(9A) Abstract

The success or failure of an undergraduate program can be measured through the performance of its graduates. This tracer study was conducted to account for the achievements, employment, and job performance of the Bachelor of Elementary Education (BEED) graduates of the College of Education, Arts, and Sciences of CapSU Pontevedra for the period 2015-2019 utilizing the descriptive survey design with a researcher-made questionnaire used to gather the needed data through the Google Forms. Results showed that the majority of the respondents were female and living in the municipality then 93.20 were employed, mostly contractual and locally employed. On their personal advancement majority were pursuing master's degrees. In terms of promotion, most of the respondents were not promoted however they had a commendable job performance.

(9B) Keywords

Achievement, employment and job performance

(10) Introduction

Graduates' employability is among the key issues pertaining to higher education institutions (HEIs), employers, students and other stakeholders (Abbas & Sagsan, 2020). With the emphasis of Commission on Higher Education (CHED) on outcomes-based education, the focus of evaluating the effectiveness of academic programs of a university is on the quality and quantity of outcomes—learning and graduates and not solely on its instructional inputs and faculty (CHED, 2014).

This study traced the BEED graduates of the College of Education, Arts and Sciences (COEAS) of Capiz State University Pontevedra Campus from Batch 2015 to Batch 2019 to delve on how they were employed after finishing their respective degrees. The study specifically attempted to describe their academic achievements, professional developments achieved after college, employment, extent of job performance, promotion, and awards/recognition. Results of the study are deemed beneficial in identifying entry points for program enrichment and innovations to be implemented by the college to help accelerate the university's performance and stature.

Statement of the Problem

This study aimed to answer the following questions:

1. What personal information can be obtained from the respondents in terms of:
 - a. civil status
 - b. Gender;
 - c. Location of Present Residence?
 - d. Year graduated
2. What employment data can be obtained from the respondents in terms of:
 - a. Employment;
 - b. Employment status;
 - c. Nature of occupation
 - d. Place of work
3. What advanced studies attended by the respondents after college?
4. Are the respondents promoted in their present job?
5. What is the extent of job performance of the respondents in their work?

(11) Materials and Methods or Methodology**Research Design**

This study used the descriptive survey research design to describe the educational background, advanced studies attended after college, employment and promotion received of the respondents after their graduation from Bachelor of Elementary Education (BEED) of CapSU Pontevedra.

Respondents of the Study

The respondents of the study were the graduates of the Bachelor of Elementary Education (BEED) at the College of Education, Arts and Science of CapSU Pontevedra Campus covering batch 2015 to batch 2019.

Data Gathering Instruments

A researcher-made questionnaire through Google Forms was utilized as a data gathering instrument.

Data Analysis Procedure

The data were computer-processes using the Statistical Package for Social Science (SPSS) for reliable and accurate data analysis. Descriptive statistics such as frequency counts, percentages, and mean were employed in analyzing the quantitative data.

(12) Results and Discussions**Personal Profile of the Respondents**

Of the 176 respondents, 90.34% were single, 9.09% were married and 0.57% were widows or widowers. In terms of gender, majority of the respondents were female (84.66%) and only

27 or 15.34% were male. For the place of residence 148 or 84.09% were living at the municipality and 28 or 15.91% were living at the city. As to the Year Graduated, those who graduated in the year 2016 got the highest percentage of 63.64%, followed by 14.20% in 2017, 13.07% in 2019, 7.95% in 2018, and lastly, 1.14% in 2015.

Table 1

Result of the Demographic Profile of the Respondents

Civil Status	Frequency	Percent
Single	159	90.34
Married	16	9.09
Widow or Widower	1	0.57
Gender	Frequency	Percent
Male	27	15.34
Female	149	84.66
Location of Present Residence	Frequency	Percent
City	28	15.91
Municipality	148	84.09
Year Graduated	Frequency	Percent
2015.00	2	1.14
2016.00	112	63.64
2017.00	25	14.20
2018.00	14	7.95
2019.00	23	13.07
Total	176	100.00

Employment Data of the Respondents

A. Employment

Table 1 shows the employment status of the respondents. Results show that 93.20% are employed while 6.80% are unemployed.

Table 2

Employment of BEED graduates

Employed Graduates	Frequency	Percent
Employed	164	93.20
Unemployed	12	6.80

Total	176	100.00
--------------	-----	--------

B. Present Employment Status

Table 3 shows the present employment status of the tracked graduates. The data show that half of the population are working as contractual/casual employees with the percentage of 55.11. 25% work as permanent or regular employee, 8.52% work as temporary, 6.8% are never employed and 4.55% are self-employed.

Table 3
Present Employment Status of BEED Graduates

Employment Status	Frequency	Percent
Permanent or Regular	44	25.00
Contractual	97	55.11
Self-Employed	8	4.55
Temporary	15	8.52
Never Employed	12	6.8
Total	176	100.00

C. Nature of Occupation

Table 4 shows the type of occupation of the tracked graduates in their employment. Majority of the graduates are employed as professionals with the percentage of 57.95. Those with special occupation got the least percentage of 4.55. Results indicate that the level of employment that the graduates have is parallel to their obtained degree in College.

Table 4
Type of occupation of graduates in their employment

Nature of Occupation	Frequency	Percent
Not Employed	12	6.82
Professional	102	57.95

Service Worker/Shop and Market Sales	43	24.43
Trades and Related Workers	11	6.25
Special Occupation	8	4.55
Total	176	100.00

D. Place of Work

Table 5 presents the place of work of the tracked graduates. It shows that most of the graduates are working locally with the percentage of 87.50. Those who are not employed got 6.82% and those who work abroad got 5.68% of population.

