(9A) Abstract (This has a maximum of 250 words. It contains 1-2 sentences of rationale, followed by objectives, brief methodology, major findings, and implications of impact of the study.)

This study explores the notions towards the establishment of the *Balay Turun-an* (School of the Living Traditions), its present condition, and to describe and document the operations, practices and ways of teaching oral traditions of the Cultural Masters. Findings of the study revealed that the establishment of the School of the Living Traditions of Panay Bukidnon having with the salient notions: reviving of the Panay Bukidnon's culture and heritage and teaching of beliefs, practices and heritage. Present condition of the School of the Living Traditions of Panay Bukidnon as Indigenous People (IP) in the province of Capiz significantly analyzed and presented its Faculty/Cultural master; Curriculum and Instruction; and Community Involvement. The challenges that the School of the Living Traditions have in transferring the knowledge system that needed to be addressed and be improved were insufficient budget/financial support and sustainability of the SLTs implementation. Teaching oral traditions was based on "Teaching from the Memory" concepts by the cultural masters and experiential learning of the students.

(9B) Keywords (Write 3-6 words you used in the study, preferably not found in the title because words in the title are already given keywords. This would also include process, or methodology employed.)

Balay Turun-an, oral traditions, indigenous people, practices, School of the Living Traditions, *Panay Bukidnon*

(10) Introduction (This includes the rationale, background of the study, and objectives which are not divided by subheadings. Incorporate at least three (3) reviews)

Safeguarding the culture and heritage through a systematized educational schema and integrating the preserved traditions and heritage in the educational curriculum are the important tenets that the Philippine educational system must be uplifted and enhanced.

In the past, the Philippine educational system has patterned and adopted foreign systematized educational perspectives while localized knowledge systems and schemes were not given adequate importance. As a result, some teachers and learners got confused and were unfamiliar with some terms or presentations being supplicated in the textbooks and learning materials. Thus, integrating and enriching localized intangible and tangible cultural heritage in culture-based education is imperative and needed to be addressed.

Recognizing the role of academic institutions in inculcating the culture in the curriculum, De Leon (2018) states that "We have to give importance to the protection and safeguarding of intangible heritage or the creative inner life over the mere documentation or collection of its tangible heritage or the creative inner life over the mere documentation or collection of its tangible expression."

Paghinun-anon is a Hiligaynon word which means a thought, sentence, idea, view, remark; to exchange views on a subject, speak about, talk over, think upon, dwell upon, or ponder (Hiligaynon Dictionary, 2022). In this study, it refers to the manner, delivery, or way of teaching of oral traditions of the cultural masters to the School of Living Traditions/Community Learning Centers in the Panay Bukidnon as indigenous people in the province of Capiz.

Identifying and documenting the teaching of Panay Bukidnon's oral tradition, culture and practices through SLT will provide background knowledge about the living heritage, history and its oral traditions for the present generation to enhance their intensive reading, appreciation of self-identity and regionalist diversity. Thus, the reason why this study was conducted for the researcher to observe, immerse, document, narrate, develop an material and make a schema of the transfer of knowledge system especially the oral traditions in the School of Living Traditions or Balay Turun-an.

(11) Materials and Methods or Methodology (This includes the materials, methods, duration & location of the study. Materials and Methods are headings used in Natural Science researches and methodology is Social Sciences. Presentation of materials may not necessarily be in separate heading but may be incorporated in the specific methods used. Justify paragraphs with main headings in caps.)

Methodological Perspectives. The study used the descriptive qualitative research design using ethnography as a method on data gathering procedure.

Ethnography is the recording and analysis of a culture or society, usually based on participant-observation and resulting in a written account of a people, place or institution (Coleman & Simpson, 2017). Qualitative descriptive research generates data that describe the 'who, what, and where of events or experiences' from a subjective perspective (Kim et al., 2017). From a philosophical perspective, this approach to research is best aligned with constructionism and critical theories that use interpretative and naturalistic methods (Lincoln et al., 2017). These

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- CR-01
	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 3 of 14

philosophical perspectives represent the view that reality exists within various contexts that are dynamic and perceived differently depending on the subject, therefore, reality is multiple and subjective (Lincoln et al., 2017). In qualitative descriptive research, this translates into researchers being concerned with understanding the individual human experience in its unique context. This type of inquiry requires flexible research processes that are inductive and dynamic but do not transform the data beyond recognition from the phenomenon being studied (Ormston et al., 2014).

