(7) Sector/Commodity	(8) Discipline/Field of Specialization Education
(9A) Abstract The success or failure of a graduate degree program can be measured through the performance of its graduates. This tracer study was conducted to account the job performance, satisfaction and achievements of the 22 Master in Management (MM) graduates of the College of Education, Arts and Sciences of CapSU Pontevedra for the period 2015-2022 utilizing the descriptive-quantitative complete enumeration design with a researcher-made questionnaire used to gather the needed data through the Google Forms. Result show the MM graduates are generally young age adult; mostly females; majority are graduates of Batch 2019; have spent less than a decade in the government service appointed as Teacher 3 and employed as middle-rank school administrator and teachers in basic education institution and are designated to two or more academic and administrative or supervisory tasks allied to their appointed positions. They performed outstandingly in their respective jobs as school heads and teachers in terms of knowledge, skills and attitudes. They are found to be generally very satisfied in their present work, compensation, appointed position, performance of duty, colleagues, and workplace conditions. Promotions and awards received suggest favorable achievements from pursuing or obtaining MM degree	
(9B) Keywords Job performance, job satisfaction, achievements, Master in Management	
(10) Introduction (This includes the rationale, background of the study, and objectives which are not divided by subheadings. Incorporate at least three (3) reviews) Graduate tracer studies have come to represent one of the key approaches for enhancing study programme effectiveness in contemporary higher education (Hope & Ansah, 2020). Moreover, graduates' employability is among the key issues pertaining to higher education institutions (HEIs), employers, students and other stakeholders (Abbas & Sagsan, 2020). With the emphasis of Commission on Higher Education (CHED) on outcomes-based education, the focus of evaluating the effectiveness of academic programs of a university is on the quality and quantity of outcomes—learning and graduates and not solely on its instructional inputs and faculty (CHED, 2014). This study traced the MM graduates of the College of Education, Arts and Sciences of Capiz State University Pontevedra Campus from Batch 2015 to Batch 2022 to look into how they have advanced in their career tracks after finishing their respective degrees. The study specifically attempted to describe their personal profile, job performance, job satisfaction, and the achievements gained in their workplaces after graduation. Results of the study are deemed beneficial in identifying entry points for program enhancement and innovations to be implemented by the college to help accelerate the university's performance and stature.

Statement of the Problem

This study aimed to answer the following questions:

1. What is the profile of the respondents in terms of:
 - a. age,
 - b. sex,
 - c. year graduated
 - d. length of service
 - e. work assignment/ employment
 - f. appointed position, and
 - j. number of designated tasks?
2. What is the extent of job performance of the respondents in their work?
3. What is the extent of satisfaction of the respondents in their jobs in terms of
 - a. work,
 - b. compensation,
 - c. present position,
 - d. performance of duty,
 - e. satisfaction with colleagues, and
 - f. satisfaction with workplace condition?
4. What are the achievements gained by the respondents after completing their degrees in terms of
 - a. awards; and
 - b. promotion?

(11) Methodology

This study used the descriptive-quantitative complete enumeration research design to describe the profile, job performance and satisfaction, and achievement of the respondents after graduation from the Master in Management Program of CapSU Pontevedra.

The study was conducted at the College of Education, Arts and Science Teacher Education Department, from September to October 2022.

A researcher-made questionnaire through Google Forms was utilized as a data gathering instrument. It is comprised of 4 parts, namely, profile, job performance, job satisfaction, and achievements like awards and promotions.

The respondents of the study were the 22 graduates of the Master in Education (MM) major in Educational Management at the College of Education, Arts and Science of CapSU Pontevedra Campus covering batch 2015 to batch 2022 (Table 1). Among the 22 respondents, 6 (27.3 percent) are graduates of Batch 2019; 4 (18.2 percent) of them are from Batch 2018; 3 (13.6 percent) are from Batch 2022; Batch 2015, 2016, 2017 and 2020 have 2 (9.1 percent) graduates respectively; and Batch 2021 has 1 (4.5 percent) graduate. This study has traced 100 percent of the MM program graduates.

