(7) Sector/Commodity Hospitality and Food Industry	(8) Discipline/Field of Specialization Hospitality Management – Food Technology
(9) Rationale The land of vibrant flavors, the Philippines, craves bold and spicy experiences. Pickled vegetables, known as "achara," are a beloved staple, adding tangy crunch to various dishes. Yet, traditional recipes lack variety and cater to limited spice preferences. This project delves into developing a novel pickled vegetable product with a "chili garlic twist," satisfying the growing demand for exciting flavor profiles while staying true to cherished Filipino ingredients. The Philippine achara market suffers from limited innovation, offering minimal variation in taste and ingredients. This project seizes this opportunity to develop unique and exciting products that align with evolving consumer preferences, particularly the escalating desire for bolder, spicier flavors. By incorporating chili and garlic, popular spicy staples, into this classic condiment, we address this demand while offering health benefits like probiotics, vitamins, and minerals. This project isn't just about taste buds; it aligns with national goals to promote innovation, support the food processing industry, and encourage healthy eating habits. The expected outcomes include a unique and marketable product, valuable insights into consumer preferences for spicy and pickled food, and improved food processing techniques. This information will contribute to scientific advancement, benefit target users with exciting new flavors, and positively impact the country by stimulating economic growth, creating jobs, and promoting healthy choices. This product presents a unique opportunity to develop a novel and marketable product that aligns with Filipino consumer preferences and national development goals. The potential economic, scientific, and societal benefits justify the resource expenditure required for this exciting research endeavor.	
(9-A) Project Description From spicy cravings to crunchy satisfaction, this project aims to tantalize Filipino taste buds with a novel pickled vegetable product infused with a "chili garlic twist." We'll start by understanding what truly tickles the taste buds of our target audience – spiciness levels, preferred vegetables, and desired crunch. Experimentation reigns supreme as we explore various vegetable combinations, chili varieties, and garlic types to achieve the perfect flavor and texture symphony. Different pickling brine recipes will be crafted, each with varying chili and garlic intensities to cater to a range of spice preferences. Small-batch prototypes will be produced, then put to the test by both consumers and industry experts in sensory evaluation sessions. Based on their feedback, the chosen recipe will be meticulously refined for optimal flavor, texture, and cost-effectiveness. But taste isn't everything! We'll source fresh, high-quality vegetables, chilies, and garlic from reliable partners, while establishing standardized procedures for cleaning, cutting, and blanching to guarantee consistent quality and safety. The pickling process will be meticulously optimized, with precise measurements of vinegar, salt, sugar, spices, and the chosen chili-garlic combo. Standardized sanitation and pickling procedures will ensure food safety and product consistency. Finally, we'll design visually appealing and functional packaging that keeps the product fresh and extends its shelf life, complete with clear storage recommendations for consumers. Beyond the product itself, the project delves deeper. We'll analyze existing research on spicy and pickled vegetables, consumer preferences, and food processing techniques. Collaborations with food scientists, agricultural experts, and industry partners will provide invaluable expertise. Consumer testing and expert panels will refine the prototypes, while cost analysis ensures the product's viability. A captivating marketing strategy and brand identity will resonate with the target audience and align with market trends. From market research data to the final product prototype, this project outlines a clear path. By harnessing the insights from similar projects on spicy and pickled food preferences, innovative pickling techniques, and the health benefits of fermented vegetables, we pave the way for a product with the potential to not only tantalize taste buds but also contribute to the Philippine market's success and the country's economic and social development. This is where the journey begins, from spicy dreams to a crunchy reality.	
(10) Objectives/Statement of the Problem (for Social Sciences) (Statement of the specific purpose to address the problem areas of the project.) This study aims to determine the Acceptability of Spicy and Crunchy Pickled Veggies with a Chili Garlic Twist.	

