(4) Background (WHAT, WHERE is the proposed project, **WHO** will benefit, what **PRODUCT/SERVICE** will address the identified needs/resources. Introduce the product/service that will address the identified needs and resources (general statement). Introduce the target group, organization/community to be served, and the project beneficiaries briefly. Include related literature consistent with the subject – to make the proposal scholarly).

BACKGROUND OF THE STUDY

Project CHALK: “Comprehensive and Holistic Approach in uplifting struggling Learners’ Knowledge in reading and numeracy”

Project CHALK: Comprehensive and Holistic Approach in uplifting struggling Learners’ Knowledge in reading and numeracy is an extension project under the *LITERACY* Program of the College of Education, Arts, and Sciences -Teacher Education Department. This project is

	Document Type:	FORM	Document Code	
			Revision No.	00
	Document Title:	EXTENSION PROPOSAL	Effective Date	
			Page	

anchored on the research study “***Project Rescue: A Literacy and Numeracy Enhancement***” and from the request made by the DepEd Schools Division Office (SDO) Capiz.

The project will take place in the District of Pontevedra within the Division of Capiz, identified as one of the consistently top 5 underperforming district based on the Electronic Regional Unified Numeracy Tools (ERUNT) and the Philippine Informal Reading Inventory (Phil. IRI) conducted by the Division Reading Assessment Team for the last two years. Schools ranking below average, particularly the bottom three, will be prioritized as beneficiaries of this project.

The beneficiaries will include the selected non-readers and students, identified as not proficient (non-numerates) students in mathematics, teachers handling mathematics and reading subjects preferably those assigned as beginning and remedial teachers in literacy and numeracy, and the parents of the identified non-readers and non-numerates. Secondary data based from ERUNT and Phil IRI of the Capiz Division will be utilized in selecting the non-readers and non-numerates. Pre-assessment tools will be utilized for teachers to assess the identified reading and mathematics competencies that may have been skipped or not taught to students. Pre-tests in reading and numeracy will also be administered to validate the secondary data.

A series of trainings on the different strategies in teaching remedial and beginning reading and mathematics will be conducted for the selected teachers handling Reading and Mathematics subjects by the College of Education Arts and Sciences (COEAS) faculty co-hosted by the international partner-institutions. Moreover, an orientation-seminar on values formation and parenting styles will be provided to the identified parent- beneficiaries. Differentiated instruction methods such as games, storytelling, peer and individual tutoring will be employed during the tutorial sessions utilizing Adopt-a-child scheme.

This study will be anchored on the literacy theory, emphasizing the development of individuals through several core skills including decoding, comprehension, writing, and speaking skills. Understanding this theory enables educators to enhance teaching ability and support literacy learning, potentially minimizing or eradicating non- readers and non- numerates. consider the ways children are exposed to and interact with language. Educators apply this knowledge to enhance teaching ability and support literacy learning. Thus, both the non-readers and non-numerates will be minimized or even eradicated.

Furthermore, the study will consider theories such as the Constructivism that focused on the skills reflected by children as they engage with the world and move through developmental stages; Ecological/Contextual Theories which focused on the broader context of the child, and Sociocultural/Cooperative Theories which also focused on the immediate surroundings of the child and how they interact. Thus, using these theories will give a framework and build our scientific understanding of how children grow and develop.

The project is long term, spanning three years. Each training for beneficiaries will be conducted separately, with the series of teacher trainings taking place first, followed by parent seminar-orientations and tutorial sessions integrated into the class program of each teacher, lasting one month to every grading period to each identified beneficiary school. The said trainings are to be provided by both the university faculty and the invited international lecturers

			Page	

from partner institutions. It will commence in March 2024 with the signing of the Memorandum of Agreement between Capiz State University, DepEd Capiz Division and the international partner institutions. This will culminate June 2024 with post assessments both in reading and numeracy will be conducted.

(5) RATIONALE (WHY should the project be implemented? **WHAT need** is the project trying to address? – how the problem is affecting the targeted beneficiaries, previous efforts done and status, any legal bases and related literature supporting the proposed project, link the relevance of the project to development priorities like mandate and development goals, the comparative advantage to handle the project, and **WHY** act now and not later).