The data were computer-processes using the Statistical Package for Social Science (SPSS) for reliable and accurate data analysis. Descriptive statistics such as frequency counts, percentages, and mean were employed in analyzing the quantitative data.

(12) Results and Discussions

Respondents Profile

Age. Figure 1 shows the distribution of the respondents according to age. Among the 22 respondents, 8 (36.4 percent) of them age 30-39 years old; 5 (22.7 percent) of them are younger than 30 years old; 4 (18.2 percent) of them belonged to the age bracket of 40-49 years old; 3 (13.6 percent) of them have ages ranging from 50 to 59 years old; and 2 (9.1 percent) are 60 years old and older. On the average, the respondents 39 years old and are young age adult.

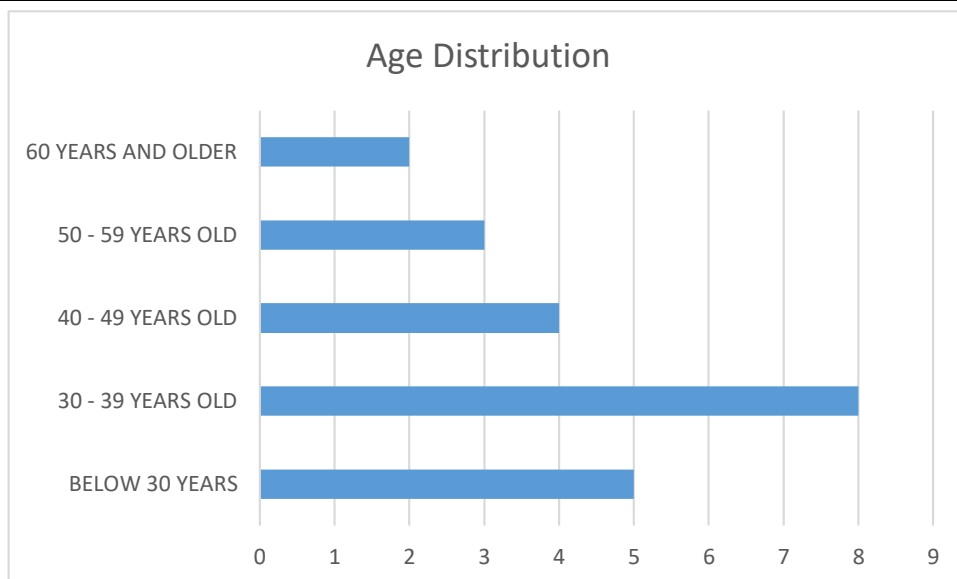

Figure 1. Distribution of respondents according to age.

Sex. Table 2 shows the distribution of the respondents according to sex. Data revealed that 14 (63.63 percent) of the respondents are females and 8 (36.37 percent) of them are males. This implies that the MM graduates from School 2015 to 2022 are dominated by females.

Table 2. Distribution of the respondents according to sex.

SEX	FREQUENCY	PERCENT
Male	8	36.37
Female	14	63.63
TOTAL	22	100.00

Year Graduated. Figure 2 shows the distribution of the respondents according to year graduated. Data revealed that among the 22 respondents, 6 (27.3 percent) are graduates of Batch 2019; 4 (18.2 percent) of them are from Batch 2018; 3 (13.6 percent) are from Batch 2022; Batch 2015, 2016, 2017 and 2020 have 2 (9.1 percent) graduates respectively; and Batch 2021 has 1 (4.5 percent) graduate. This study has traced 100 percent of the MM program graduates

Length of Service. Figure 3 shows the distribution of respondents according to length of service. Data revealed that 8 (36.4 percent) of the respondents have served the government on the average of 6-10 years; 4 (18.2 percent) have served for 5 years and below and 11-15 years respectively; and 3 (13.6 percent) have served for 16-20 years and 21 years and above. On the average, they are in the service for 12 years and 27 months.