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
			Revision No.	00
	Document Title:	RESEARCH PROPOSAL	Effective Date	January 26, 2023
			Page	Page 3 of 8

Specifically this study aimed to:

1. Determine the sensory qualities of spicy and crunchy pickled veggies with a chili garlic twist in terms of appearance, aroma, taste, and texture;
2. Determine the general acceptability of spicy and crunchy pickled veggies with a chili garlic twist using the following proportions;
Treatment A 13 grms. bamboo shoot, 13 grms. green papaya, 13 grms. radish, 13 grms. scallion leaves, 13 grms. bell pepper (red and green), 13 grms. mushrooms (your choice), 13 grms. kutchay, 13 grms. carrot, and 13 grms. cucumber;
Treatment B 10 grms. bamboo shoot, 10 grms. green papaya, 10 grms. radish, 10 grms. scallion leaves, 10 grms. bell pepper (red and green), 10 grms. mushrooms (your choice), 10 grms. kutchay, 10 grms. carrot, 10 grms. Cucumber and 60 ml Chili Garlic Oil;
Treatment C 7 grms. bamboo shoot, 7 grms. green papaya, 7 grms. radish, 7 grms. scallion leaves, 7 grms. bell pepper (red and green), 7 grms. mushrooms (your choice), 7 grms. kutchay, 7 grms. carrot, 7 grms. cucumber and 120 ml Chili Garlic Oil;
Treatment D 3 grms. bamboo shoot, 3 grms. green papaya, 3 grms. radish, 3 grms. scallion leaves, 3 grms. bell pepper (red and green), 3 grms. mushrooms (your choice), 3 grms. kutchay, 3 grms. carrot, cucumber and 180 ml Chili Garlic Oil;
Treatment E 240 ml Chili Garlic Oil; and
3. To determine the significant differences in sensory qualities and general acceptability of spicy and crunchy pickled veggies with a chili garlic twist among the treatments.

(11) Review of Literature/Prior Art Search (Related researchers/activities that have been conducted. State-of –the-art of current technology / information from which the project proposal will take-off).

Building upon existing research is crucial for developing a successful pickled vegetable product catering to Filipino preferences. Studies by Lee, Kim, and Lee (2018) in Korea offer valuable insights into factors influencing consumer choices regarding spicy food, highlighting key attributes like type of chili pepper and spice level (p. 8-15). Similarly, Kim, Kim, and Kim (2020) focused on spicy chicken preferences, providing further nuances relevant to the development of this project (p. 955-962). Beyond understanding preferences, exploring innovative pickling techniques is essential. Sharma, Sharma, and Kumar (2022) present potential solutions for improving the quality and shelf life of pickled vegetables through novel approaches (p. e22941). Sovány, Váczi, and Szakály (2020) delve into the health benefits and technological advancements in fermenting vegetables, showcasing the potential for both health and product quality improvements (p. 85-94). Furthermore, understanding the health benefits of fermented foods strengthens the project's appeal. Marco et al. (2017) highlight the positive impact of fermented foods on human health, while De Angelis et al. (2018) specifically focus on fermented vegetables and their health-promoting properties (p. 17-38; p. 1557). By incorporating these findings, the project can position itself as not only flavorful but also potentially beneficial for consumers' well-being. These studies provide a solid foundation for developing a product that aligns with Filipino preferences, utilizes innovative techniques, and emphasizes potential health benefits. By effectively integrating these insights, the project can pave the way for a successful and impactful pickled vegetable product in the Philippine market.

(12) Scientific Basis/Theoretical Framework (Include concepts, theories and variables that indicate relevant relationships to be tested).

(13) Methodology (Details such as; a) variables to be measured and evaluated; b) treatments to be used and their layout; c) experimental procedures and design; d) statistical analysis; e) evaluation method and observations to be made, strategies for implementation.)

a) Variables to be Measured and Evaluated:

1. **Independent Variables:**

- Treatment A 13 grms. bamboo shoot, 13 grms. green papaya, 13 grms. radish, 13 grms. scallion leaves, 13 grms. bell pepper (red and green), 13 grms. mushrooms (your choice), 13 grms. kutchay, 13 grms. carrot, and 13 grms. cucumber;
- Treatment B 10 grms. bamboo shoot, 10 grms. green papaya, 10 grms. radish, 10 grms. scallion leaves, 10 grms. bell pepper (red and green), 10 grms. mushrooms (your choice), 10 grms. kutchay, 10 grms. carrot, 10 grms. Cucumber and 60 ml Chili Garlic Oil;
- Treatment C 7 grms. bamboo shoot, 7 grms. green papaya, 7 grms. radish, 7 grms. scallion leaves, 7 grms. bell pepper (red and green), 7 grms. mushrooms (your choice), 7 grms. kutchay, 7 grms. carrot, 7 grms. cucumber and 120 ml Chili Garlic Oil;
- Treatment D 3 grms. bamboo shoot, 3 grms. green papaya, 3 grms. radish, 3 grms. scallion leaves, 3 grms. bell pepper (red and green), 3 grms. mushrooms (your choice), 3 grms. kutchay, 3 grms. carrot, cucumber and 180 ml Chili Garlic Oil;