RATIONALE

Struggling learners are students who encounter difficulties in their learning journey for various reasons, such as lack of knowledge foundational or skills, attention and focus issues, executive functioning challenges and emotional and behavioral difficulties (DAS International 2023). During the meeting with the key officials and teachers from SDO Capiz, the group identified the District of Pontevedra as one of the underperforming districts because of the large number of struggling learners. The group then identified the three existing major factors that affect the student's learning ability: teachers, parents, and the students themselves.

Teachers being the focal figure in education and play an important role in the teaching-learning process should be knowledgeable and competent enough to impart necessary skills, knowledge and wisdom to students. Hence, providing intervention on how to enhance teaching skills to increase the literacy and numeracy skills of the elementary graders is needed. Likewise, the appropriate instructional materials to be used in teaching and other learning materials to be given to the struggling learners to be used in school and at home will be of great help to develop their reading and study habits.

Moreover, positive parenting styles, such as providing appropriate support and encouragement, have a positive impact on academic performance of the students (Wu, Z.2023). Parents can provide a quiet and orderly learning environment, as well as appropriate learning resources, to help children concentrate and develop good study habits that is significant in the enhancement of both the reading and numeracy skills of the students. Thus, a number of reading and mathematics materials will be given to the student-beneficiaries.

Mathematics and reading are essential to everyday life. For students to be confident, successful learners and active participants in their world, they need to develop mathematical knowledge, skills and understanding to be able to think creatively, analyze and communicate information and ideas. Hence, it is important to improve the students' numeracy skills through a range of challenging and engaging learning experiences that extends their prior knowledge

However, the existence of non-readers and non-numerates in every public elementary school had become a perennial problem of the Department of Education. Thus, a number of schools have had non-readers and non-numerates from Grades 1 to Grade 6. This has even become severe because of our precarious situation during the Covid 19 pandemic where education had been challenged. Schools found ways just to deliver education through modular learning. Indeed, an abrupt change of learning modes had affected the numeracy and reading fluency of the children. Stanford Graduate School of Education (GSE, 2021) as cited by Dagmil 2022 stated that students' development of oral reading fluency largely stopped in spring 2020 .

(6) GOALS AND OBJECTIVES (what do you **WANT TO ACHIEVE**? This presents what the proponent hopes to accomplish through the project and what can address the cause of the core problem. Captures changes in people's lives at the societal level – the IMPACT. The BIG PICTURE.)

GOALS

The goal of this project is to help enhance the performance both in literacy and numeracy of the below average elementary schools of Pontevedra District by 2% to 5% within the span of 3 years by minimizing the presence of struggling learners within its jurisdiction as the main objective.

OBJECTIVES

The following specific objectives are expected to be achieved:

1. To capacitate remedial reading and mathematics teachers with the different strategies and approaches tailored to meet the education needs of struggling learners which will be facilitated through the training sessions co-hosted by the international partner institutions of CAPSU, focusing on innovative methodologies and effective intervention techniques.
2. To foster greater parental involvement and support for struggling learners by organizing orientation seminars on values formation and parenting styles which will provide the parents and guardians with valuable insights and practical strategies to create a conducive learning environment at home thereby reinforcing the educational efforts made in school.
3. To reduce the prevalence of struggling learners with special educational needs through targeted remedial classes and psychosocial activities, to enhance the overall academic and integration within the school community.
4. To increase the availability of learning materials in school by providing resources and support for curriculum development and enrichment activities.

