(9A) Abstract

One of the core functions of the academic institutions is to effect change by empowering the people in the community by way of extension programs and services. This paper evaluated the impact of the community extension programs on the residents of Barangay Talon, Adlawan, and Punta Tabuc, Roxas City, and helped diagnose what programs needed further improvements. A descriptive-evaluative method was used. The respondents believed that the extension program had enhanced their skills as recipients of Capiz State University Roxas City Main Campus College of Education Extension Program. The respondents believed that College of Education Extension Programs have contributed a lot to the partner community in enhancing the skills and augmented the income of the residents. The respondents also perceived the necessity of improving the community extension programs of College of Education. The trainings must be planned, organized and systematically be implemented in order to have great impact to the clientele and to the community. Also needs assessment survey must be done first in order to suit the interests of the clientele.

(9B) Keywords : Extension program, Impact assessment, Communities, Adopted barangays

(10) Introduction

Higher Education Institution (HEI) has been mandated by the Commission on Higher Education (CHED) to extend their educational and civic services to the communities. An example of such policies is the Republic Act 9163, otherwise known as the "National Service Training Program (NSTP) Act of 2001", which highlights the commitment of HEIs to provide, promote and sustain community service. Recently, the Commission has initiated efforts to re-direct extension programs under CHED Memorandum Order 52, series of 2016. The policy provides some guidelines on HEI community extension programs for the "provision of space to discover practical, evidence-based and science-based answers that can address real-world social, economic, and environmental challenges of partner citizens and communities." As producers of knowledge or hubs of innovations, the new extension policy posits that HEIs are in a strategic position to work in partnership with communities, business, and industry in facilitating the transfer of knowledge or technology on specific developmental areas.

Extension activities instituted by HEI's is considered as "service learning" according to Tumapon, (2016). This has been the common trend not only in HEI's but equal to all academic institutions regardless of its category, private or public. This is the response of the academic institutions to the pressing concern of poverty, equality, social and civic problems and the improvement of the quality of life in the community. This was supported by Dotong and Laguador, (2015) they emphasized the role of Higher Education Institution's in building a strong community with empowered residents.

Educational institutions, as the pillar of social development, have the social responsibility to be involved in empowering communities and in transforming lives through knowledge and technology transfer by way of trainings, workshops, seminars, and technical advisories. According to Gonzales (2009), an integrated extension approach is needed to address multi-faceted community issues effectively. Dilao (nd a) in her study on the impact of community extension program on the residents of Barangay Catadman-Manabay averred that issues in the community will not be solely addressed by the local government officials nor by the residents, but these need a knowledge-based sector and the academe for it to come up with a scientific diagnosis with regard to the occurrences of problems in the community.

This research study was undertaken to help improve the planning of a specific program and assess the extension programs and services of CAPSU covering formidable tasks of being responsive and sustainable extension services through its pilot and model special projects, capability building or training; Information, Education and Communication (IEC) Materials Development, Research on Extension, Case Studies, and process documentation and related Activities.

Objectives of the study:

1. What is the level of perceived effect of the services extended by Capiz State University College of Education Graduate Program to the communities and individuals?
2. What is the level of perceived influence of extension programs to the respondents?
3. What is the extent of perceived reasons of respondents' participation in the extension program?
4. What is the extent of perceived reasons for the improvement of extension program?

(11) Materials and Methods or Methodology

Research Design

The research design was a descriptive-evaluative method, with the aim to assess the overall effects of the extension programs and activities implemented by the extension implementers of the Capiz State University College of Education. This evaluation type of research intends to gain an understanding of the successes and challenges that the Extension implementers face so as to guide future activities in a positive way. According to

			Page	Page 3 of 8

Meadows, et al. (2004), extension agents need to believe that evaluations designed for learning means the willingness to collect information about the effects of action, including the crucial but not always welcome information that the action is not working.

Research Locale

This study was conducted in the adopted barangays of barangays Talon, Adlawan and Punta Tabuc, Roxas City. These three (3) barangays/communities were specifically selected as these are the communities where extension programs were implemented for a couple of years now.

Respondents of the Study

The respondents of the study were the beneficiaries of the extension programs and activities of the Capiz State University (CAPSU) Roxas City Main Campus College of Education. Purposive sampling technique was used in selecting the respondents of the study. Purposive sampling was utilized because only those concerned recipients or beneficiaries in the adopted barangays of barangays Talon, Adlawan and Punta Tabuc, Roxas City, Philippines were preferred to assess the impact of extension services, delivered and/or implemented by the extension implementers of the university. For all these adopted barangays/ communities, they were given the same number of questionnaires. Only the retrieved questionnaires were used in this study. Thus, a total of 90 recipients or beneficiaries served as respondents in the study.