Non-participant observation is a data collection method used extensively in case study research in which the researcher enters a social system to observe events, activities, and interactions with the aim of gaining a direct understanding of a phenomenon in its natural context (Liu & Maitlis, 2010); while ethnographic interview is often the unstructured or in-depth interview wherein the interviewer use a general interview guide but not a set of specific questions worded precisely the same for every interviewee. On the other hand, are records or publications regarding something, may it be a culture of the group of people or anything else (Schumacher, 2014).

Ethnographic technique particularly the use of key cultural consultants/informants and SLT personnel was utilized to have qualitative data. According to Kottak (2006), key cultural consultants or key informants are people in the community who by accident, experience or talent, or training can provide the most complete or useful information about particular aspects of life. The key informants of the study were the SLT cultural masters, students, and personnel. To check the authenticity and intensify the validity of the data, other members of the SLT community were interviewed.

In-depth interviews of key informants and SLT personnel were employed.

Context of the Study. The study was conducted in the School of Living Traditions (SLT)/Community Learning Centers (CLC) or *Balay Turun-an* communities of Tapaz and Jamindan, Capiz from January to December 2022. Specifically, SLT centers are located in Brgy. Daan Banwa, Brgy. Nayawan, Brgy. Daan Sur, Brgy. Taganghin, Brgy. Tacayan in Tapaz, Capiz; and, Brgy. Jaena Sur in Jamindan, Capiz.

Participants of the Study. There were 15 key informants of the study. Specifically, they were composed of: five (5) School of the Living Traditions (SLT) students; five (5) SLT cultural masters; two (2) SLT personnel; two (2) SLT focal persons; and one (1) NCIP chairperson. They were chosen based on the inclusion and exclusion criteria of this study. The participants of this study were the key informants who were directly involved and participated in the Panay Bukidnon's Schools of the Living Traditions. Purposive sampling was used to identify the informants of the study. According to Grey (2016), it is a form of sampling in which the selection of the sample is based on the judgment of the researcher and based on the criteria set in the study.

The researcher chose participants who met the inclusion criteria. The criteria were as follows: (a) For SLT cultural masters: must be a resident of the IP Panay Bukidnon community, has been a cultural master for at least 10 years, recommended by the IP community and must have an influential role in the community; and, (b) For SLT students: must be a student of SLT for at least 10 years, recommended by the IP community/SLT master, and has an adequate background about the SLT informal learning process and system. While, SLT cultural masters, personnel, focal persons were excluded to be part of this study if they did not practice/they stopped for certain years as a cultural master and they were not active in the implementation of SLT projects and programs. For SLT cultural students, below 18 years old SLT cultural students were excluded in this study.

Data Gathering Procedure. To be able to gather the data needed, the following instruments and tools were used: structured interview, observations, video documentation, camera and recorder. Data for this research were generally gathered mainly through resourcing observation, interviews, recording, documenting, and analysis. The modes of data collection in ethnography employed in this study were : observation and interview (Angrosino, 2007). Participant observation is unique in that it combines the researcher's participation in the lives of the key informants under study while also maintaining a professional distance (Fetterman, 1998). According to Angrosino (2007), observation is the act of perceiving the activities and interrelationships of people in the field setting. While interviewing is the process of directing a conversation to collect information (Angrosino, 2007).

The researcher sought and obtained permission from the proper authorities to conduct the study. The authorities such as the chairperson of the National Commission of Indigenous People (NCIP) and chairperson of the National Commission for the Culture and the Arts (NCCA) in the province of Capiz. Also, coordination to the Local Government Units of the municipalities of Tapaz and Jamindan, Capiz.

This study focused on the establishment and development of a framework for informal and flexible learning modes of the Schools of the Living Traditions (SLT) of Panay Bukidnon in the province of Capiz for the enhancement of the cultural and educational management practices. In order to understand and document their operations, practices

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- CR-01
	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 4 of 14

and cultural transmission, the researcher conducted the study in several stages, as follows:

Stage 1. Preliminary visit among the Schools of Living Traditions of Panay Bukidnon as indigenous people and identification of informants.