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
			Revision No.	00
	Document Title:	RESEARCH PROPOSAL	Effective Date	January 26, 2023
			Page	Page 4 of 8

- Treatment E 240 ml Chili Garlic Oil.
- 2. **Dependent Variables (Sensory Qualities):**
 - Appearance
 - Aroma
 - Taste
 - Texture
- 3. **Dependent Variable (General Acceptability):**
 - Overall acceptability rating
- b) Treatments and Their Layout:
 - ✓ Treatment A **13 grms.** bamboo shoot, **13 grms.** green papaya, **13 grms.** radish, **13 grms.** scallion leaves, **13 grms.** bell pepper (red and green), **13 grms.** mushrooms (your choice), **13 grms.** kutchay, **13 grms.** carrot, and **13 grms.** cucumber;
 - ✓ Treatment B 10 grms. bamboo shoot, 10 grms. green papaya, 10 grms. radish, 10 grms. scallion leaves, 10 grms. bell pepper (red and green), 10 grms. mushrooms (your choice), 10 grms. kutchay, 10 grms. carrot, 10 grms. Cucumber and 60 ml Chili Garlic Oil;
 - ✓ Treatment C 7 grms. bamboo shoot, 7 grms. green papaya, 7 grms. radish, 7 grms. scallion leaves, 7 grms. bell pepper (red and green), 7 grms. mushrooms (your choice), 7 grms. kutchay, 7 grms. carrot, 7 grms. cucumber and 120 ml Chili Garlic Oil;
 - ✓ Treatment D 3 grms. bamboo shoot, 3 grms. green papaya, 3 grms. radish, 3 grms. scallion leaves, 3 grms. bell pepper (red and green), 3 grms. mushrooms (your choice), 3 grms. kutchay, 3 grms. carrot, cucumber and 180 ml Chili Garlic Oil;
 - ✓ Treatment E 240 ml Chili Garlic Oil.
- c) Experimental Procedures and Design:
 1. **Preparation of Pickled Veggies:**
 - Cut and prepare vegetables according to each treatment.
 - Mix ingredients following specified proportions.
 - Ensure consistency in processing and packaging.
 2. **Sensory Evaluation:**
 - Blind taste testing by a panel of evaluators.
 - Evaluate appearance, aroma, taste, and texture using a standardized scale.
 3. **General Acceptability Evaluation:**
 - Participants rate the overall acceptability of each treatment.
 4. **Randomization:**
 - Randomly present samples to panelists to avoid order bias.
- d) Statistical Analysis:
 1. **Analysis of Variance (ANOVA):**
 - Determine if there are significant differences in sensory qualities and general acceptability among treatments.
 2. **Post-hoc Tests:**
 - Conduct post-hoc tests (e.g., Tukey's HSD) to identify specific differences between treatments if ANOVA indicates significance.
- e) Evaluation Method and Observations:
 1. **Sensory Evaluation:**
 - Trained panelists assess appearance, aroma, taste, and texture.
 - Scores are recorded on a scale (e.g., 1-9).
 2. **General Acceptability Evaluation:**
 - Participants rate the overall acceptability of each treatment.
 - Use a Likert scale or numerical scale for rating.
- f) Strategies for Implementation:
 1. **Sample Size:**
 - Determine an appropriate sample size for both trained panelists and consumer participants.
 2. **Randomized Control Trial:**
 - Implement a randomized control trial to minimize bias.
 3. **Standardization:**
 - Standardize the preparation and presentation of samples to ensure consistency.
 4. **Data Collection:**
 - Ensure accurate and unbiased data collection during sensory evaluations.
 5. **Data Analysis:**

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
			Revision No.	00
	Document Title:	RESEARCH PROPOSAL	Effective Date	January 26, 2023
			Page	Page 5 of 8

- Employ statistical software for accurate and reliable analysis.
6. **Ethical Considerations:**
- Ensure the study adheres to ethical guidelines, obtaining informed consent from participants.
7. **Feedback Loop:** Allow for feedback from participants and panelists to refine the study design if necessary.
- By incorporating these elements, the study can systematically assess the acceptability of Spicy and Crunchy Pickled Veggies with a Chili Garlic Twist and provide meaningful insights into the influence of different treatments on sensory qualities and general acceptability.

(14) Major Activities/Work plan (Enumerate in chronological order the task to be undertaken. Use gantt chart.

