(7) Sector/Commodity	(8) Discipline/Field of Specialization
(8) Rationale The licensure examination is critical in determining a school's performance in terms of the quality of education it provides. This examination is a necessity for practicing a particular profession. It is a prerequisite to becoming a recognized expert in one's specific discipline (Binayao and Dales, 2020). Actual results in the Philippine Criminologist Licensure Examination are the best indicator of student performance in the Bachelor of Science in Criminology Program. The knowledge, skills and competencies that are stated to be the likely outputs of a quality-assured Higher Education Institutions HEI (Padua, 2012) could be measured to some extent through these assessments. CapSU Dumarao, Criminology Department is one of the five local universities in the Province of Capiz that offer free tuition fee. The Bachelor of Science in Criminology which considered the most numbers of enrollee since then, and has been experiencing a steady rise in enrollment over the years. The Criminology Department was granted a Certificate of Program Compliance (COPC) by the Commission on Higher Education for their Bachelor of Science and Criminology program after successfully satisfying all prescribed requirements. A COPC indicates that a program meets CHED's minimum standards for offering it as well as allowing graduates to take board examinations. In the report submitted by the Criminology Department to the Commission on Higher Education Region VI with regard to the 5-Year Licensure Examination results from 2018–2022, the performance of the graduates per licensure examination schedule is as follows: the average national passing percentage is 35.46; for first-time takers, 8.26% was achieved; repeaters gained 9.37% passing rate; and the overall performance is 12.58%, which is below the national passing percentage. The researchers were encouraged to conduct this study after becoming aware of the criminology department's overall performance on the criminologist licensure examination. The study seeks to determine the factors and challenges that influenced the passing rate of CapSU Dumarao graduates in the Licensure Examination for Criminologists.	
(9-A) Project Description The results of this study may provide insights to institutions that can be used to make policies and initiate programs that would enhance graduates' performance ratings in taking the licensure examination by providing appropriate interventions and early remediation to future takers. It also aims to identify the most prevalent factors, such as the student factor, home and family factor, school factor, review center factor, and personal factor that would greatly influence taking the licensure examination. Also to ascertain the leading challenges that the takers experienced when they took the examination. This study will cover the takers of the criminology licensure examination in February 2024. A researcher-made questionnaire will be utilized to be administered to the respondents and will consider ethical considerations in the conduct and gathering of information for the schools where the graduates are presently employed. This can be done by sending an electronic consent form to the participants asking for permission to administer the research instrument for voluntary participation. Anonymity is cautiously examined, including assurance on the informed consent among the subjects, ensuring the utmost confidentiality while potential for harm is kept to an absolute minimum, and providing as honest,

			Page	Page 3 of 6

reliable, and credible result communication as possible. This study will undergo three systematic phases to ensure that the material time, resources, and efforts of the researchers will be maximized toward its target time frame.

(9) Objectives/Statement of the Problem

The objective of the study is to determine the factors and challenges that influence the passing rate of CapSU Dumarao graduates who took the criminologist licensure examination.

Specifically, the study will seek to answer the following questions:

1. What factors influence the passing rate of CapSU Dumarao graduates in the licensure examination for criminologists?
2. What are the most perceived challenges experienced by CapSU Dumarao graduates in the licensure examination for criminologists?
3. Is there a significant difference in factors and challenges influencing the passing rate of CapSU Dumarao graduates in the licensure examination for criminologists?

(11) Review of Literature/Prior Art Search

In the Philippines, several studies have examined the success predictors of performance in licensure examinations. These predictors include grade point average (GPA), pre-board examination results or performance in in-house reviews, final internship grades, and students' aspirations, attitudes, and study habits. These predictors were used to predict performance in nursing licensure examinations (Garcia, 2011; Ong et al., 2012; Yasa & Gonzales, 2016), physical therapy and occupational therapy licensure examinations (Constantino et al., 2014), medical technologist licensure examinations (Pasia et al., 2012), licensure examinations for teachers (Balagtas & Gerundio, 2014; Esmeralda & Perez Espinosa, 2015), and other examinations.

There is a paucity of research that determines the predictors of performance in CLE in the Philippines or simply analyzes the performance of higher education institutions in CLE. Nevertheless, one notable study was that of Barrera et al. (2013), which concluded that major subjects' GPA and English Qualifying Examination scores significantly predicted performance in the CLE.