As soon as permission was obtained, the researcher set the date to go to a rural community in five (5) SLTs in Tapaz situated in Brgy. Daan Banwa, Brgy. Nayawan, Brgy. Daan Sur, Brgy. Taganghin, Brgy. Tacayan in Tapaz, Capiz; ; while in Jamindan, the only SLT which was established in 2017 can be found in Sitio Guisok, Barangay Jaena Sur, Jamindan, Capiz. for preliminary visit and identification of possible informants. The informants of this study will be selected from among the SLT participants.

Stage 2. Noting significant details on the School of the Living Traditions' practices towards the teaching of oral traditions of the Panay Bukidnon.

The researcher listened to the tape recorded/videography interview of the subjects and note significant details related to the topic. Discussions among the respondents were done and data were compared between and among key informants to determine similarities between descriptions and also to identify areas that would need clarification.

Stage 3. Conducting interviews focusing on the teaching of oral traditions of the School of the Living Traditions' practices of the Panay Bukidnon.

After determining the important points to be considered, the researcher returned to study areas. The key informants were interviewed regarding their teaching of the oral traditions' practices among the School of the Living Traditions.

Stage 4. Collecting data from other sources

After the observations and interviews made by the researcher, documents that reflect about the SLTs were examined. At the same time, the researcher gathered information through documents related to SLTs among the Panay Bukidnon's indigenous people.

To be able to gather the data needed, the following instruments and tools were used: Structured Interview, Observations, Video Documentation, Camera and Recorder. Data for this research were generally gathered mainly through resourcing observation, interviews, recording, documenting, and analysis.

The researcher finished the gathering of responses and iterative interviews to saturate responses among key informants or participants of the study through messenger, virtual meetings, phone calls, emails and screen shots of written documents.

Data Analysis. In Vivo Coding (Charmaz, 2006; Corbin & Strauss, 2008; Claser, 1978; Claser & Strauss, 1967; Strauss, 1987; Strauss & Corbin, 1998 cited by Sadaña, 2009) was extensively used in the study. After transcribing, the researcher mapped the major concepts. In this study, principal data were derived from the lengthy interviews conducted from the 15 participants. Moreover, assembling of tables, and charts assisted with cluster of codes were done. After clustering the codes, the researchers described the meaning of each code that rose by linking them on literatures reviewed (McCurdy, Spradley, & Shandy, 2005 as cited by Saldaña 2009).

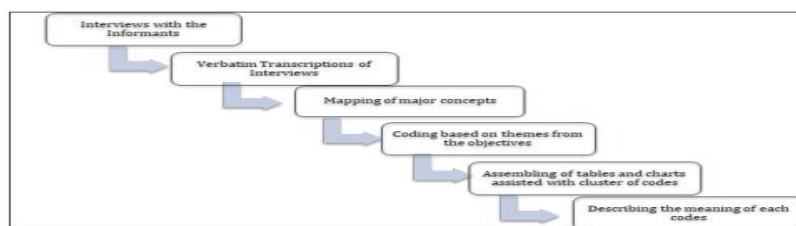

Figure 1. Steps performed in the data analysis using the In Vivo Coding

Ethical Considerations. The researcher sought necessary communication letters and permits to the Regional Office of the National Commission for the Indigenous People (NCIP), SLT coordinator, Provincial Tourism Office and Local Government Officials of Tapaz and Jamindan, Capiz.

Research instruments were validated by a panel of experts. It was translated into its local dialect. Prior to the conduct of the study, it was subjected for ethical review by the panel of experts and also considered their suggestions.

Permission to conduct the study in the community was secured at the municipal and barangay levels. Informed consent was obtained prior to the interviews.

Confidentiality and anonymity of the participants and of the date elicited were considered most.

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- CR-01
	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 5 of 14

Disposal of the gathered data. Disposal of the gathered data out from the interviews, personal information of key informants and transcribed data out from the analysis were done after the finalization of the study. The gathered data were used for research purposes only and were taken with utmost confidentiality.

Lastly, coordination with the concerned agencies and institutions was sought.

(12) Results and Discussions (This part contains presentation of results (data) with reference to the table and figure, to be followed by discussion, with support of reviewed literature. Sequence shall be based on the objectives of the study. Tables are formatted without the vertical lines. Horizontal lines are set at the top and bottom portions as well as below table headings and above major subdivisions. Justify paragraphs with main headings in caps.)

Establishment of the Balay Turun-an. The establishment of the School of the Living Traditions or Cultural Learning Center of Panay Bukidnon in the province of Capiz plays a vital role in the lives and cultural heritage of the indigenous people in the preservation and teaching to the younger generation of today.

