(7) Sector/Commodity	(8) Discipline/Field of Specialization Education
(9A) Abstract This Tracer Study Report presents relevant data on profile of graduates of the program Bachelor of Secondary Education (BSED) majors in English, Mathematics, Biological Science, Social Studies, and Filipino covering the batches 2015 - 2019. The specifics of this report include: 1. Personal data of tracked graduates; 2. Employment status; 3. Present Occupation; 4. Relevance of work to degree; 5. Employability after graduation; 6. Compensation from first job; 7. Job performance through self-rating and as evaluated by superiors (9B) Keywords Tracer Study, BSED graduates, employability, job performance, employers' feedback, Batches 2015-2019, College of Education, Arts and Sciences	
(10) Introduction (This includes the rationale, background of the study, and objectives which are not divided by subheadings. Incorporate at least three (3) reviews) The university's performance is correspondent to the performance of its graduates. It mirrors the graduates' academic, professional and job achievements; hence it is indispensable to conduct a tracer study to validate this claim. The study conducted by the <i>Performance of the Graduates Team</i> aims to describe the BSEd graduates' academic achievements, professional developments achieved after college, employment, extent of job performance, promotion, and awards/recognition. Results of the study are deemed beneficial in identifying entry points for program strengthening and revolutions to be implemented by the college to help accelerate the university's feat and distinction.	
(11) Methodology This study used the descriptive-quantitative complete enumeration research design to describe the educational background, trainings/ advanced studies attended after college, employment, promotion, and awards/recognition of the respondents after their graduation from Bachelor of Secondary Education (BSEd) of CapSU Pontevedra. A researcher-made questionnaire through Google Forms was utilized as a data gathering instrument. The

			Page	Page 3 of 20

respondents of the study were the 472 graduates of the **Bachelor of Secondary Education (BSEd) majors in English, Math, Science, Social Studies and Filipino** at the College of Education, Arts and Science of CapSU Pontevedra Campus covering batch 2015 to batch 2019. The data were computer-processes using the Statistical Package for Social Science (SPSS) for reliable and accurate data analysis. Descriptive statistics such as frequency counts, percentages, and mean were employed in analyzing the quantitative data.

(12) Results and Discussions

A. Personal Data of Tracked Graduates

Response Rate. The following Table 1 presents the number of tracked graduates by year of graduation and degree program compared to the total number of graduates. The data source for this study constituted 472 out of 628 graduates or 75.15 %. The BSED Mathematics graduates has the highest response rate (96.15 %) in the overall count while the BSED Social Studies has the lowest response rate (49.62 %). The limitations encountered in the tracking of graduates were due to: 1. No active contact with graduates after graduation due to travel restrictions or transfer of residence; 2. No/low internet connectivity; 3. Inactive social media accounts; 4. Deliberate non-response to instrument sent.

Some Personal Information

Table 2 below summarizes the data on civil status, sex and place of residence of the graduates. Majority of the graduates are female, single and live in municipalities.

B. Employment

Table 3 presents the employment status of the graduates by program. It shows the number of graduates who are presently employed, unemployed or never employed. The data show that the programs have commendable extent of employability among the graduates with an overall employment rate of 92.80%.

Present Employment Status

The following Table 4 shows the present employment status of the tracked graduates. The data show that about half of those employed are working as contractual/casual employees or contractual while about half are employed as permanent or regular employees. Among the programs, the BSED Science and BSED Filipino graduates have the highest employment rates for permanent or regular positions.

			Effective Date	
			Page	Page 4 of 20

C. Present Occupation

Majority of the graduates across the programs are employed as professionals. It indicates that the level of employment that the graduates have is parallel to their obtained degree in college.

First Job or Not

The following table shows the responses of the graduates as to whether their present employment is their first job or not. Data show that across areas of specialization, majority of the graduates are on their first job with an average of about 63.98%.

D. Relevance of Job to Degree

One of the most important indicators of the relevance of the program is the congruence of the degree and the resulting employment of the graduates. In the following Table 7, data show that in all programs, most of the graduates are employed in teaching-related jobs (63.14%)

E. Employability after Graduation

Another indicator of the relevance of the program is in terms of the demand of the industry of its graduates. When the graduates are hired the soonest time possible, the program answers to the needs of the workplace. In the teaching profession however, the graduates will have to pass the licensure examination first before they can be qualified to teach, although there are exceptions in the case of private schools which may hire fresh graduates and the license. Table 8 below shows that about 42% of the graduates were hired within one (1) year after graduation and about 90% were hired within two (2) years after graduation.

F. Initial Compensation from First Job

The following table shows the first salaries of the graduates once employed. About 15% of the graduates received an initial salary of less than Php 5 000 in their first job. This often is the case of those who are hired right after graduation considering that the graduates have no license yet or work-related experience while about 50% received salaries ranging from 5 000 to less than 15 000.

G. Current Job Performance

The current job performance as rated by the graduates themselves is found to be exemplary. About 73 % of the graduates have very satisfactory and outstanding performance. When the employers were asked to evaluate the quality of job performance of the graduates, the performance is even highly commendable.

Employer's Feedback for Teachers (Non-Teaching)

Below is the summary of the employer's feedback on the quality of job performance of the 115 graduates (non-teaching) with focus on knowledge, skills and work attitude. The employers perceive the graduates to have commendable work ethics in the performance of duty of the latter.

Employer's Feedback for Teachers (Teaching)

Below is the summary of the employer's feedback for the graduates who are practicing the teaching profession on the quality of job performance of the graduates with focus on knowledge, skills and work attitude.

Knowledge, Skills and Attitudes. The job performance of the **BSEd** graduates are further verified through their superiors' quantitative and qualitative assessment of the knowledge, skills and attitudes.

As for the 200 graduates who are into instruction in basic and higher education institution, their job performance in teaching effectiveness was assessed by their immediate superiors on the areas of teaching performance standards such as content knowledge and pedagogy, learning environment, diversity of learners, curriculum and planning, assessment and reporting, community linkages and professional engagement, and personal growth and professional development. Results shows that the average performance of the graduates in knowledge and attitudes is *Outstanding* (O) and *Very Satisfactory* (VS) for their skills. In general, the performance for teaching effectiveness was *Outstanding* (O).

The commendable job performance of the **BSEd** graduates in instruction entails that the graduates have achieved a distinguished position in their respective career tracks. An advanced degree in education has enabled them to achieve maturity personally and professionally which places them ahead of the pack.

(13) Conclusions and Recommendations

The following conclusions are drawn from the data gathered on the tracked graduates of the BSED program:

1. Majority of the graduates are females, single, and currently live in the municipalities closer to where their workplaces are situated.
2. Almost all of the graduates are presently employed and about half of those employed have permanent/regular employment status.

	Document Type:	Document Code	RES- CR-01
	DOCUMENTED INFORMATION ISO 9001:2015	Revision No.	00
	Document Title:	Effective Date	
	COMPLETED RESEARCH	Page	Page 6 of 20

3. A greater number of graduates are employed as professionals, specifically as teachers or degree-related occupations, in their first or current jobs.

4. Most graduates are employed within the first two years after graduation.

5. Majority of the graduates received salaries lower than minimum wage on their first jobs.

6. The current job performance of the graduates are commendable.

In view of the findings of the study, the following are recommended:

1. Regular updating of alumni directory has to be maintained to widen the tracking of graduates.

2. The College may call for Alumni Homecoming to actively engage the graduates on the programs of the College and to foster camaraderie and fellowship among the graduates.

3. Other information relevant to career advancement of graduates may be considered in future tracer studies.