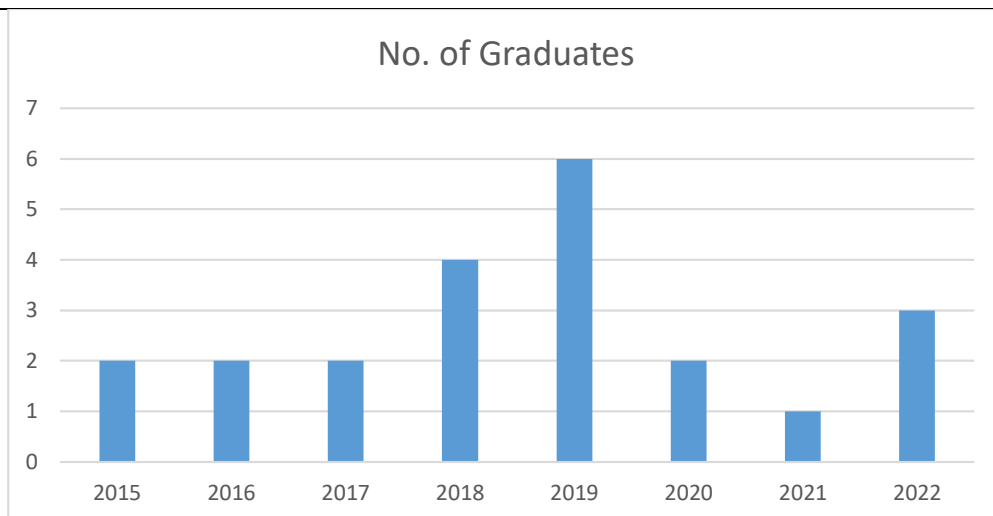

Figure 2. Distribution of respondents according to year graduated

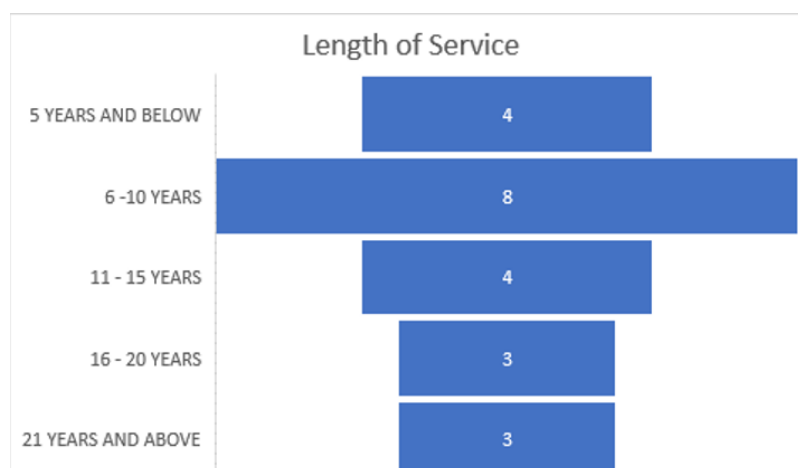

Figure 3. Distribution of respondents according to length of service

Work Assignment/ Employment. The respondents of the study are into different work assignments ranging from non-academic supervisory tasks to academic supervisory tasks in education. Looking closely, non-academic supervisory tasks include, namely, School Information Coordinator, School Monitoring, Evaluation and Adjustment (SMEA) Focal Person, School Enrolment Coordinator, SBM Coordinator, OIC of school, Feeding Coordinator, Faculty President, GAD Focal Person, Human Resource Training Officer, Health Coordinator, Brigada Eskwela Coordinator, Kab Scout Coordinator, On-the-Job Training Coordinator, Property Custodian, BE-LRCP Vice-Chair. Meanwhile, the respondents' academic supervisory tasks are Class Adviser, ICT Coordinator, SSES Coordinator, Science Coordinator, MAPEH Coordinator, District English Coordinator, Learning Resource Focal Person, Curriculum Chair, EPP Coordinator, Grade Chairman, District Research Core Team Member. This shows that most of those pursuing doctorate degrees are employed in government institutions implying that there are motivating factors in the government service for employees to seek advanced education.

