III. RATIONALE/BACKGROUND

The Alternative Learning System (ALS) is a parallel learning system in the Philippines that provides opportunities for out-of-school youth and adult (OSYA) learners to develop basic and functional literacy skills, and to access equivalent pathways to complete basic education.

ALS Mambusao accepts enrolment for learners this school year 2022-2023, where more than 80 ALS learners are enrolled. One of the challenges they are facing are the learners lack of ICT skills due to lack of facilities and experts in teaching the digital literacy subject.

ISWEPT: Teaching Information and Communications Technology (ICT) to ALS learners of Mambusao is an extension program that targets to intervene and solve the cited problems of ALS Mambusao. The program will bridge the gap in educating and completing the skills required by the Alternative Learning System K to 12 Basic Education Curriculum (ALS K to 12 BEC) in terms of digital literacy. ALS students will learn to use common office application software such as MS Word, MS Powerpoint, MS Excel and Basic PC Operations.

#### IV. OBJECTIVES

The main objective of this program is to extend the ISWEPT: Teaching Digital Literacy to ALS Students. Specifically, it aims to:

1. equip ALS learners of Mambusao with the skills on digital literacy.
2. capacitate ALS students of Mambusao with the knowledge on digital literacy.

#### V. METHODOLOGY

The extension chairman of the college will conduct a meeting together with the extension coordinator of each department to plan the extension activities to be conducted. Approval of training request for ALS will be signed by ALS coordinator of Mambusao. Training will be conducted. Evaluation will be done at the beginning and end of the training
