(9A) Abstract (This has a maximum of 250 words. It contains 1-2 sentences of rationale, followed by objectives, brief methodology, major findings, and implications of impact of the study.)

The study entitled “Challenges on Modular Distance Learning : Lived Experiences of Stakeholders: ” was conducted in the College of Education of Capiz state University Burias campus during the school year 2021 2022 to answer the following questions:

The ulterior concern of this study to describe the challenges encountered by the students, parents, and faculty of the College of Education on modular learning.+

The study utilized the qualitative research. The descriptive phenomenology was used in this study. Using convenient sampling, the data were gathered by the researcher using an in-depth interview during module distribution.

Results of the study revealed that the College of Education Students of Capiz State University Burias Campus were mostly female, without internet connectivity and reside in barangay. The parent – respondents were elementary level, with family income of 10,000 and below, and unemployed. The faculty – respondents were mostly instructor I, and had length of service between 1 – 10 years.

The emerging theme from the students in the in-depth interviews include: (1) Difficulties Encountered on modular learning, (2) Parents’ Parental Support in Learning.

The emerging theme from the parents in the in-depth interviews include: (1) Parents’ Concern on the Learning of their Children, (2) Impact of Modular Learning on the life of family.

The emerging theme from the faculty in the in-depth interviews include: (1) Limitation of the effective delivery of Learning, and (2) Limited Printing Materials.

The student – respondents encountered difficulty that resulted to anxiety and depression in the modular learning approach

The parent-respondents show that their children struggling in the modular learning approach due to poor internet connectivity and even affect the their family life

The faculty – respondents believed that there is half-baked in the delivery of modular learning approach and experienced additional expenses due to limited printing materials.

(9B) Keywords (Write 3-6 words you used in the study, preferably not found in the title because words in the title are already given keywords. This would also include process, or methodology employed.)

Instructional quality, technical quality, content, internet connectivity

(10) Introduction (This includes the rationale, background of the study, and objectives which are not divided by subheadings. Incorporate at least three (3) reviews)

Face to face learning engagement of students and teachers within the school has been suspended due to the COVID-19 pandemic. This pandemic has paved the way to the implementation of Modular Distance Learning as an urgent response to ensure continuity of education.

For the continuity of education and for every school to still attain its mission and vision which is to provide quality education to every Filipino learner, the university implemented the Modular Distance Learning (Dangle et. al, 2020).

One of the benefits of using modules for instruction is the acquisition of better self-study or learning skills among students. Students engage themselves in learning the concepts presented in the module. They develop a sense of responsibility in accomplishing the tasks provided in the module. With little or no assistance from others, the learners progress on their own. They are learning how to learn; they are empowered (Nardo, M.T.B, 2017).

The disadvantages include greater self-discipline and self-motivation required for students, increased preparation time and lack of concrete rewards for teachers and staff, and greater administrative resources needed to track students and operate multiple modules.

Anspaugh, Hamrick, and Rosato (2003) shared the view that stress came in several forms and

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- CR-01
	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 3 of 12

affected people of all ages and walks of life. This implies that stress is a part of life and has many causes, and that the degree of stress in our lives is greatly dependent on factors such as the physical health of the individual, the quality of interpersonal relationships, the number of commitments and responsibilities we shoulder, the degree of others' dependence on and expectations of us, the amount of support we receive from others, and the number of changes of traumatic events we go through. This means that life itself is stress related, depending on the individual's lifestyle and the level of cultural development.

This research uses a phenomenological study to answer the domain of inquiry that frame this study. The researcher would like to know the challenges encountered by the students, parents and faculty teaching in College of Education of Capiz State University Burias Campus a higher education institution. Hence, this study.

Domain of Inquiry

The ulterior concern of this descriptive phenomenology study is to describe the lived experiences encountered by the students, parents, and faculty of College of Education on modular learning.

Specifically, it sought to provide answers to the following questions.

1. What are the challenges encountered by the students in the implementation of modular learning?
2. What are the challenges encountered by the parents in the implementation of modular learning?
3. What are the challenges encountered by the faculty in the implementation of modular learning?

(11) Materials and Methods or Methodology (This includes the materials, methods, duration & location of the study. Materials and Methods are headings used in Natural Science researches and methodology is Social Sciences. Presentation of materials may not necessarily be in separate heading but may be incorporated in the specific methods used. Justify paragraphs with main headings in caps.)

This study employed a descriptive phenomenology by Edmund Husserl. Husserl believed that phenomenology suspended all suppositions, was related to consciousness, and was based on the meaning of the individual's experience (Reiners, 2012).

Descriptive phenomenology seeks to answer the research questions in a descriptive manner through interviews or observation of those closest to the phenomenon (Davison, 2013). Using convenient sampling, researcher will select individuals for study participation that are especially knowledgeable about or experienced with a phenomenon of interest (Cresswell & Plano Clark, 2011). This is an appropriate method to select the participants for a study using a descriptive phenomenological approach because the aim to understand and describe a particular phenomenon from perspective of those who have experience it.