Appointed Positions. Data revealed that 100 percent of the respondents are regularly or permanently appointed in the Department of Education (DepEd). Figure 4 shows the present positions occupied by the respondents. Among the 22 respondents, 9 (40.9 percent) are Teacher 3; 6 (27.3 percent) are Teacher 2; 2 (9.1 percent) are Teacher 1 and Head Teacher 1; and 1 (4.5 percent) are Master Teacher 1, Teacher 3/Teacher-In-Charge, and Human Resource Manager.

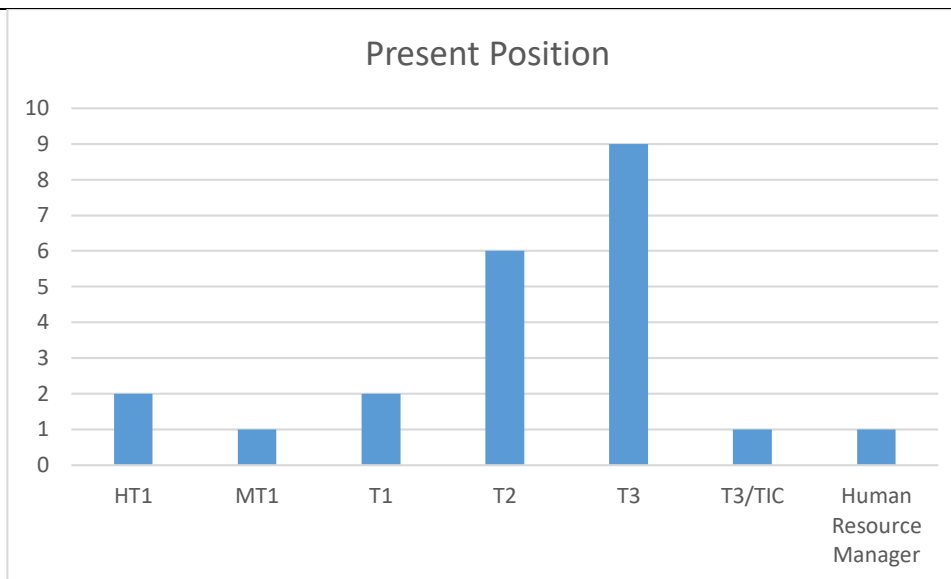

Figure 4. Distribution of respondents according to appointed positions.

Number of Designated Tasks. Data revealed on Figure 5 the number of designated positions. Among the 22 respondents, 17 (77.3 percent) of them have two or more designations; and 5 (22.7 percent) have one designations.

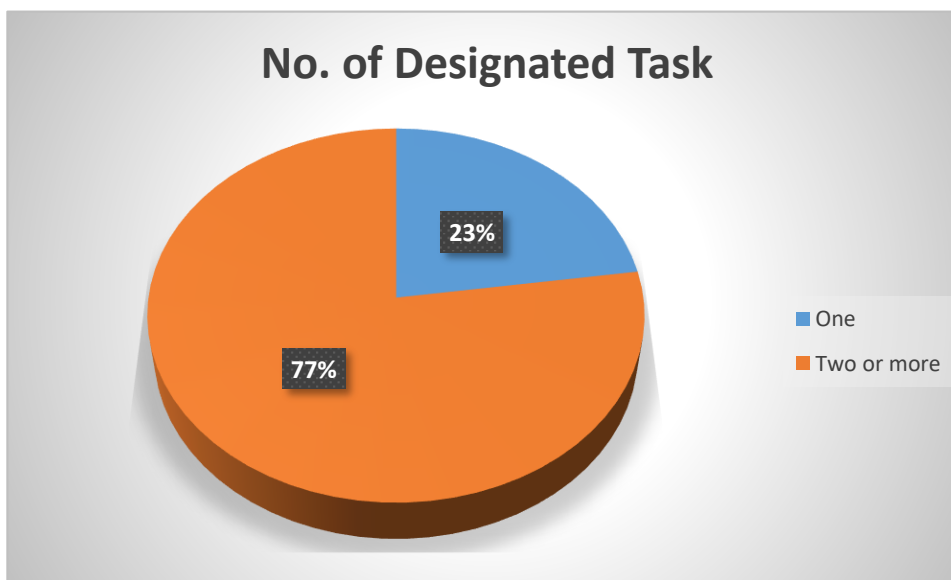

Figure 5. Distribution of respondents according to number of designated tasks.