Table 5

Place of work of BEED Graduates

Place of Work	Frequency	Percent
Not Employed	12	6.82
Local	154	87.50
Abroad	10	5.68
Total	176	100

Advanced Studies Pursued

Table 6 reflect the advanced studies being pursued after graduation from the college. Of the 176 respondents 81 (46.02%) are still pursuing their Master's Degree, 72 (40.91%) are not enrolled in the graduate school, 19 (10.8%) were full pledged masters and 4(2.27%) are enrolled in the doctoral.

Table 6

Advanced studies pursued by the respondents.

Advanced Studies	Frequency	Percent
EdD/PhD	0	0

with units in EdD/PhD	4	2.27
MAED/MAT/MM	19	10.8
with units in MAED/MAT/MM	81	46.02
None	72	40.91
Total	176	100

Promotion in Present Job

In terms of promotion received by the respondents it is reflected in figure 1. Of the 176 respondents 108 (61.36) are not promoted while 68 (38.64%) are promoted.

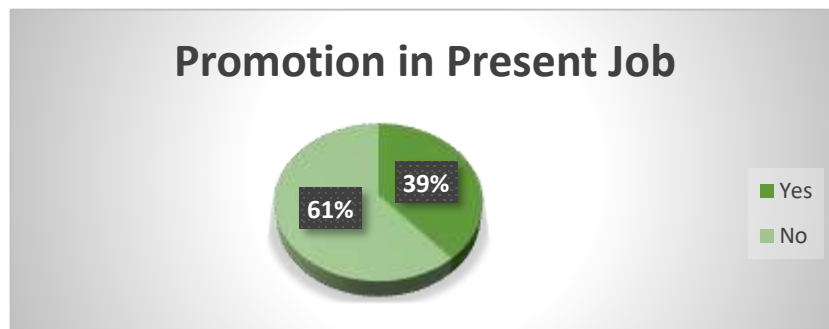

Figure 1. Promotion in present job of the respondents.

Extent of Job Performance of the Respondents.

Data revealed in Figure 2 is the self-rating assessment of the respondents in their job performance. Among the 176 respondents, 23 (13 percent) rated themselves *Outstanding* (O), 67 (38 percent) rate themselves *Very Satisfactory* (VS), 44 (25 percent) while 42 (24%) did not respond. This implies that the BEED graduates are the top performing employees in their respective workplaces.

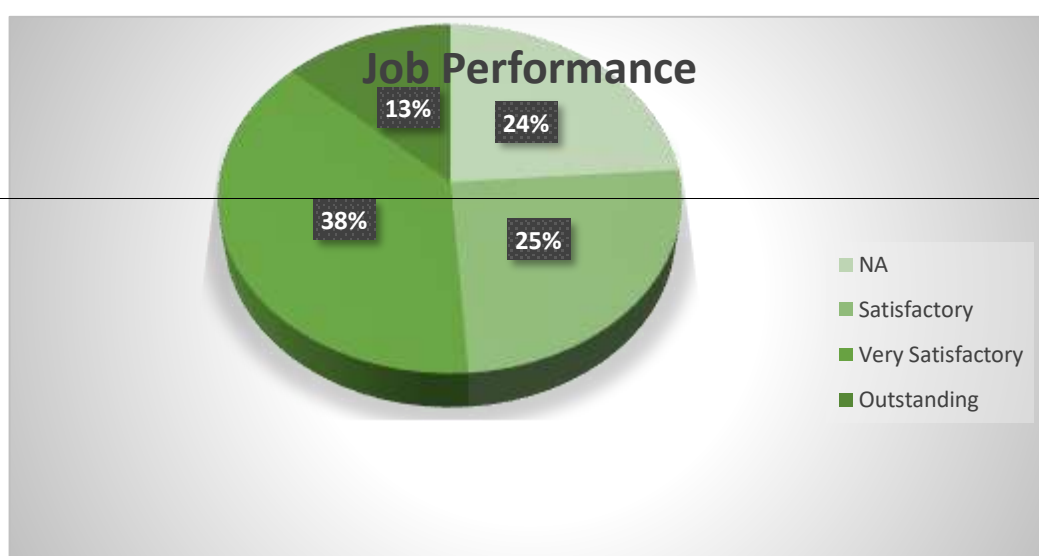

Figure 2. Job performance of the respondents.

(13) Conclusions and Recommendations

Conclusion

1. Graduates of 2015-2019 find ways to become employed even though in contractual status, and pursued master's degrees for their professional growth.
2. Moreover, they were not promoted in work although they had commendable job performance

Recommendations

1. Employers may give adequate attention to upgrading the employability status of their workers, specifically on a job promotion, to fulfill the contextual dimension of job performance.
2. With the limitation on generalizability due to the low response rate, an extensive yearly tracer study is recommended to track the employability status of the graduates.

(14) Output (Indicate the specific products, processes or services which the project has produced; quantify when possible.)

None

(15) Technology Transfer Activity Conducted (Indicate the specific products, activity design, processes or services transferred as extension activities)

None

(16) Economic Analysis (This should present the direct cost of project implementation, expenses in the production of technology, revenues generated from technology produced, return on investment (ROI) and payback period.

None

(17) Acknowledgments (Include only important persons and institutions with involvement in funding and conduct of the research. Justify paragraphs with main headings in caps.)

None

(18) References (It should include only works mentioned in the text and should be arranged alphabetically. Citations shall not be less than 13 entries. This must follow the APA latest edition format, in hanging indentation with 12-point space in between.)
