of mathematics. Ultimately, empowering Junior High School students with comprehensive mathematical knowledge sets them on a path of continuous growth and opens doors to numerous opportunities in their educational and professional pursuits.
3. There exists a reciprocal relationship between the Institution and Burias, where the support extended by Capiz State University-Burias Campus is reciprocated unconditionally by the community. This mutual exchange has led to a strengthened bond between the two, resulting in a continuous flow of resources and assistance in support of both the activities of CAPSU and the community of Burias..
4. The remarkable eagerness of junior high school students to learn mathematics becomes even more inspiring when considering the circumstances, they face. All of these students have undergone the challenges of long-distance learning modalities, where face-to-face

interactions with teachers and peers are limited or absent. In addition, a significant number of these students lack access to personal tutors or mentors who could provide them with expert guidance and support in their mathematical journey. Despite these obstacles, their unwavering determination to excel in math is truly commendable.

RECOMMENDATIONS

1. With the positive outcomes from the initial phase of the project, the College of Education of CAPSU Burias should expand its reach to other barangays within the Municipality of Mambusao. Recognizing the importance of garnering support and cooperation from key stakeholders, the College should focus on soliciting the involvement of the Local Government Unit (LGU) and officials from the various barangays before extending the project's scope.
2. The College of Education should establish a system for constant monitoring and evaluation to ensure the sustainability of the project. This monitoring process should involve regular check-ins with tutors, students, and community members to gather feedback, identify challenges, and assess the effectiveness of the project's implementation.
3. Provide additional training to Math education students volunteers and develop effective interventions. This additional training will equip them with the necessary skills and knowledge to create new technologies, develop instructional materials, and implement effective interventions that enhance learning outcomes. By empowering the volunteers with these skills, they will be better equipped to develop engaging instructional materials, leverage educational technologies, and implement interventions that cater to the diverse learning needs of the students. The combination of their passion for education, updated pedagogical knowledge, and innovative approaches will contribute to a dynamic and effective learning environment, ultimately leading to improved math education outcomes for the students.
4. CAPSU should continuously support the barangay, as this can contribute to improving students' math performance and expanding their future career choices. Proficiency in math opens doors to various fields, including science, technology, engineering, and mathematics (STEM). CAPSU can help students understand the relevance of math in real-world applications and showcase the career opportunities available in STEM fields. This awareness can inspire students to pursue further studies and careers in math-related disciplines, providing them with better prospects for their future. The continuous assistance to the barangay strengthens the math education ecosystem, empowers teachers, supports students, and expands career opportunities. By nurturing this collaborative relationship, CAPSU plays a vital role in improving math education outcomes and paving the way for a brighter future for the students.