Extent of Job Performance of the Respondents.

Data revealed in Figure 6 is the self-rating assessment of the respondents in their job performance. Among the 22 respondents, 20 (90.9 percent) rated themselves *Outstanding* (O) while 2 (9.1 percent) rate themselves *Very Satisfactory* (VS). This implies that the MM graduates are the top performing employees in their respective workplaces.

Knowledge, Skills and Attitudes. The job performance of the MM graduates are further verified through their superiors' quantitative and qualitative assessment of the knowledge, skills and attitudes.

As for the respondents who is holding administrative positions, the assessment of their KSA was based on the dimension of school leadership that include leading strategically, managing school operations and resources, focusing on teaching and learning, developing self and others, and building connections. Results show that the respondents are rated *Outstanding* (O) by their superiors with perfect ratings in all dimensions. The superiors' description of the MM graduates' performance are as follows: 1) possess wide and thorough knowledge as far as managing the school and leading the subordinates (knowledge); 2) equipped with enough skills to handle situation and advance herself to the needed settings (skills); and 3) manifested the quality of a proficient leader that can carry the vision, mission and values of the Department (attitudes).

As for the remaining 21 graduates who are into instruction in basic and higher education institution, their job performance in teaching effectiveness was assessed by their immediate superiors on the areas of teaching performance standards such as content knowledge and pedagogy, learning environment, diversity of learners, curriculum and planning, assessment and reporting, community linkages and professional engagement, and personal growth and professional development. Results shows that the average performance of the graduates in knowledge and attitudes is *Outstanding* (O) and *Very Satisfactory* (VS) for their skills. In general, the performance for teaching effectiveness was *Outstanding* (O).

7. Personal Growth & Professional Development	4.95	Outstanding	4.84	Outstanding	4.79	Outstanding	4.86	Outstanding
Average	4.77	Outstanding	4.46	Very Satisfactory	4.79	Outstanding	4.67	Outstanding

Note: Interpretation is based on the scale: 1.00 – 1.49 (Did not meet standards), 1.45 – 2.49 (Fairly Satisfactory), 2.5 – 3.49 (Satisfactory), 3.5 – 4.49 (Very Satisfactory), 4.5 – 5.00 (Outstanding).

The commendable job performance of the MM graduates in both instruction and administrative aspects entail that the graduates have achieved a distinguished position in their respective career tracks. An advanced degree in education has enabled them to achieve maturity personally and professionally which places them ahead of the pack.

Extent of Satisfaction of the Respondents in their Jobs

Work. Figure 7 shows the respondents’ job satisfaction in terms of work. Data revealed that on the average, the respondents are *very satisfied* (M=4.04) on their work. In detail, 9 (40.9 percent) of them are *extremely satisfied*; 8 (36.4 percent) of them are *satisfied*; and 5 (22.7 percent) are *very satisfied*. This implies that the MM graduates of CAPSU Pontevedra are contented of their present work.

Figure 7. Respondents’ job satisfaction in terms of work

	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 12 of 17

Compensation. Figure 8 shows the respondents' job satisfaction in terms of compensation. Data revealed that on the average, the respondents are *very satisfied* (M=3.64) on their compensation. Looking at the data, 9 (40.9 percent) of the 22 respondents are *extremely satisfied* on the compensation that they received; 8 (36.4 percent) of them are *satisfied*; and 5 (22.7 percent) are *very satisfied*. This implies that the MM graduates find that the compensation they received reciprocates their performance of duty in their job.