Significantly, Panay Bukidnon established School of the Living Traditions with salient notions:

Reviving Panay Bukidnon's culture and heritage. As the Panay Bukidnons dwell at the present with fear of modernization wherein the act of forgetting or not keeping their culture alive in their community, and safeguarding their beliefs and heritage, the School of the Living Traditions was believed to revive and reintroduce the culture and tradition to the indigenous people.

Inevitably, due to the impact of evolving modern culture, some of the Panay Bukidnon ways of living and natural aspects were gradually not practiced and even worse forgotten among them. Reasons may be attributed to lack of earlier cultural protection and preservation and modernized living influence. Collectively, they believed that through establishing SLT, it can revive their innate cultural perspectives:

"Gintukod ang Balay Turun-an para mabuhì liwat ang kultura, kostumbre kag pangabuhi nga kina-iya sang mga Panay Bukidnon asta sa urihing tubo nga mga kabataan."(The School of the Living Traditions was established to revive the culture, customs and distinctive lifestyle of the Panay Bukidnon until to the next generation.) Key Informant 1 while Key Informant 2 stated that *"Para mabuhì liwat kag matudlo pagid sa mga kabataan ang kultura sang Panay Bukidnon pareho sang Binanog dance, ambahan kag Hinilawod."* (To revive and reteach further to the youth about the culture of Panay Bukidnon such as the Binanog dance, ambahan (songs) and Hinilawod (epic).

Through the establishment of the SLT, elders believed that the living traditions of Panay Bukidnon will be passed on to the cultural learners and for them to be stewards and custodians of their identity as indigenous people. By creating a cultural learning center, this would build a venue of interactive learning and cultural pride. Also, SLT will serve as a depository of their living heritage and practice.

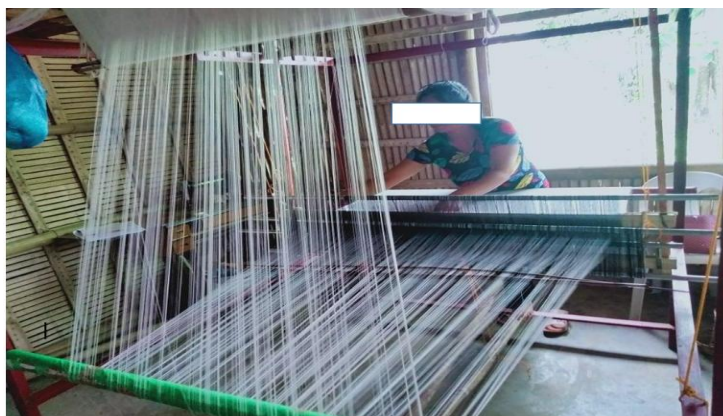

Plate 1. A cultural master in the Balay Turun-an of Jaena Sur, Jamindan, demonstrates the traditional weaving of abaca as textile.

Teaching of beliefs, practices and heritage. In reviving the culture and traditional facets of *Panay Bukidnon*, transfer of knowledge and skills to the new generation and of their beliefs and customs can be achieved through teaching in the SLT.

"Ang Balay Turun-an gintukod para sa mga urihing tubo kung sa diin"

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- CR-01
	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 6 of 14

ginatilipon ang mga kabataan kada Sabado agudto itudlo sa ila ang mga kultura kag tradisyon kaangay sang pagpanubok, ambahan, dilot, pasaot sang Sinulog, paghinun-anon kag pag patik sang agong kag tambol.” -Key Informant 5

Moreover, as **Key Informant 6** supported the significance of teaching their culture among youth by stating that:

“It (SLT) promotes cultural understanding among indigenous people especially to the young generations who were becoming civilized with the practices they acquired from the lowland barangays where they stayed for schooling. It provides them an avenue to sustain the essence and significance of their cultural heritage as an IP.

Mandate of the government/National Commission for the Culture and the Arts. The creation of the SLTs was made possible through the support and order of the National Commission for the Culture and the Arts in collaboration with the National Commission for the Indigenous People. Aside from the propelling agencies, there are local government offices, communities and the Department of Tourism which are initiating the operations of the Balay Turun-an.