Meanwhile, Pariñas and Obrero (2012) explored the relevance of the topics discussed in the review program by considering the profile of the respondents age, year graduated, sex, UNP CAT rating, number of take of examinations, and civil status, the level of relevance of the subjects lectured during reviews asked in the different areas, and the difficulty encountered in the different areas of concentration in the Criminology Licensure Examination, respectively. On the other hand, Bajeta et al. (2015) described their institution's performance in the six professional board subjects in the CLE from 2008 to 2013, compared the results of licensure examinations per subject, and proposed a plan of action to improve the board performance of their university.

Lastly, Villarmia (2017) used a qualitative method through focused-group discussion in drawing out the perception of students on their expectations, quality of teaching, role, and responsibilities, and confidence to take the board exam, and concluded that the pioneering class was satisfied in their four-year course as most of their expectations were realized during their studies.

(12) Scientific Basis/Theoretical Framework

This study is anchored on the theory of the triarchic theory of intelligence. Intelligent behavior, according to Stenberg, consists of three major components, with each being a basic unit of information processing. These are componential (analysis of information to solve problems), experiential (using prior knowledge as information in problem-solving and creating new ideas), and contextual (using intelligence to adapt to environmental demands). This theory covers the academic or intellectual factors as to how students craft their capability and ability to analyze concepts or any problem strata using theories of their chosen field of expertise and the application of these theories that may appear to cover the scope of licensure examination questions.

(13) Methodology

The descriptive research method will be utilized in this study. This design involves the analysis of data gathered through a questionnaire. The respondents to the study will be the graduates who took the criminologist licensure examination last February 2024. The questionnaire utilized in this study will be a researcher-made instrument. The questionnaire will undergo validity and reliability tests before it will be distributed to the respondents. Part 1 evaluates the influencing factors such as student factors, home and family factors, school factors, review center factors, and personal factors while Part 2 addresses the perceived challenges that influence the passing rate of CapSU Dumarao graduates in the Licensure Examination for Criminologists.

The weighted mean will be further interpreted using the 4-point Likert scale as follows:

To interpret the factors that influence the passing rate, the following scale of means will be used:

Response	Scale	Interpretation
4	3.26-4.00	High Influence
3	2.51-3.25	Average Influence
2	1.76-2.50	Low Influence
1	1.00-1.75	Least Influence

To interpret the perception of respondents in regard to the challenges that influenced their passing rate in the CLE, the following scale of means will be used:

Response	Scale	Interpretation
4	3.26-4.00	Strongly Agree
3	2.51-3.25	Agree
2	1.76-2.50	Disagree
1	1.75-1.00	Strongly Disagre

The study will utilize IBM Statistical Package for the Social Sciences (SPSS) to analyze the data collected from the data gathering instrument. Weighted mean will be used to determine the extent of influence of different factors that influence that passing rate. The descriptive statistical treatment will be also used to analyze the mean and standard deviation. A Mann-Whitney u-test will be used to further check if there is a significant relationship between the quantifiable factors of the respondents and their perceived challenges associated with them that influence the passing rate of CapSU Dumarao graduates.

(14) Major Activities/Work plan

Research Objectives	A.Y. 2023-2024-A.Y.2024-2025 Year 1										
	Feb	Mar	Apr	May	June	Jul	Aug	Sept	Oct	Nov	Dec
1. Field work/observation											
2. Analysis of data gathered from observation											
3. Reporting and Finalizing of Research Outputs											

(15) Expected Output

1. Policy inputs and Recommendation
2. Pedagogical Enhancement
3. Research Output

(16) Technology Transfer Activity Design

Technology Transfer Activity Design (Indicate the specific products, activity design, processes or services to be transferred as extension activities)

1. Policy Inputs – the result of the study will provide an information for the Criminology Department to enhance its instructional deliveries, it will consider the admission process as important factor in predicting the positive performance of the students in the Licensure examination for Criminologists.
2. Research Outputs – the full-blown of this study will be beneficial both to the university and to the employers for possible intervention, enhancement, and policy inputs to be administered.

(17) Targets Beneficiaries (Who the clienteles are and what are the expected outcome/effects of the use of the projects output)

1. School Administrators
2. Faculty
3. Curriculum Makers
4. BS Criminology Graduates
5. BS Criminology students

(18) Personnel Requirement

SOURCES OF EXPENSES	Quantity	Amount (Php)
---------------------	----------	--------------

	Document Type:	DOCUMENTED INFORMATION ISO 9001:2015	Document Code	RES- PROP-01

A. Personnel Services (For studies needed the Research Assistant, informant/s, guide)		
B. Maintenance and Other Operating Expenses (MOOE) (modify and include only whichever is applicable)		
Transportation allowance		8,000.00
Meal allowance during data gathering		3,000.00
Miscellaneous (for incidental expenses)		4,000.00
C. CAPITAL OUTLAY		
Total		15,000.00