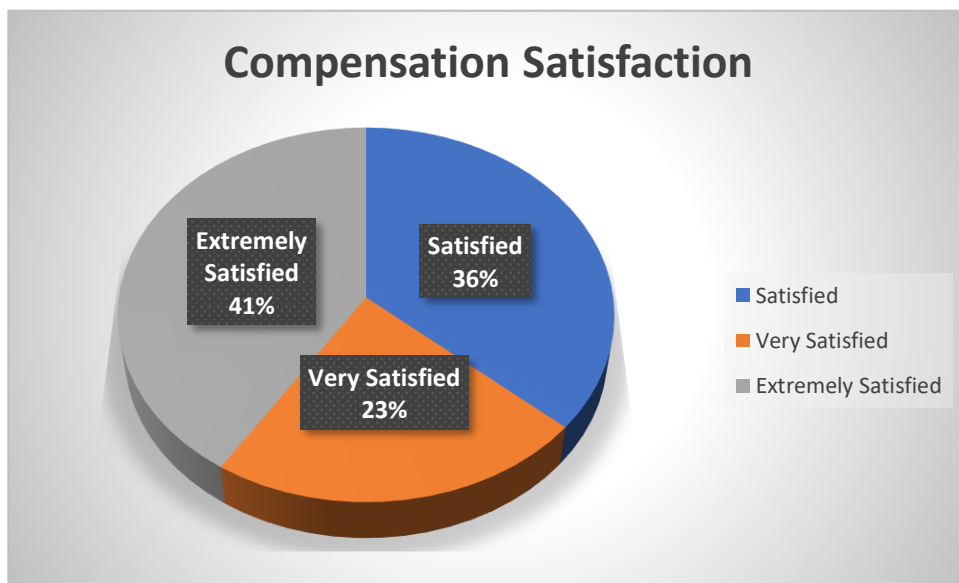

Figure 8. Respondents' job satisfaction in terms of compensation.

Position. The data revealed that generally, the respondents are *very satisfied* (M=3.68) in their present position (Figure 9). Looking closely, 10 (45.5 percent) of them are *satisfied*; 6 (27.3 percent) are *very satisfied*; 5 (22.7 percent) are *extremely satisfied*; and 1 (4.5 percent) is *dissatisfied* in the position occupied at present. This implies that the MM graduates are occupying position that bring fulfilment, ones that address their professional and personal concerns in a workplace in which they are proud and respected; thus, boosting their self-regard or morale.

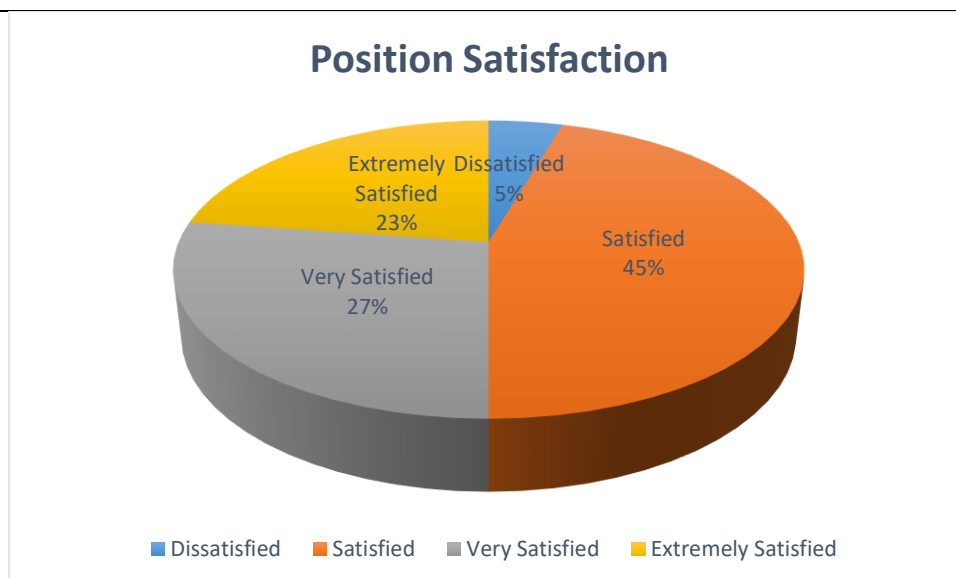

Figure 9. Respondents' job satisfaction in terms of position.