*“Sa pagkamaan ko, mandato/sugo sang gobyerno/National Commission for the Culture and the Arts (NCCA) ang pagpatindog sang Balay Turun-an para matatap kag matudlo ang kultura nga may ara ang mga Panay Bukidnon.” (As I know, it is the mandate of the government/ National Commission for the Culture and the Arts (NCCA) to establish the School of the Living Tradition in order to safeguard and teach the culture that the Panay Bukidnons have.) **Key Informant 9***

Plate 2. Panubok, a traditional embroidery of the Panay Bukidnon, is being taught in the School of the Living Tradition in Nayawan, Tapaz, Capiz as part beliefs, practices and heritage teaching.

Present condition of operations of the School of Living Traditions of Panay Bukidnon community in the province of Capiz

Cultural Master. In accordance with the *Guidelines in Establishing SLTs* by the NCCA (2014), it is deemed to identify the master/specialist of a traditional craft as well as the young people who are interested in learning the craft. The NCCA will provide honorarium for the master and incentives for the students, such as food, transportation and materials needed for the training. It should be understood, however, that the support for the master is to recognize him for his primacy and leadership in his field and in elevating further his stature rather than because he is a salaried government employee.

Conceptualizing SLT which is defined as where a living master/cultural bearer or culture specialist teacher's skills and techniques of doing a traditional art or craft. The mode of teaching is expected as usually non-formal, oral and with practical demonstrations. The site may be the house of the living master, a community social hall, or a center constructed for the purpose. Conceptualized in 1995, traces its backgrounds to UNESCO's request to preserve the living traditions of the indigenous people and to the NCCA's mandate to encourage a continuing and balanced development of a pluralistic culture by the people to conserve and promote the nation's cultural heritage.

N	Female	60	15	Weaving and <i>hirang</i> (Form of Weaving)	Jaena Sur, Jamindan
O	Female	61	16	Weaving and <i>hirang</i> (Form of Weaving)	Jaena Sur, Jamindan

Sex.
Out
of 15

cultural masters, there are ten (8) females and seven (7) males. This implies that the number of males and females as cultural masters is almost equal.

"Amon mga kamal-alaman ang manunudlo sa Balay Turun-an nga nakamaan sang amon kina-adman. Wala man gid basehan kon lalaki o babaye and manunudlo, importante ga tudlo sila ya sir!" (Our elders serve as our cultural masters who are expert in our cultural practices teaching in the School

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- CR-01
	Document Title:	COMPLETED RESEARCH	Revision No.	00
			Effective Date	
			Page	Page 9 of 14

of the Living Traditions. We do not look up the sexual role as basis to be the cultural masters for what matters most is that they are teaching, Sir!”- **Key Informant 12**

Age. When it comes to the age of cultural masters, the youngest cultural master K is 55 years old and the eldest cultural master I is 81 years old. The mean age of the cultural masters is 64 years old. It can be noted that almost all of the key informants belonged to the senior age bracket. This implies that the cultural masters have adequate experiences in life and are most exposed to different history and culture of the *Panay Bukidnon* for them to pass on to the next generation through teaching in the SLT.

“Kalabanan sang mga manunudlo namon mga mal-am kag may duro gid nga naman-an sa amon kultura. Duro sa ila mga senior citizens na katama pero bakod sa gihapon magtudlo kag wala ginakapoy. (Most of our cultural masters are our elders and they are the most experienced about our culture. Most of them are senior citizens already but still in good health condition and persistent in teaching.)”

No. of years in teaching in the SLT. Since the establishment of the School of the Living Traditions, the service and expertise of cultural masters were importantly sought in the perpetuation of *Panay Bukidnon's* culture. Based on the interview and profiling, the longest duration teaching in the SLT, is 16 years by cultural master O from Jaena Sur in Jamindan while the least number of years is ten (10) by cultural masters C, D, E, H and I.

This implies that the cultural masters are old enough as a culture bearer and master in their respective skills and crafts being taught. It can be noted that the SLT cultural masters are competent and capacitated in performing their vital tasks to safeguard their culture, tradition and heritage as *Panay Bukidnon* and indigenous people. It also narrates their corresponding skills, crafts, and expertise.

“Mga kamal-aman namon ang manunudlo sa amon Balay Turun-an humalin sang pagtukod sini. Mga laban-laban kinse na siguro ka tuig Sir gintukod, indi lang ko sigurado kag muna man kadugay ang pag tudlo nila. Sa ila kamal-amon, mas nakabalo gid sila sa amon kultura kag kinaadman bilang Panay Bukidnon.” (Our cultural masters are our elders since the establishment of the School of the Living Traditions. More likely, it was established 15 years ago but I am not sure about that Sir and it was the duration of their teaching in the SLT. As elders, they are more knowledgeable about our culture and practices as *Panay Bukidnon*.)

