III. SUMMARY:

This extension proposal aims to establish and sustain a Language Enhancement Program for the Alternative Learning System (ALS) in the Municipality of Sapián. The program aims to address the language barriers faced by ALS learners by enhancing their language proficiency in English. By improving their language skills, ALS learners will have increased opportunities for educational and career advancement, leading to personal growth and community development.

The Alternative Learning System (ALS) is a non-formal education program in the Philippines that provides learning opportunities for out-of-school youth, adults, and individuals who have not completed their basic education. In Sapián, Capiz, there is a significant number of ALS learners who face various challenges in their learning journey, including language barriers. The program aims to promote access to education and help learners acquire functional literacy and life skills

This is in line with the vision, mission and goals of the university system of delivering quality service to all, also with the university's thrust and priorities.

IV. RATIONALE:

Alternative Learning System (ALS) Accreditation and Equivalency (A&E) program plays an important role in achieving the goal of Education for All (EFA) 2015, which is the “Universal Coverage of Out-of-School Youth and Adults in the provision of Basic Learning Needs”. With the Local Government Unit (LGU), Non-government organization (NGO)

participation in this endeavor, ALS will certainly uplift the economic situation of the Filipino people. Madrid (2004) emphasized that youth and adults do not wish to become social burdens. However, some of them are just victims of inevitable circumstances.

ALS aimed to equip its Completers with the necessary skills and knowledge in order to be accepted in tertiary levels. And one necessary skill for ALS Completers to pursue their tertiary education is the proficiency in the English Language.

English is regarded chiefly as a skill, as a tool-subject and as a discipline. In fact, it is the foundation substance of thought and experience upon which the rest of the academic knowledge is built San Miguel, J. Barraquio, D. and Revilla R. (2006). Gibbons (2003) posited that one needs to be proficient in the use of English among non-native speakers has become a large-scale phenomenon. As of current, teachers are faced with the challenge of taking in hand the needs of the growing number of students whose chief language is not English. While mastering other skills and content in other subject areas, there is the necessity for these learners to gain proficiency in English.

The Municipality of Sapián has a significant number of ALS learners 77 from the Central Learning Center comprising Barangay Poblacion, Dapdapan, Majanlud, 77 also from Maninang and Bilao Community Learning Center, and 75 from Ag-sur and Lonoy Community Center with a total of 229 ALS students enrolled for S.Y 2022-2023. These students face challenges in their learning journey, they lack adequate supplementary materials to complement the ALS curriculum. ALS students often find themselves without access to resources that can reinforce their understanding of key concepts, promote critical thinking, and enhance their overall academic skills. Recognizing this gap, this proposed extension program aims to empower ALS students through this extension program, which includes conduct of classes, trainings, creation and distribution of supplementary worksheets tailored to the learning outcomes of their curriculum.

This will be a collaborative project of the Department of Education, Schools Division of Capiz – Alternative Learning System (DepEd-ALS) Sapián, the Local Government Unit (LGU) of Sapián, and the Capiz State University – Mambusao Satellite College (CAPSU-MSC). CAPSU-MSC will collaborate with the DepEd-ALS implementers.

V. OBJECTIVES

A. General Objectives

The program aims to uplift the English Language Proficiency of ALS Learners which will provide them with opportunities to acquire the knowledge and develop communication skills needed to pass the assessment and evaluation test:

B. **Specifically, this program aims to:**

1. To conduct enhancement programs in English Language Proficiency of Alternative Learning System in the different ALS Centers situated in the Municipality of Sapan; and
2. To create modules and work sheets that contain intervention programs for English Language Proficiency of ALS Learners.

VI. **ACTIVITIES (Project Implementation/Methodology):**

This program will be conducted at the different ALS Centers in the Municipality of Sapan. Mentoring will be conducted every third Friday of the week or depending upon the availability of the ALS Learners. Four instructors/facilitators will immerse in the ALS Centers where they will be given 1 1/2 hours to discuss their topics related to English Language Proficiency.

The topics are aligned on the DepEd ALS Secondary Junior High curriculum module. It is from the **Learning strand 1- Communication Skills in English**. Table below shows the different Modules in this strand that comprised different learning outcomes where the topics for classes/trainings, supplementary modules and worksheet will be based.