Performance of Duty. Data revealed that the respondents are *very satisfied* ($M=4.14$) with their job in their performance of duty (Figure 10). In detail, 9 (40.9 percent) of them are *very satisfied*; 8 (36.4 percent) of them are *extremely satisfied*; and 5 (22.7 percent) of them are *satisfied*. This implies that the MM graduates are happy while performing their duties and other designations in the workplaces.

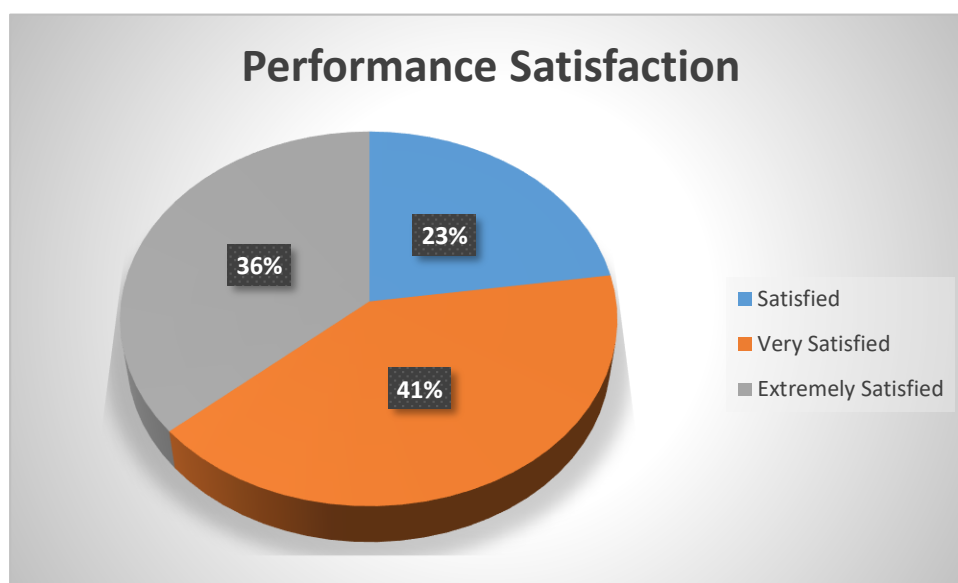

Figure 10. Respondents' job satisfaction in terms of performance of duty

				Page	Page 14 of 17

Satisfaction with colleagues. Generally, the respondents are *very satisfied* (M=3.91) with their colleagues (Figure 11). Data further revealed that 9 (40.9 percent) are *very satisfied* with their colleagues; 6 (27.3 percent) of the are *satisfied* and *extremely satisfied* respectively; and 1 (4.5 percent) is *dissatisfied*. This reflects that the MM graduates take active role in maintaining productive interpersonal and professional relationship with colleagues. As educational leaders cognizant of principles on the management of human behavior, they are expected to be great team players in leading the group to achieve its goals.

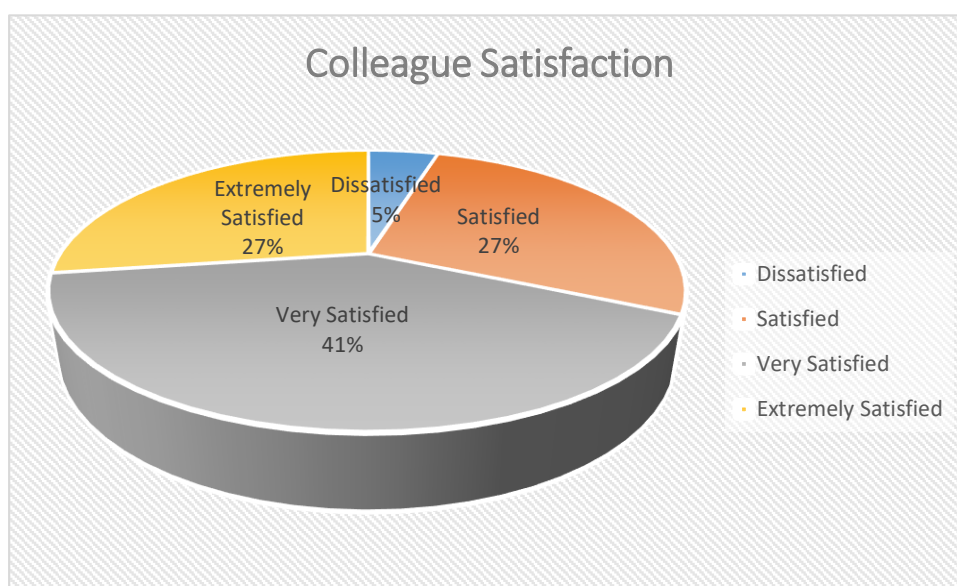

Figure 11. Respondents' job satisfaction in terms of satisfaction with colleagues.