(7) PROJECT DESCRIPTION (what are the **features** of the project process/tools used in the project ID, location, duration, beneficiaries, results chain/framework, project cycle – [*needs/gaps identified, set of solutions noted to address the needs*])

PROJECT DESCRIPTION

There will be three groups of beneficiaries under the Project CHALK. The reading and mathematics teachers handling and Remedial Reading and Mathematics subjects, the identified non-readers and non-numerates of the identified bottom three schools in the district of Pontevedra and their parents. A secondary data based from Electronic Regional Unified Numeracy Tool (ERUNT) and from the Philippine Informal Reading Inventory (Phil IRI) of the Capiz Division will be utilized. Likewise, a Pre-Test in Reading and Numeracy will be given to validate the secondary data. A pre-assessment tool will be utilized for teachers in assessing the identified reading and mathematics competency that they seem to have skipped or not taught to students. A series of trainings on the different strategies in teaching remedial and beginning reading and mathematics will be conducted to the selected teachers handling Reading and Mathematics subjects. Differentiated instruction such as games, storytelling, peer and individual

				Page	

tutoring will be employed during the tutorial sessions utilizing Adopt-a-child scheme. Sufficient Instructional Materials both in reading and mathematics will be provided to the students. On the other hand, orientation seminars on values formation and parenting styles will be given to the identified parent- beneficiaries

Different teaching strategies in teaching Mathematics, Remedial Reading and Beginning Reading will be introduced to capacitate the teachers teaching mathematics and reading subjects with emphasis on the competencies that were skipped or were not taught to the students.

Venue	Teacher Beneficiaries	NO. OF PARTICIPANTS		Total
		Numeracy Training	Training in Remedial and Beginning Reading	
FADC	School A	10	10	20
	School B	10	10	20
	School C	10	10	20
	TOTAL	30	30	60

A copyrighted Reading Fuller: A Writing and Reading Tool for the Non-Readers as output of the previous research and other instructional materials from other internet sources will be used during the reading remediation tutorials while varied instructional materials like realia, manipulative objects, window cards, charts, flash cards and many other IMs will be used in the conduct of numeracy remediation.

Venue	Beneficiaries	NO. OF PARTICIPANTS		Total
		Non-Readers	Non - Numerates	
FADC	School A	80	80	80
	School B	60	60	60
	School C	50	50	50
	TOTAL	190	190	190

The Generalists/BEEEd students including the pre-service teachers will conduct the tutorial sessions with the supervision of the College of Education, Arts and Sciences (COEAS) faculty. Instructional materials will be utilized using the improvised numeracy and reading tools and the digital designed and adopted by the BEEEd students and the Remedial Reading Tools. An orientation-seminar will be conducted to the parents of the identified non-readers and non-numerates. Supplies/Materials in the conduct of the training, and other materials needed will be provided by the Extension Department.

The Result Chain/Framework

Implementation		Result		
Input	Activities	Output	Outcome	Impact
Budget, Venue, Resource Speakers, Training Materials	Planning Phase: Meetings, Needs' Assessment Survey, Finalization of Training Activities, Proposal Presentation.	90% of struggling learners attended the remedial classes and psychosocial activities. 100% of teachers dealing to struggling learners attended the training.	Minimize the <u>number of</u> struggling learners in the adopted elementary schools by 90% within 2 years.	Enhance the performance both in literacy and numeracy of the below average elementary schools of Pontevedra District by 2% and 5% within the span of 3 years.
	Implementation Phase: Remedial Classes to learners with special educational needs, training enhancement for teacher's new and updated approaches dealing to learners with special educational needs Values formation to Parents of struggling learners Provision of Instructional Materials	90% of parents of struggling learners attended the values formation and orientation on the importance of family support 100% of learning materials were distributed and available in school		
	Closure Phase: Evaluation and feedback from the beneficiaries.			