Research Instrument

The main tool that was used by the researcher in this study was a survey questionnaire which was adopted from the study of Dilao (nd b). Slight revision and modifications were made in the instrument. The questionnaire was made up of two parts. Part I gathered the demographic profile of the respondents. Part II elicited the impact of the extension services on the recipients, which was composed of six (6) questions.

Statistical Treatment

Frequency and percentage distribution of the SPSS were used to describe the impact of extension programs and activities to the residents of barangays Talon, Adlawan, and Punta Tabuc, Roxas City.

(12) Results and Discussions

The results of the study conducted are presented in the following tables and discussions.

Level of perceived effects of extension programs to the community

Table 1 manifests the level of perceived effects of community extension program of Capiz State University Roxas City Main Campus College of Education in Barangay Talon, Adlawan and Punta Tabuc, Roxas City. Respondents revealed that it helped augment the income of their families (M=4.83). Hence, the study found that it helped a lot to the community of the respondents (M=4.70). This study also found that the respondents confirmed that their knowledge and skills were enhanced (M=4.63), while they also averred that the CAPSU College of Education extension motivated the residents to establish livelihood projects in the community (M=4.53). Moreover, It prevented the youth and the mothers not to be indulged with vices (like drugs, gambling). These results signify that the community extension programs of CAPSU College of Education have contributed in one way or the other to the communities it served. These findings conform to other impact studies on extension programs of educational institutions conducted by Dilao (nd c), Herrera (2010), and Tacbas, et al. (2010).

Table 1: Level of perceived effects of extension programs to the community

Indicator	Mean	Verbal Interpretation
It helped augment the income of the families	4.83	Very Effective
It helped a lot to the community	4.70	Very Effective
It enhanced the knowledge and skills of the residents	4.63	Very Effective
It motivated the residents to establish livelihood projects in the community	4.53	Very Effective
It prevented the youth and the mothers not to be indulged with vices (drugs, gambling)	3.83	Effective
It helped the residents become aware of their rights, responsibilities and duties as citizens or members of the community	3.73	Effective

Level of perceived effects of community extension to the individual participant/ recipient/ beneficiary

Table 2 displays the level of perceived effects of community extension to the individual participant/ recipient/ beneficiary. It showed that the respondents were able to gain confidence (M=4.83) because of the skills they have gained (M=4.70). Respondent affirmed that they were able to augment their income M=4.61). Meanwhile, respondents were in agreement that CAPSU College of Education extension programs enabled them to find job (M=4.53), become more conscious of their environment (3.82), learned to mingle with other people, and able to go out from their home (M=3.73). These results signify that the clientele are empowered and built their confidence due to the knowledge and skills they have gained from the extension activities.

The results were confirmed by the statement of Respondent 1 that “*dako gid nga bulig sa amon may sakyan kami pa lawod piyan-piyan sa pagpangabuhì*” (It is a big help to us for we have something to use in going to the sea. It can lessen poverty.) Respondent 3 also said “*gapasalamat kami kay ginhatagan kami sang baroto adlaw-adlaw may kitaon kami sa lawod, kakuha kami isda*” (We are thankful that we have given the boat. We can go to the sea every day and earn a living by catching fish.). Respondent 4 also uttered “*nakabulig gid sa akon pagpangabuhì kay nagkita, ginagamit ko pangwelding sa balay, kag ginaparentahan ko man kon kisa*” (It really helped my life for I have earned, used it in welding at home, and sometimes had it rented by others).

Table 2. Level of perceived effects of community extension to the individual participant/ recipient/ beneficiary

Indicator	Mean	Verbal Interpretation
It helped boost my confidence.	4.83	Very Effective
I gained knowledge and skills.	4.70	Very Effective
It enabled me to increase my income.	4.61	Very Effective
It enabled me to find job.	4.53	Very Effective
I became more conscious of my environment.	3.82	Effective
I learned to mingle with other people and able to go out from our homes.	3.73	Effective

Level of perceived influence of extension programs to the respondents

Table 3 reflects the level of perceived influence of extension programs to the respondents. Based on the result, it made them feel that there are others who care for them and inspired them to care for their community M=4.83). It made them also happy especially when they have gained skills (M=4.67) and became more proud of it (M=4.60). It was also revealed that respondents were touched by the trainers (extension implementers) for their patience and willingness to help them (M=4.50), and were happy of the programs extended to them especially when they gained skills (m=4.67). It awaken their spirit of volunteerism (M=3.80). Hence, respondents declared that they now love to help their neighbors by sharing to them what they have learned from the trainers (extension implementers) (M=3.70). The results indicate that the respondent beneficiaries experienced gladness and wellbeing because of the skills they have acquired and they also become compassionate and helpful to their neighbors.

Table 3. Level of perceived influence of extension programs to the respondents.