Research Objectives	Year 1 2024											
	Jan	Feb	Mar	Apr	May	Jun	July	Aug	Sept	Oct	Nov	Dec
1. Field work/observation												
2. Analysis of data gathered from observation												
3. Lay-outing, Editing and Printing of 100 copies of coffee table book												

(15) Expected Output (Indicate the specific products, processes or services which the project is expected to produce; quantify when possible)

- ✓ The study's quantifiable outcomes will contribute to optimizing the recipe for Spicy and Crunchy Pickled Veggies with a Chili Garlic Twist, ensuring it aligns with consumer preferences.
- ✓ Insights gained from the study can inform potential commercial production, as the optimal recipe is identified and quantified for market success.
- ✓ Practical applications and recommendations for food manufacturers interested in producing Spicy and Crunchy Pickled Veggies with a Chili Garlic Twist.
- ✓ Potential for quantifying consumer demand for spicy and crunchy pickled vegetable products.

(16) Technology Transfer Activity Design (Indicate the specific products, activity design, processes or services to be transferred as extension activities)

Extension Activities:

- Recipe Optimization Workshops:**
 - Conduct workshops to transfer the optimized Pinoy-style sweet and spicy veggies recipe to local chefs, home cooks, and food enthusiasts.
 - Provide hands-on training on preparing veggies using the identified optimal proportions from the study.
- Culinary Training Programs:**
 - Develop culinary training programs incorporating the insights from the study to educate aspiring chefs and culinary students on the art of crafting Pinoy-style sweet and spicy veggies.
 - Integrate sensory evaluation techniques to enhance their understanding of flavor profiling.
- Educational Initiatives:**

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
			Revision No.	00
	Document Title:	RESEARCH PROPOSAL	Effective Date	January 26, 2023
			Page	Page 6 of 8

- Collaborate with educational institutions to include Pinoy-style sweet and spicy veggies in their culinary arts curriculum.
- Provide educational materials and resources derived from the study to enhance learning on Filipino fermentation techniques.
- 4. **Community Cooking Classes:**
 - Organize community cooking classes to share the unique recipe variations and preparation techniques identified in the study.
 - Promote cultural appreciation and awareness of Filipino fermented dishes.
- 5. **Promotional Events:**
 - Host promotional events showcasing the different treatments of Pinoy-style sweet and spicy veggies.
 - Offer tastings, demonstrations, and educational sessions to create awareness and interest in the local community.
- 6. **Collaborations with Local Food Businesses:**
 - Collaborate with local restaurants and food businesses to incorporate the optimized veggies recipe into their menu.
 - Provide support in implementing the recipe and marketing the dish to attract customers.
- 7. **Online Resources and Publications:**
 - Develop online resources, such as recipe guides and video tutorials, to disseminate the optimized veggies recipe.
 - Publish articles and research summaries to share the study's findings and the significance of Pinoy-style sweet and spicy veggies.

Quantifiable Outcomes:

1. **Number of Participants in Workshops:**
 - Measure the number of participants attending recipe optimization workshops and culinary training programs.
2. **Incorporation into Culinary Curricula:**
 - Track the number of educational institutions incorporating Pinoy-style sweet and spicy veggies into their culinary curricula.
3. **Community Engagement:**
 - Assess community participation in cooking classes and promotional events to gauge the impact on cultural awareness.
4. **Business Collaborations:**
 - Measure the number of local businesses adopting the optimized veggies recipe and the resulting impact on their menu offerings.
5. **Online Reach and Engagement:**
 - Track the online reach of resources, including downloads, views of video tutorials, and engagement on social media platforms.

By implementing these extension activities, the study's outcomes can be disseminated widely, fostering culinary education, cultural appreciation, and potential economic opportunities within the community.

(17) Target Beneficiaries (Who the clientele are and what are the expected outcome/effects of the use of the projects output)

Clientele and Expected Outcomes:

1. **Consumers and Food Enthusiasts:**
 - **Outcome:** Increased awareness and appreciation of Pinoy-style sweet and spicy veggies.
 - **Effects:** Enhanced culinary experiences, introduction of a new and culturally rich dish, and diversified food options for consumers.
2. **Chefs and Culinary Students:**
 - **Outcome:** Access to an optimized veggies recipe and culinary insights.
 - **Effects:** Improved culinary skills, integration of Filipino fermentation techniques into their repertoire, and potential inclusion of veggies in their professional offerings.
3. **Educational Institutions:**
 - **Outcome:** Incorporation of Pinoy-style sweet and spicy veggies into culinary curricula.
 - **Effects:** Enriched culinary education, exposure to diverse cultural practices, and potential enhancement of students' understanding of fermented foods.
4. **Local Businesses and Restaurants:**
 - **Outcome:** Adoption of the optimized veggies recipe into their menus.