Curriculum and Instructions in Teaching Oral Traditions

Curriculum and Program of Studies. Since School of the Living Tradition is a flexible type and has an informal learning process, it does not conform to the mainstream teaching-learning process. According to The Glossary of Education Reform (2015), curriculum refers to the lessons and academic content taught in a school or in a specific course or program. It is often defined as the courses offered by a school, but it is rarely used in such a general sense in schools; typically refers to the knowledge and skills students are expected to learn, which includes the learning standards or learning objectives they are expected to meet; the units and lessons that teachers teach; the assignments and projects given to students; the books, materials, videos, presentations, and readings used in a course; and the tests, assessments, and other methods used to evaluate student learning.

As the key informants were asked about their curriculum or program of studies, they responded and determined as to the general theme:

Surundan/Giya sa Pagtu-on (Curriculum Guide). Primarily, there is no finite and general curriculum /program of studies being prescribed to the School of the Living Traditions. Every center has its own varied, distinctive, important cultural facets and practices for the younger generations to learn from their cultural masters/elders.

“The School of the Living Traditions has no guide in teaching and they (cultural masters) only teach based on their learning experience.” -Key Informant 9

However, other SLTs have developed learning guides and manuals which are being used for teaching and learning instruction. As **Key Informant 10** stated that

“The curriculum is based on IPs manuals. The subjects being taught were based there also. However, as to instruction, barangay based culture was utilized.”

This implies that the School of the Living Traditions does not have a standardized curriculum and program of studies because each SLT center has its own skills to master and existing heritage to learn and practice. However, cultural masters and elders with the collaboration of the Indigenous People Education (IPEd), Department of Education (DepEd), researchers and other agencies, developed certain curriculum to be adapted and suited to the learning needs and competencies of students.

SLTs are community-managed centers of learning where cultural masters and specialists transmit their knowledge and skills on a particular art, craft and tradition to the young members of the community for their appreciation and learning. The mode of teaching is usually non-formal, oral, and primarily based on practice

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015		Document Code	RES- CR-01

				Effective Date	
				Page	Page 10 of 14

(NCCA, 2014).

The conduct of classes among *Panay Bukidnon* which was referred to by Magos (2002) as “Giya sa Pagtuan” or course guide was written in English and translated Kinaray-a for general use and public comprehension, served as the guide for the lessons and schedule for teaching. The content of the teacher’s guide was basically based on the coordinator’s ethnographic research conducted on the said ethnic group.

Curriculum and instruction

Surundan/
Giya sa Pagtuan

There is no finite and general curriculum/program of studies prescribed to the School of the Living Traditions. Cultural master/center utilized and adapted materials being developed by them coming from NCCA or IPED.

Every center has its own varied, distinctive, important cultural facets and practices for the younger generations to learn from their cultural masters/elders.

Instructional Processes, Methodologies and Learning Enhancement Opportunities in Teaching Oral Traditions

“Teaching from the Memory ” of elders/cultural masters and experiential learning are basically the instructional processes and teaching methodologies in the School of the Living Traditions. Since *Balay Turun-an* does not conform to the formal educational curriculum, cultural masters teach their knowledge systems and practices based on their personal observations, learning experiences, ideas and thoughts in accordance with the customs and culture of the Panay Bukidnon. In addition, experiential learning as applied in the School of the Living Traditions takes a process of learning through the experience of the cultural masters specifically as learning the skills/crafts through reflection on doing. Cultural masters allow the learners to expose themselves to the actual process of performing certain tasks.

As **Key Informant 9** mentioned that *“They are teaching their lessons to their learners based on their natural ideas and by their experiences. Also this knowledge came from the ideas of elders which serve as inheritance of the new generations.”*

SLT materials/things used in teaching-learning. Teaching and learning materials vary depending on their availability and needed resources in every School of the Living Traditions. Materials may differ also depending on the skills/activities that needed to be performed or mastered which supported by **Key Informant 11** that

“There are different kinds of instruments we use for teaching like in singing/music. Moreover, in teaching dance, steps are depending on the rhythm of instruments being used. While hand embroidery, we used sewing kits and indigenous materials.” Usually, things and materials used in the SLT are made up of their own local and indigenous materials as confirmed by **Key Informant 13** stating that *“Ginagamit namon sa pagtudlo sa Balay Turun-an ang mga bagay kaangay nga makita namon sa amon palibot kag lugar.”* (We are using materials/things that can be found locally in our place in teaching in the School of the Living Traditions.)