The participants undergone a one-on-one in depth interview during distribution and retrieval of modules using a semi-structured questionnaire. The transcribed interviews conducted by the researcher were the basis to substantiate the data that each conveyed with regards to the challenges encountered by the COE's stakeholders.

Locale

The study was conducted at the College of Education of Capiz State University Burias Campus, Mambusao, Capiz.

Participants

The participants of the study were composed of 100 students, mostly female, residing in barangay and without internet connectivity; 50 parents had elementary level of education, unemployed with family income of 10,000; and 22 faculty, mostly instructor I and had length of service between 1 – 10 years of the College of Education of Capiz State University Burias Campus from February to March 2022.

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- CR-01
	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 4 of 12

Instruments

The researchers used a semi-structured questionnaire interviewed composed of two parts, namely, Part I which asked as regards to their information. The second part included open –ended questions to be answered by the participants. The questions were in English and in the native dialect in order to ensure that participants were able to express their ideas and views well. Participants freely discussed their answers and the researchers provided in depth questions to profound further explanation from the participants.

Sampling and Data Gathering Procedure

The participants were chosen using convenient sampling. The researchers personally gave and retrieved researcher made questionnaire to students and parents during module distribution and handing in questionnaires to faculty working in CapSU Burias.

Data Analysis

After the data were collected through a semi- structured interview guide and responses to questions were transcribed verbatim and analyzed using Colaizzi's method of analysis. The researcher attempted to understand the meanings embedded in the participants statements to uncover common themes. Data was analyzed using inductive thematic analysis.

The results of the study were shared with participants to verify the statements and validate the information.

The researcher carefully considered his own perception and prior assumptions on the challenges encountered by the COE stakeholders during distance learning.

(12) Results and Discussions (This part contains presentation of results (data) with reference to the table and figure, to be followed by discussion, with support of reviewed literature. Sequence shall be based on the objectives of the study. Tables are formatted without the vertical lines. Horizontal lines are set at the top and bottom portions as well as below table headings and above major subdivisions. Justify paragraphs with main headings in caps.)

Results and Discussions

The primary goal of this qualitative study was to explore College of Education stakeholders' challenges encountered during distance learning. This section presents the result that were obtained after interview s with the participants.

1. The emerging theme from the students in the in-depth interviews include: (1) Difficulties Encountered on modular learning, (2) Parents' Parental Support in Learning.

1.1 Difficulties encountered on modular learning

There were three cluster themes that emerged: 1) Poor Internet Connection, 2) Struggles, and 3) Anxiety and Depression.

1.2 Parents Parental Support in Learning

There were three cluster themes that emerged: 1) Conflict on household chores, 2) Lack of Time, and 3) Lack of Sleep.

2. The emerging theme from the parents in the in-depth interviews include: (1) Parents' Concern on Learning of their Children, (2) Impact of Modular Learning on the life of family.

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- CR-01
	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 5 of 12

2.1 Parents' Concern on the Learning of their Children

There were four cluster themes that emerged: 1)Struggles, 2) Poor Internet Connection, 3) Limited Knowledge on the Subject, and 4)Anxiety.

2.2 Impact of Modular Learning on the Life of the family

There were four cluster themes that emerged:1) Neglected Household Chores, 2) Sleep Deprivation, 3) Not Favorable on Modular Learning, and 4) Many Topics Included on the Module.

3. The emerging theme from the faculty in the in-depth interviews include: (1) Limitation of the effective delivery of Learning, and (2) Limited Printing Materials.

3.1 Limitation of the Effective Delivery of Learning

There were four cluster themes that emerged: 1) Half-Bake, 2) Subjective of Grades, 3) Same Answer, 4) Exhausted.

3.2 Limited Printing Materials

There were four cluster themes that emerged: 1) Expensive, 2) Limited Supplies, And 3) Additional Expenses.

Table 5. Challenges encountered by the student-respondents during modular learning.

EMERGENT THEME	CLUSTER THEME	RESPONSES
Difficulties encountered On Modular Learning	Poor Internet Connection	"Difficult of the lessons that is not easy to understand and it is difficulty on my part to research due to por internet connection"
	Struggles	"My struggle is dealing a lot of modules and hard to understand" "It is difficult to understand the lesson with our own understanding because we have no teacher who discuss and explain the lesson well"
		"I could feel that my acquired knowledge is not enough unlike in face to face classes"
	Anxiety, depression	"I also experience struggles in answering different activities in the module sometimes" "I am saying to myself that I will stop my studies " "There are times that I cried because I really dont know what to do" " I got anxiety and depression"
Parents' Parental Support in Learning	Conflict on Household Chores	"Sometimes it's hard to answer my modules because I am busy doing household chores" "cannot concentrate well at my home since a lot of distractions and struggles in my house"

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- CR-01
	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 6 of 12

Lack of Time

“Lack of time to understand the lesson in all subjects”

Lack of Sleep

“It is difficult because there are no teachers who will discuss and guide us”
“Lack of sleep and time to answer the modules”

Table 6. Challenges encountered by the parent -respondents during modular learning.