	Document Type:	FORM ISO 9001:2015	Document Code	RES-F09
			Revision No.	00
	Document Title:	RESEARCH PROPOSAL	Effective Date	January 26, 2023
			Page	Page 7 of 8

- **Effects:** Diversification of offerings, potential for increased customer base, and promotion of Filipino culinary identity.
- 5. **Community Members:**
 - **Outcome:** Participation in cooking classes and community events.
 - **Effects:** Strengthened community bonds, increased cultural awareness, and engagement in shared culinary experiences.
- 6. **Online Community:**
 - **Outcome:** Dissemination of veggies recipe through online resources.
 - **Effects:** Global awareness of Pinoy-style sweet and spicy veggies, potential for cultural exchange, and an online community centered around Filipino culinary traditions.
- 7. **Local Farmers and Suppliers:**
 - **Outcome:** Increased demand for ingredients used in the veggies recipe.
 - **Effects:** Economic opportunities for local farmers, support for sustainable agriculture, and potential growth in the supply chain.
- 8. **Researchers and Academia:**
 - **Outcome:** Publication and dissemination of study findings.
 - **Effects:** Contribution to academic knowledge on Filipino fermentation methods, potential for further research, and enrichment of scientific understanding.
- 9. **Tourism and Cultural Promotion Agencies:**
 - **Outcome:** Inclusion of Pinoy-style sweet and spicy veggies in cultural promotion efforts.
 - **Effects:** Enhanced cultural tourism, showcasing the diversity of Filipino cuisine, and potential economic benefits from culinary tourism.

The expected outcomes and effects are designed to create a positive impact on various stakeholders, ranging from individuals seeking new culinary experiences to communities, businesses, and cultural institutions aiming to promote and celebrate Filipino food traditions.

(18) Personnel Requirement

Name	Role (Program, Project, Study Leader)	Field of Specialization
Jhonnell J. Abalajon	Lead Author	Hospitality Management
Monalisa G. Odad (Assistant Professor II)	Lead Author	Food and Industrial Technology

HIGH SCHOOL DIPLOMA
Vicente Andaya Sr. National High School / Publication Sur, Sigma, Capiz, Philippines / 2008

Currently working at Capiz State University Sigma Satellite College and a dedicated teacher in the field of Tourism and Hospitality Management. Active and passionate employee. With a proven track record commended during college and an excellent employee, with a passion, compassion for the school's success. Committed in helping students identify and develop their own passions and careers while becoming successful and confident hospitality personnel. An active participant in research and development for the future of humankind.

WORK EXPERIENCE

Capiz State University
Oct 2020 - Present
Romas City, Philippines

INSTRUCTOR I
Instructor I, Tourism and Hospitality Management
Department
Gender & Development Focal Person
Research Adviser and Panelist
Capiz State University Sigma Satellite College
October 2020 - Present

Researcher
Completed 3 Research entitled:
1. "Impact of Community Extension Programs To Capiz State University Faculty & Students"
2. "Perception of the Students Towards the Bachelor of Science in Hospitality Management Department Home-Based Internship Program of Capiz State University"
3. Perception of the Students towards the Bachelor of Science in Hospitality Management Department Home-based Internship Program of Capiz State University

Subjects taught:
1. Introduction to Meetings, Incentives, Conference and Exhibitions
2. Accommodation Operation and Management
3. Ergonomics in Tourism and Hospitality Management
4. Hospitality & Tourism Facilities Management & Design

Colegio de San Juan de Letran
Sep 2016 - May 2020
Columba-Columba City, Legaspi, Philippines

INSTRUCTOR
Major Key Role & Contributions:

- Library Committee 2019-2020
- Tourism & HRM/IM Research Adviser & Panelist
- Building Course Curriculum
- Preparing Course Syllabi
- Mentoring and Coaching Students
- Create and Prepare Supplementary Materials
- Community Extension Service Moderator 2019-2020
- Research Adviser and Panelist

Subjects taught:

- Applied Business Tools and Technologies for Tourism and Hospitality
- Tourism & Hospitality Management Information System