In *Binanog* dance, the important materials/instruments used are the following: tambol, agong and bamboo musical instruments.

In the past, **Key Informant 10** narrated that *“Panay Bukidnon used commonly the carabao for plowing, Binangon or Sanduko used for kaingin, Pisaw used for getting the grass and for cleaning, Tagad used for planting rice (panggas) and Subakan used as rice vessel for planting rice.”*

The statements of the key informants conform to the findings of Magos (2014) detailing her study about the *Mode of Transmission of SLT*, their traditional oral literature, the best of which are the epics, is transmitted through chanting. It is sung as a lullaby to an infant or as a bedtime story for children. During gatherings like harvest, where there are *pangayaw* (transient harvesters), or while waiting for the sun to go down after an *itib* (traditional wedding), a chanter also sings the epic to a group of young men and women as s/he lies down in a *duyan* (rattan hammock)

with the crowd listening eagerly. When one belongs to a family with a chanter, the likelihood is s/he will learn how to chant. Some mothers, grandmothers, or even great grandmothers of Bukidnons were binukot (kept maidens) when they were young. They were not allowed to work and had to stay inside the house all the time so as not to be seen by men because parents were very jealous of their daughters. Most of the time, a child selected to be a binukot is entertained by her chanter grandmother or kin with an epic as a lullaby or bedtime story. Thus, she grows up to be a good chanter because society has not assigned her any other role. She devotes her time to listening and eventually learning the epic.

Instructional Processes, Methodologies and Learning Enhancement Opportunities

Teaching from the Memory	There is no finite and general curriculum/program of studies prescribed to the School of the Living Traditions. Every center has its own varied, distinctive, important cultural facets and practices for the younger generations to learn from their cultural masters/elders.
Experiential learning	Takes a process of learning through the experience of the cultural masters. Learning the skills/crafts through reflection on doing. Cultural masters allow the learners to expose themselves to the actual process of performing certain tasks.

(13) Conclusions and Recommendations (This part shall be written in narrative form and arranged based on the objectives and findings. Conclusions are general statements answering the objectives. Recommendations are based on the conclusions. They may be split or combined based on their length, which means, conclusions and recommendations may be split under separate headings if they are long. Justify paragraphs with main headings in caps.)

Conclusions

Reviving the Panay Bukidnon's culture and heritage and teaching of beliefs, practices and heritage are the important notions on how Panay Bukidnon established the Schools of the Living Traditions in Tapaz and Jamindan. Panay Bukidnons have high regards in the preservation and culmination of their culture and heritage.

Present condition of the School of the Living Traditions of Panay Bukidnon as Indigenous People (IP) in the province of Capiz described Faculty/Cultural master as specialist in teaching skills and techniques of doing a traditional art or craft.; Curriculum and Instruction has an informal learning process, it does not conform to the mainstream of teaching-learning process.; As to the Community Involvement, SLTs allow learners to showcase their talents, skills, performances and exhibits and get involved and actively participated in the different community activities and programs in the local, provincial, regional and even in the national level.

Recommendations

Since Panay Bukidnon have high regards with the preservation of their culture and heritage, the National Commission for the Culture and the Arts (NCAA), National Commission for the Indigenous People (NCIP) and Provincial Tourism of Capiz Cultural Affairs (PTCAO) may sustain and create different programs for the SLT to culminate further the way of living traditions, beliefs and practices of the indigenous people community.

The Schools of the Living Traditions in Tapaz and Jamindan have their own existing and present operations, practices and learning management programs on the teaching of Oral Traditions. To improve further the present situation of the SLTs, it is hereby recommended to have an intensified partnership and collaboration to the Department of Education, National Commission for the Indigenous People, Department of Tourism and others.

(14) Output (Indicate the specific products, processes or services which the project has produced; quantify when possible.)

Paghinun-anon. The deliverables of this study are the compilation, documentation and narration in teaching oral traditions among the Balay Turun-an or the School of Living Tradition Cultural Masters. Instructional Materials as part of the research output shall be enhanced for the utilization and copyright to be used by the Balay Turun-an