Indicator	Mean	Verbal Interpretation
It made me feel that, there are others who care for me, inspired me to care for our community too	4.83	Very Influential
It made me happy especially when I have gained skills	4.67	Very Influential
It made me more proud	4.60	Very Influential
I was touched by the trainers (extension implementers) for their patience and willingness to help	4.50	Very Influential
It awaken the spirit of volunteerism in me	3.80	Influential
I now love to help my neighbors sharing to them what I have learned from the trainers (extension implementers)	3.70	Influential

Extent of perceived reasons of respondents' participation in the extension program

Table 4 reveals the Extent of perceived reasons of respondents' participation in the extension program of CAPSU College of Education. Respondents manifested their interest to learn and to gain many skills ($m=4.83$), while others find it beneficial ($M=4.67$) and was recommended then eventually in joining it ($M=4.50$). These simply mean that the beneficiaries of CAPSU College of Education extension programs were very eager to gain and to learn many skills, and that they were interested to join the programs.

Table 4:- Extent of perceived reasons of respondents' participation in the extension program.

Indicator	Mean	
I wanted to learn and to gain many skills	4.83	Absolutely appropriate
I find it beneficial	4.67	Absolutely appropriate
I was recommended then eventually I loved joining it	4.60	Absolutely appropriate
I am interested to join the programs	4.50	Absolutely appropriate
I was ashamed that the extension implementers will be the one to clean our surroundings	3.80	Appropriate
I am required by the Barangay officials	3.67	Appropriate

Need to improve the extension program

Table 5 depicted the need to improve the extension program of CAPSU College of Education extension programs as agreed by 87 respondents. This result candidly signifies that the extension programs must be improved

Table 5:- Need to improve the extension program.

Indicator	Frequency
Yes	87.00
No	3.00

Extent of perceived reasons for the improvement of extension program

Table 6 showed the reasons for improving the extension programs of CAPSU College of Education extension programs. Respondents affirmed that there must be advanced or higher ($M=4.63$), where trainings must be continuous ($M=4.60$) and many could also avail the programs ($M=3.83$). They also emphasized that clean-up drive must be weekly to see greater impact ($M=3.80$), there should be screening of the participants (to ensure their interest) ($M=3.73$) and all programs must be facilitated by College of Education to avoid duplication of programs ($M=3.70$). These results imply that the trainings must be planned, organized and systematically be implemented in order to have great impact to the clientele and to the community.

The results were confirmed by the statement of respondents that they want to be trained on disaster risk management so they can be prepared anytime if calamity strikes. This was reiterated by Respondent 1 that "*permi lang gaagi diri ang bagyo, Disaster Management para mag abot ang kalamidad preparado sila kag para may ediya sila kon papano ang pag manage*" (Typhoons are always coming here. We want to know about disaster risk management so we will be prepared and have idea on how to manage it). Respondent 2 also said he wanted to know how to preserve aqua marine products/resources when he uttered "*paano namon ma preserva amon panguha sa dagat*" (How could we preserve marine resources). Respondent 3 also wanted to have "*dugang pa nga skills training*" (More skills training).

Table 6: Extent of perceived reasons for the improvement of extension program

Indicator	Mean	Verbal Interpretation
There must be advanced or higher trainings (food preservation, processed foods, baking , entrepreneurial management, DRRM and Climate change	4.63	Absolutely appropriate
Trainings must be continuous for us not to forget the skills we learned	4.60	Absolutely appropriate
Many can avail the programs	3.83	Appropriate
Clean-up drive must be weekly to see greater impact	3.80	Appropriate
There should be screening of the participants(to ensure their interest)	3.73	Appropriate
All programs must be facilitated by College of Education to avoid duplication of programs	3.70	Appropriate

(13) Conclusions and Recommendations

This study was conducted to present the beneficiaries' views towards community extension, their reasons for participating, their perceived effects of the program to them as clientele, and their suggestions to improve the program.

Findings

The obtained data generated the following findings:

1. The respondents believed that CAPSU College of Education extension programs have contributed a lot to the partner community; they enhanced the skills and augmented the income of the residents. The skills that they have gained boosted their confidence and made them proud.
2. The respondents also perceived the necessity of improving the community extension programs of CAPSU College of Education extension programs. It was also revealed that the trainings must be planned, organized and systematically be implemented in order to have great impact to the clientele and to the community. On the other hand, a needs assessment survey must be done first in order to suit the interests of the clientele.

Conclusions

1. CAPSU College of Education extension programs have improved the lives of the residents in the partner community (barangays Talon, Adlawan, and Punta Tabuc, Roxas City). It brought remarkable impact such as on elevating their income and developing their self-confidence.
2. The Community Extension Services of CAPSU College of Education still needs further improvement to sustainably empower the people in the community and to conform the needs of the residents.

Recommendations

On the basis of the findings made in this study, the following are offered as recommendations.

1. The different departments and colleges should discuss ways on how to improve their community extension.
2. Needs assessment survey and program evaluation of every college or department must be undertaken.
3. Every College or department must undergo planning, delivering, monitoring and evaluation in order to address community issues.
4. More programs that would further empower the partner communities should be provided.