Satisfaction with workplace condition. The data revealed that the respondents are *very satisfied* (M= 4.00) in their workplace condition (Figure 12). Meanwhile 8 (36.4 percent) of them are *very satisfied* with the workplace condition; and 7 (31.8 percent) are *satisfied* and *extremely satisfied* respectively. None of them is *dissatisfied* with their workplace condition. This goes to show that the MM graduates possess a higher degree of tolerance of varying work condition; have the ability to thrive in challenging or adverse work conditions and committed to stay in their respective work stations.

Achievements Gained by the Respondents after Graduation

Awards. Data on table 6 revealed that 18 (81.8 percent) of the respondents did received awards and only 4 (18.2 percent) of them are non-recipients after completing or while pursuing the degree. To elaborate, these are the awards received by the MM graduates of CAPSU Pontevedra namely, Brigada Eskwela Recognition for Focal Persons granted by the DepEd with 2 recipients; Dungog sang Banwa Award by LGU; and Best Research Paper Award by the Research Department.

They also received subsequent awards (Table 7) such as Brigada Eskwela Recognition for Focal Persons granted by the DepEd; Outstanding Teacher Award by the DepEd; and Pest Poster Award by Research Department.

Table 6. Awards received by the respondents

AWARDS RECEIVED	NATURE OF AWARDS	LEVEL	NO. OF ALUMNI-RECIPIENTS

1. Outstanding Teacher	DepEd Commendation	Local	1
2. Brigada Eskwela Recognition for Focal Persons	DepEd Commendation	Local	1
3. Best Poster Award	Research	Local	1

Promotion. A larger percentage of the respondents were promoted after graduation in MM or while they are pursuing their degrees. Data revealed that 18 (81.8 percent) were promoted and 4 (18.2 percent) were not promoted. This implies that their degrees had been one of the contributory factors of their promotions in their jobs.

Table 8. Promotion of the respondents

PROMOTION DURING AND AFTER DEGREE COMPLETION	FREQUENCY	PERCENT
Promoted	18	81.8
Not Promoted	4	18.2
Total	22	100.0

(13) Conclusions and Recommendations

Conclusions

1. The respondents covering the graduates of the MM program from 2015-2022 are generally young age adult; mostly females; majority are graduates of Batch 2019; have spent less than a decade in the government service appointed as Teacher 3 and employed as middle-rank school administrator and teachers in basic education institution and are designated to two or more academic and administrative or supervisory tasks allied to their appointed positions.

2. The respondents have commendable job performance as school heads or faculty.

3. The respondents find satisfaction and love for their job suggesting that their MM degrees have prepared them for the nature of their work and the performance of corresponding duties and responsibilities, secured a proportionate position with competitive compensation,

	Document Type:	Document Code	RES- CR-01
	DOCUMENTED INFORMATION ISO 9001:2015	Revision No.	00
	Document Title:	Effective Date	
	COMPLETED RESEARCH	Page	Page 17 of 17

equipped them with the desirable competencies to establish and maintain harmonious relationships with the colleagues, and conducive working environment.

4. The respondents have grown and advances professionally in their respective career tracks through promotions and awards received in the performance of duty in the academe.

RECOMMENDATIONS

1. The college may intensify its campaign for the MM program to attract young school heads and teachers as soon to be school administrators to enroll in the program and finish their degrees within the prescribed period.

2. The enhancement of the MM students' research skills is encouraged to fully capacitate them in conducting researchers in their respective workplaces to advance education as a proof of translated program outcomes of the college.