EMERGENT THEME	CLUSTER THEME	RESPONSES
Parents' Concern on The Learning of their Children	Struggles	“Nahihirapan ang aking mga anak sa pagsagot at pagpasa ng kanilang mga module sa takdang oras dahil kailangan nilang matutu sa sarili nilang paraan at pagsisikap”
	Poor Internet Connection	“Nabudlay mag answer sang iya module bangud indi maintindihan and leksyon kag di kabalo kung paano maansweran ang mga olobrahon kag bangod mahina nga signal/internet” “Gabii na sya magpauli perme kay may naobra sa banwa nga related sa eskwelahan. Wala abi sang stable nga internet connection dire sa balay”
	Limited Knowledge on the subject	“I Limitado andang naatiguhan o naintindihan tungo indi makadugang eksplikar ang manunudlo”
	Anxiety	“Nabudlayan ako tungod wal man ako naantiguan sa module”
Impact of Modular Learning on the Life of the Family	Neglect Household Chores	“Indi yun halos makabulig sa mga hilikuton sa balay kag ndi masugo”
	Sleep Deprivation	“Kulang sa tulog sa pagsabat sa kaduroduro nga salabtansa gakalain lain nga subject” “Ginahingyo ko magbalik na ang face to face nga klase para ndi na sya mabudlayan sa iya mga module”
	Not Favorable on Modular Learning	“Mas manami gid kung face to face, nagagiya ang mga maestro ag maestro”
	Many Topics Included in the Module	“May mga palamangkutanon nga nga di gid namon ma sabat kag nakita namon ang kabudlay sa pag answer sa kaduroduro nga module”

Table 7. Challenges encountered by the faculty -respondents during modular learning.

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- CR-01
	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 7 of 12

EMERGENT THEME	CLUSTER THEME	RESPONSES	
Limitations on Effective Delivery Learning	Half-Bake	“Teaching and learning process is like half-bake since the content was not explain and elaborate It deeper and further”	of
	Subjective of grades	“Difficulty in giving grades due to the limited components as well as rating the outputs considering their authenticity” “75 % proficiency level could not be achieved since there is no validity or reliability when it comes to test results. “Retrieval of students’ outputs could not be 100% complied since there are students who are hardly able to do it due to financial problems”	
	Exhausted	“Exhaustion in preparing modules and checking of outputs” “Inability to harness students’ full potential not only in academic but also in other aspects” “Problem-solving activity is difficult for students to understand through mere reading only” “Follow-up with the students is difficult to achieve since they are not reachable by phone or internet/messenger”	
Limited Printing Materials	Expensive	“It is more expensive on the part of the faculty in providing modules due to additional need of bond papers and ink”	
	Limited Supplies	”Limited supplies of materials which could not suffice the information needed by the students” “Limited support provided to students to help them overcome their difficulties”	
	Additional Expenses	“Printing and reprinting modules at our own expenses”	
(13) Conclusions and Recommendations (This part shall be written in narrative form and arranged based on the objectives and findings. Conclusions are general statements answering the objectives. Recommendations are based on the conclusions. They may be split or combined based on their length, which means, conclusions and recommendations may be split under separate hedings if they are long. Justify paragraphs with main headings in caps.)			
Conclusions			

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- CR-01
	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 8 of 12

From the foregoing findings, the following conclusions were drawn:

1. The student – respondents encountered difficulty that resulted to anxiety and depression in the modular learning approach
2. The parent-respondents show that their children struggling in the modular learning approach due to poor internet connectivity and even affect the their family life
3. The faculty – respondents believed that there is half-baked in the delivery of modular learning approach and experienced additional expenses due to limited printing materials.

Recommendations

1. Students should seek help from their siblings or relatives in answering some difficult questions in the modules. Parents must find time in helping their children amidst pandemic in their schooling. The administration must allot fund for printing of modules. Faculty should be given enough workload to lessen their stress at work.
2. Teachers should diversify homeworks to cater different learners so that they can catch up with the lesson. Parents must have at least time off from busy work and have relaxation time. Faculty must be optimistic in dealing problem in this now normal.
3. The faculty should divert their time and energy to do something worthwhile at home.

(14) Output (Indicate the specific products, processes or services which the project has produced; quantify when possible.)

(15) Technology Transfer Activity Conducted (Indicate the specific products, activity design, processes or services transferred as extension activities)

(16) Economic Analysis (This should present the direct cost of project implementation, expenses in the production of technology, revenues generated from technology produced, return on investment (ROI) and payback period.