I. Work Plan

OUTPUTS/ACTIVITIES What to do?	MECHANICS OF IMPLEMENTATION How?	ACTORS (LEAD, SUPPORT) Who will do?	TIME/DURATION When/How Long?	VENUE/LOCATION Where?
a. Social Preparation	- Courtesy visit to DepEd Personnel: Division Office, District Office, and School - Conduct assessment, identify the problems and possible interventions	Proponent, DepEd key officials, teachers, and parents	January – March 2024	DepEd SDO Capiz, Pontevedra District Office, Identified Elementary Schools
b. Meeting and consultation with the Partner Agency, Stakeholders, and Target Beneficiaries	Presentation of problems and possible intervention	Proponent, DepEd key officials, teachers, parents, and students	January – March 2024	DepEd SDO Capiz/ Pontevedra District Office
c. Conceptualization and finalization of the Project	Crafting the goal and objective, methodologies, specific activities to particular beneficiaries,	Proponent, DepEd key officials,	January – March 2024	DepEd SDO Capiz/ Pontevedra District Office
d. Launching and Orientation of the Project	- Submit activity proposal to funding source - Coordinate to the partner agency for the venue, participants, and other related concerns	Proponent, CAPSU key officials, faculty members, BEED students, DepEd key officials, PTA, and student-beneficiaries.	March 2024	One of the identified schools
e. Conduct Activity 1: Remedial Classes	- Coordinate to the school for the arrangement of schedule of class - Submit activity proposal to funding source - Provide a one-on-one remedial class to the identified struggling learners	Proponent, faculty members, CAPSU BEED students, and DepEd teachers	April to December 2024 April to May 2024 September to October 2024 November to December 2024	Identified Schools
f. Conduct Activity 2: Values formation orientation- seminar to	- Coordinate to the PTA for the activity - Submit activity proposal to funding source	Proponent, Faculty Members, and PTA,	April 2024, September 2024	Identified Schools

(11) Executive Summary (A significant part of the proposal. Summarize the project so that readers can rapidly become acquainted with the problem, background information, implementation scheme, and resource requirements. Intended as an aid to decision-making since it covers all sections, but do not copy and paste and write in the same order as the main document.)

Executive Summary

Project CHALK: Comprehensive and Holistic Approach in Uplifting Struggling Learners' Knowledge in Reading and Numeracy is anchored on the research study "*Project Rescue: A Literacy and Numeracy Enhancement*". This will be launched to address the perennial problem in the Department of Education on non-readers and non-numerates. This is in response to the letter request of Pontevedra District being the priority district of DepEd Capiz Division for it belongs to the bottom three with below average rate on literacy and numeracy level

	Document Type:	FORM	Document Code	
			Revision No.	00
	Document Title:	EXTENSION PROPOSAL	Effective Date	
			Page	

in Capiz Division.

The beneficiaries under this program will be the selected non-readers and the identified not proficient (non-numerates) students in mathematics; the teachers handling mathematics and reading subjects, preferably those assigned as remedial teachers both in literacy and numeracy; and the parents of the identified non-readers and non-numerates.

A secondary data based from the result of the Electronic Regional Unified Numeracy Tool (ERUNT) and from the Philippine Informal Reading Inventory (Phil IRI) of the Capiz Division will be utilized in selecting the non-readers and non-numerates. Pre-assessment tools will be utilized for teachers in assessing the identified reading and mathematics competency that they seem to have skipped or not taught to students. Likewise, pre-tests in reading and numeracy will be administered to the non-readers and numerates to validate the secondary data. A series of trainings on the different strategies in teaching remedial and beginning reading and mathematics will be conducted to the selected teachers handling Reading and Mathematics subjects to be facilitated by COEAS faculty and the international partner universities. Orientation - seminar on values formation and parenting styles will be given to the identified parent- beneficiaries. Differentiated instruction such as games, storytelling, peer and individual tutoring will be employed during the tutorial sessions utilizing Adopt-a-child scheme.

Descriptive statistics will be utilized in analyzing the data on numeracy while the Phil. IRI Tool on analyzing the reading level and comprehension of the pupils will be employed. An Impact Assessment will be conducted after the project is terminated.

A sustainability plan to ensure the effectiveness of the project will be prepared. This includes the inclusion of this literacy project on the class program of every adviser of the adopted school and it will be incorporated as part of the requirements in teaching Elementary English and teaching Elementary Mathematics. A “Balay sang Kaalam”: A Reading and Math center will be constructed by the adopted school-beneficiary to keep all the significant IMs utilized and will serve as their sanctuary for reading and numeracy while a Literacy and Numeracy workbook will be crafted by the BEEed students to be used and be utilized by the adopted schools and which will be later replicated to other schools.
